

The book cover features a detailed illustration of the Sea Shepherd ship, the 'Sea Shepherd', sailing on a dark, choppy sea. The ship is white with a rainbow flag painted on its side. In the background, there are jagged, snow-capped mountains. In the foreground, two large whales are swimming in the water, their heads and backs visible above the surface. The overall tone is dramatic and environmental.

Sea Shepherd My Fight For Whales And Seals:

Sea Shepherd Paul Watson, Warren Rogers, Joseph Newman, 1982 Records in detail Watson's heroic war against the whalers and seal hunters who are decimating the animal populations **From Environmental Action to Ecoterrorism?** Gerry Nagtzaam, 2017-01-27 This book scrutinizes the growth of the eco terrorism movement operating on a global scale focusing on the main groups and their more radical offshoots both historically and those currently active These include Earth First the Earth Liberation Front the Animal Liberation Front and the Sea Shepherd Conservation Society It critically examines how these groups form and how they have evolved their key personnel their strategies and tactics principles motivating philosophies and attitudes to violence Specifically the book seeks to understand whether such groups inevitably evolve from activists to militants to terrorists as the literature suggests Lastly it considers the future of such groups asking whether they will become more prominent as more people become ecologically aware and as global environmental conditions deteriorate or whether such groups have peaked as a force for environmental change **Eye of the Whale** Dick Russell, 2001 Eye of the Whale focuses on one great whale in particular the coastal traveling California gray whale Gray whales make the longest migration of any mammal from the lagoons of Baja California to the feeding grounds of the Bering Strait between Alaska and Siberia nearly 6 000 miles That the gray whale exists today is nothing short of miraculous Whaling fleets twice massacred the species to near extinction first during the nineteenth century and again during the early part of the twentieth century BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved

International Environmental Law Gerry Nagtzaam, Evan van Hook, Douglas Guilfoyle, 2019-10-23 This book seeks to better understand how International Environmental Law regimes evolve The authors address throughout the major environmental economic and political tensions that have both shaped and constrained the evolution of international environmental policy within regimes and its expression in international legal rule and norm development Readers will gain an increased understanding of the growing role played by non state actors in global environmental governance including environmental non government organisations scientists the United Nations and corporations The authors also look ahead to the future of International Environmental Law evaluating key challenges and decisions that the discipline will face The text is clear concise and accessible It is ideally suited to students and professionals interested in International Environmental Law and individuals who are intrigued by this dynamic area of law The International Politics of Whaling Peter J. Stoett, 2011-11-01 Whales large mysterious intelligent and endangered In 1986 a global moratorium on whaling was issued by the International Whaling Commission However that decision was not without controversy Some countries such as Norway continue to whale in defiance of the ban In this fascinating book Peter Stoett combines ecological sensitivity with a hard assessment of the political realities of the international regime to examine this important issue The International Politics of Whaling examines contemporary whaling issues with an emphasis on three factors our knowledge of whales and current

whale populations and the impact of whaling the actors and institutions involved in the debate over whaling and the ethical dimension Reluctantly he concludes that the current global moratorium on whaling is problematic and that we must focus instead on habitat preservation in order to protect whales more effectively [Red Leviathan](#) Ryan Tucker Jones,2022-05-30

A revealing and authoritative history that shows how Soviet whalers secretly helped nearly destroy endangered whale populations while also contributing to the scientific understanding necessary for these creatures salvation The Soviet Union killed over six hundred thousand whales in the twentieth century many of them illegally and secretly That catch helped bring many whale species to near extinction by the 1970s and the impacts of this loss of life still ripple through today s oceans In this new account based on formerly secret Soviet archives and interviews with ex whalers environmental historian Ryan Tucker Jones offers a complete history of the role the Soviet Union played in the whales destruction As other countries especially the United States Great Britain Japan and Norway expanded their pursuit of whales to all corners of the globe Stalin determined that the Soviet Union needed to join the hunt What followed was a spectacularly prodigious and often wasteful destruction of humpback fin sei right and sperm whales in the Antarctic and the North Pacific done in knowing violation of the International Whaling Commission s rules Cold War intrigue encouraged this destruction but as Jones shows there is a more complex history behind this tragic Soviet experiment Jones compellingly describes the ultimate scientific irony today s cetacean studies benefited from Soviet whaling as Russian scientists on whaling vessels made key breakthroughs in understanding whale natural history and behavior And in a final twist Red Leviathan reveals how the Soviet public began turning against their own country s whaling industry working in parallel with Western environmental organizations like Greenpeace to help end industrial whaling not long before the world s whales might have disappeared altogether [Make It a Green Peace!](#) Frank Zelko,2013-04-03

