Sea Wall The:

The Sea Wall Barbara Armstrong, 1996 **Sea Wall** Simon Stephens, 2019-01-28 There s a hole running through the centre of my stomach You must have all felt a bit awkward because you can probably see it Sea Wall is a delicate monologue completely devastating and beautifully powerful Alex s story spoken directly to the audience begins full of clear light and smiles as he speaks about his wife visiting her father in the South of France having a daughter photography and the bottom of the sea His tone is natural happy and engaging with flickers of questions about belief and religion glimpsed under the surface But his contentment falls away into deep and heart breaking grief crumbling to pieces with a vividness that is incredibly moving *Ellis Island Seawall* Naomi D. Kroll, 2003 **Over the Seawall** Stephen Robert Miller, 2023-10-31 In March 2011 people in a coastal Japanese city stood atop a seawall watching the approach of the tsunami that would kill them They believed naively that the huge concrete barrier would save them Instead they perished betrayed by the very thing built to protect them Erratic weather blistering drought rising seas and ecosystem collapse now affect every inch of the globe Increasingly we no longer look to stop climate change choosing instead to adapt to it Never have so many undertaken such a widespread hurried attempt to remake the world Predictably our hubris has led to unintended and sometimes disastrous consequences Academics call it maladaptation in simple terms it s about solutions that backfire Over the Seawall tells us the stories behind these unintended consequences and about the fixes that can do more harm than good From seawalls in coastal Japan to the reengineered waters in the Ganges River Delta to the artificial ribbon of water supporting both farms and urban centers in parched Arizona Stephen Robert Miller traces the histories of engineering marvels that were once deemed too smart and too big to fail In each he takes us into the land and culture seeking out locals and experts to better understand how complicated grandiose schemes led instead to failure and to find answers to the technologic holes we ve dug ourselves into Over the Seawall urges us to take a hard look at the fortifications we build and how they ve fared in the past It embraces humanity s penchant for problem solving but argues that if we are to adapt successfully to climate change we must recognize that working with nature is not surrender but the only way to assure a secure future **In the Shadow of the Seawall** Summer Gray, 2023-09-12 In the Shadow of the Seawall journeys to the edge of the sea to understand the existential dilemma of seawalls alongside struggles for resilience and adaptation In coastal management debates seawalls are a deeply contested subject between those in favor of hard structures for mitigating the impacts of sea change and those who advocate measures modeled on natural processes Summer Gray argues that both approaches involve limited notions of resilience that undermine movements for social and climate justice and introduces the concept of placekeeping the struggle to resist colonizing practices of displacement as a justice oriented framework for addressing the global dangers of coastal disruption Drawing on a mix of ethnographic observation interviews and archival research Gray shows how competing logics of adaptation play out on the ground in Guyana and the Maldives to reveal how seawalls are entrenched in relationships of power and entangled in

Revetments Kristian Pilarczyk,1998-01-01 Low lying countries such as the Netherlands are strongly dependent on good and
safe sea defences In the past the design of dikes and revetments was mostly based on vague experience rather than on
general valid calculation methods The demand for reliable design methods for protective structures has in the Netherlands
resulted in increased research in this field These contributions have been prepared by Dutch experts participating in the
study groups of the Technical Advisory Committee on Water Defences The book opens with an outline of general strategy and
methodology on sea defences illustrated in the following chapters by technical information on specific items and Dutch
experience and it ends with more general aspects such as probabilistic approach integral multifunctional design management
safety assessment Together these chapters provide an almost complete technical overview of the items needed for the design
and maintenance of dikes and revetments The enclosed CRESS program allows for an initial estimation of hydraulic loads