The emergence of Greenpeace in the late 1960s from a loose knit group of anti nuclear and anti whaling activists fundamentally changed the nature of environmentalism its purpose philosophy and tactics around the world And yet there has been no comprehensive objective history of Greenpeace s origins until now Make It a Green Peace draws upon meeting minutes internal correspondence manifestos philosophical writings and interviews with former members to offer the first full account of the origins of what has become the most recognizable environmental non governmental organization in the world Situating Greenpeace within the peace movement and counterculture of the 1960s Frank Zelko provides a much deeper treatment of the group s groundbreaking brand of radical media savvy direct action environmentalism than has been previously attempted Zelko traces the complex intellectual and cultural roots of Greenpeace to the various protest movements of the 1950s and 1960s highlighting the influence of Quakerism with its practice of bearing witness Native American spirituality and the non violent resistance of Gandhi Unlike the more strait laced less confrontational Sierra Club and Audubon Society early Greenpeacers smoked dope dropped acid wore their hair long and put their bodies on the line interposing themselves between the harpoons of whalers and the clubs

of seal hunters to save the animals and achieve what they hoped would be a lasting transformation in the way humans regarded the natural world And while it may not have achieved its most revolutionary goals Greenpeace inarguably created a heightened awareness of environmental issues that endures to this day Narrating the key campaigns and arguments among the group s early members *Make It a Green Peace* vividly captures all the drama pathos and occasional moments of absurd comic relief of Greenpeace s tumultuous first decade **Radical Environmental Resistance** Heather Alberro,2023-11-29

Exploring the role of direct action within times of severe social and ecological upheaval this book evokes the rich diverse world that radical environmental activists and indigenous environmental protectors are fighting for **Tales of an Ecotourist** Mike Gunter Jr.,2017-11-21 Crossing the far corners of the globe *Tales of an Ecotourist* showcases travel from the hot and humid Amazon jungle to the frozen but dry Antarctic as a simple yet spellbinding lens to better understand the complex issue of climate change At its core climate change is an issue few truly understand in large part due to its dizzying array of scientific economic cultural social and political variables Using both keen humor and memorable anecdotes while weaving respected scientific studies along the way Mike Gunter Jr transports the reader to five famous ecodestinatons from the Galapagos Islands to the Great Barrier Reef revealing firsthand the increasing threats of climate change Part travelogue part current events expos with a healthy dose of history ecology and politics these tales of ecoadventure tackle such obstacles head on while fleshing out much needed personal context to perhaps society s greatest threat of all A

Reenchanted World James William Gibson,2009-04-14 A surprising and enlightening investigation of how modern society is making nature sacred once again For more than two centuries Western cultures as they became ever more industrialized increasingly regarded the natural world as little more than a collection of useful raw resources The folklore of powerful forest spirits and mountain demons was displaced by the practicalities of logging and strip mining the traditional rituals of hunting ceremonies gave way to the indiscriminate butchering of animals for meat markets In the famous lament of Max Weber our surroundings became disenchanted with nature s magic swept away by secularization and rationalization But now as acclaimed sociologist James William Gibson reveals in this insightful study the culture of enchantment is making an astonishing comeback From Greenpeace eco warriors to evangelical Christians preaching creation care and geneticists who speak of human animal kinship Gibson finds a remarkably broad yearning for a spiritual reconnection to nature As we grapple with increasingly dire environmental disasters he points to this cultural shift as the last utopian dream the final hope for protecting the world that all of us must live in **Understanding the Cultures of Fishing Communities** James R.

McGoodwin,Food and Agriculture Organization of the United Nations,2001-01-01 Small scale fishing accounts for almost 95% of the world s fishing and it has been estimated that small scale fishing activities support the livelihoods of more than 200 million people worldwide The purpose of this document is to help fisheries officials gain a clearer understanding of the cultures of small scale fishing communities It is hoped this will enable the development of more successful management

policies and practices and empower people in such communities to improve their livelihoods The document highlights the importance of sustaining the rights of access to resources and the integration of cultural considerations into fisheries management policies It includes six case studies from distinct cultural regions of the world **Biological Revolution**

Beverly D. Conley, 2002-04-08 Biological Revolution reviews biotech and other scientific developments highlights moral ethical and legal questions relating to both human and nonhuman rights issues and suggests avenues for a practical response Besides analysis and historical perspective this documented work contains spiritual insight i e the latter part of Chapter 2 through Chapter 5 includes Bible prophecy or scripture relevant to world events There are 14 Chapters to this work titled Cutting the Cord to Earth and Heredity The Heavens Bear Witness Re Creation Roots and Rock Following the Precedents Value Legacy of Violence In This Day Decisions Life Patents Reverence for Life Born Free Born Property Exploitation and Coming Together Biological Revolution is written to a general national international audience including near future human tailored beings **Animality and Children's Literature and Film**

A. Ratelle, 2014-11-27 Examining culturally significant works of children s culture through a posthumanist or animality studies lens Animality and Children s Literature and Film argues that Western philosophy s objective to establish a notion of an exclusively human subjectivity is continually countered in the very texts that ostensibly work to this end **Conservation Directory**, 1986 **Dwelling in Political Landscapes**

Anu Lounela, Eeva Berglund, Timo Kallinen, 2019-05-22 People all over the globe are experiencing unprecedented and often hazardous situations as environments change at speeds never before experienced This edited collection proposes that anthropological perspectives on landscape have great potential to address the resulting conundrums The contributions build on broadly phenomenological structuralist and multi species approaches to environmental perception and experience but they also argue for incorporating political power into analysis alongside dwelling cosmology and everyday practice The book s 13 ethnographically rich chapters explore how the material and the conceptual are entangled in and as landscapes but it also looks at how these processes unfold at many scales in time and space involving different actors with different powers Thus it reaches towards new methodologies and new ways of using anthropology to engage with the sense of crisis concerning environment movements of people climate change and other planetary transformations Dwelling in political landscapes contemporary anthropological perspectives builds substantially upon anthropological work by Tim Ingold Anna Tsing and Philippe Descola and on related work beyond which emphasises the ongoing and open ended yet historically conditioned ways in which humans and nonhumans produce the environments they inhabit In such work landscapes are understood as the medium and outcome of meaningful life activities where humans like other animals dwell This means that landscapes are neither social cultural nor natural but socio natural Protesting against and moving on from the proverbial dualisms of modern Western and maybe capitalist thought is only the first step in renewing anthropology s methodology for the current epoch however The contributions ask how seemingly disconnected temporal representational economic and other

systemic dynamics fold back on lived experience that are materialised in landscapes Foremost through studying how socially valued landscapes become irreversibly disturbed commodified or subjected to wilful markings or erasures the book explores a number of approaches to how landscapes are entangled in the ways people gather and organise themselves Mindful of troubling changes in Earth Systems all the authors argue from empirics They show that processes of landscape change are always both habitual and laden with choices That is landscape change is political Undoubtedly landscape politics is bound up not just in how nature has been imagined but in long histories of consumption Today an alarming quest for raw materials and energy continues to change both political and geological formations Meanwhile dominant socio political aspirations mean the exploitation of staggering volumes of cheap resources like fossil fuels in order to sustain economic processes that are as taken for granted as they are unsustainable Like anthropology generally this book attends to the contextual details buried in such planet scale pictures Building on traditional anthropological strengths many authors consider the details of how the past is brought into the present or erased from it in material flows and sensory awareness as well as in narratives that are explicitly linked to particular landscapes Colonial identity formation and the different ways that it links with how landscape is viewed and managed for instance for resource development for a global market whether in Southern Africa Israel Palestine the Canadian arctic or Indonesia is a particularly striking example of how to talk about landscape is also to talk about past present and future And as the idea that we inhabit the Anthropocene becomes commonplace the discipline can meaningfully discuss the current era as one of disavowed ruins as well as of poorly understood multispecies relations To think of landscape as historically produced across multiple scales does not mean ignoring its sensuous qualities let alone its role in cosmological systems On the contrary the analyses in the collection attend to the ways people s movements through the landscape produce it as a material and conceptual resource Taken together the book s ethnographic analyses take on board the unprecedented conditions under which people everywhere are having to make sense and forge relationships to the worlds they inhabit Since landscapes are not what they used to be neither can anthropology be

Faces of State Terrorism Laura

Westra, 2012-05-16 Terrorism a widespread global phenomenon manifests itself in the actions and the policies of individuals and groups but also and primarily in the actions and policies of states Delving into the seldom discussed question of the motivation for most episodes of terrorism this book studies terrorism s effects based on the economic and geopolitical imbalances that frame today s global governance The main goal of terrorism is to induce terror and perhaps to influence public opinion for political change Many states hide their terrorist activities under the faces they show the world masks intended to hide real aims of acquiring or expanding power and wealth These activities presented as self defense preventive action counter measures or even as promoting progress and development are forms of state terrorism that are much more widespread powerful and destructive than the actions originating from groups labeled terrorist since 9 11 This book examines the numerous illegal measures states use from unlawful imprisonment and curtailing of civil liberties to torture in

the name of responding to terrorism At the same time it considers how trade and industrial activities terrorize people by depriving them of the natural resources they need to survive and by exposing communities to life threatening hazardous conditions In closing the book considers how existing laws might stem the tide of state terrorism The conclusions are not optimistic the UN s systems and legal regimes are clear in defense of human rights but the structure and nature of state power do not permit these mandates to prevail With a foreword by Tullio Scovazzi *The Animal Liberation Front* Steven Best,Anthony J. Nocella,2011-06 The actions of the Animal Liberation Front ALF constitute one of the most misunderstood components of the animal advocacy movement in the U K and U S Not so much an organization as an ever changing cluster of individuals who free animals from laboratories farms and other animal confinement facilities the ALF has been by turns romanticized and vilified hounded and lionized In this detailed introduction to the ALF which constitutes the opening chapter of their edited volume *Terrorists or Freedom Fighters* academics Steve Best and Anthony Nocella place the ALF in the context of other liberation and social justice movements and examine its stated commitment to nonviolence and the forces arrayed against it The result is a potent polemical and passionately engaged study of activism in an age of terror laws and fearmongering

Conflicts in Conservation Stephen M. Redpath,R. J. Gutiérrez,Kevin A. Wood,Juliette C. Young,2015-05-07 Conflicts over the conservation of biodiversity are increasing and are serious obstacles to wildlife conservation efforts worldwide Changing patterns in land use over exploitation pollution climate change and the threat posed by invasive species all challenge the way we currently maintain and protect biodiversity from the local management of single species to the international management of resources Integrating approaches from different academic disciplines policy makers and practitioners this volume offers a radically new cross disciplinary multi scale approach to deal with conflicts Groundbreaking strategies for conservation are analysed and a large section of the book is devoted to exploring case studies of conflict from around the world Aimed primarily at academics researchers and students from disciplines relating to conservation ecology natural resources management and environmental governance this book will be equally valuable to conservation NGOs and practitioners and the policy community at national and international levels

Historical Dictionary of North American Environmentalism Edward Robert Wells,Alan M. Schwartz,1997 An attempt to capture the people places and events which have contributed to the development of environmentalism around the world attempting to place each term used in the context of a developing movement Although the focus of this volume is the history of North American environmentalism entries that are not purely North American in scope have been included because they somehow helped to shape environmentalism on this continent

The World Reimagined Mark Philip Bradley,2016-09-12 Concerns about rights in the United States have a long history but the articulation of global human rights in the twentieth century was something altogether different Global human rights offered individuals unprecedented guarantees beyond the nation for the protection of political economic social and cultural freedoms The World Reimagined explores how these revolutionary

developments first became believable to Americans in the 1940s and the 1970s through everyday vernaculars as they emerged in political and legal thought photography film novels memoirs and soundscapes Together they offered fundamentally novel ways for Americans to understand what it means to feel free culminating in today's ubiquitous moral language of human rights Set against a sweeping transnational canvas the book presents a new history of how Americans thought and acted in the twentieth century world
