The Search for Political Community Paul Lichterman, 1996-09-19 This book challenges the myth that Americans emphasis on personal fulfilment necessarily weakens commitment to the common good Drawing on extensive participant observation with a variety of environmentalist groups Paul Lichterman argues that individualism sometimes enhances public political commitment and that a shared respect for individual inspiration enables activists with diverse political backgrounds to work together This personalised culture of commitment has sustained activists working long term for social change The book contrasts personalised politics in mainly white environmental groups with a more traditional community centred culture of commitment in an African American group The untraditional personalised politics of many recent social movements invites us to rethink common understandings of commitment community and individualism in a post traditional world **The Search for Political Community** Paul Lichterman, 2003 4e de couv This book challenges the myth that Americans emphasis on personal fulfilment necessarily weakens commitment to the common good Drawing on extensive participant observation with a variety of environmentalist groups Paul Lichterman argues that individualism sometimes enhances public political commitment and that a shared respect for individual inspiration enables activists with diverse political backgrounds to work together This personalised culture of commitment has sustained activists working long term for social change The book contrasts personalised politics in mainly white environmental groups with a more traditional community centred culture of commitment in an African American group The untraditional personalised politics of many recent social movements invites us to rethink common understandings of commitment community and individualism in a post traditional world *Youth Engagement* Jessica K. Taft, Sandi Kawecka Nenga, 2013-03-08 This volume critically examines the multiple and contested meanings of ideal citizenship and reveal how children and youth craft active citizenship as they encounter and respond to the various institutions and organizations designed to encourage their civic and political development Political Translation Nicole Doerr, 2018-03 At a time of increasing doubts about political legitimacy concern for equal and inclusive democratic processes and deliberation is sweeping the social sciences In this empirical study the author presents the collective practices of political translation which help multilingual and culturally diverse groups work together more democratically *Virtual Communities* Felicia Wu Song, 2009 Does contemporary Internet technology strengthen civic engagement and democratic practice The recent surge in online community participation has become a cultural phenomenon enmeshed in ongoing debates about the health of American civil society But observations about online communities often concentrate on ascertaining the true nature of community and democracy typically rehearsing familiar communitarian and liberal perspectives This book seeks to understand the technology on its own terms focusing on how the technological and organizational configurations of online communities frame our contemporary beliefs and assumptions about community and the individual It analyzes key structural features of thirty award winning online community websites to show that while the

values of individual autonomy egalitarianism and freedom of speech dominate the discursive content of these communities the practical realities of online life are clearly marked by exclusivity and the demands of commercialization and corporate surveillance Promises of social empowerment are framed within consumer and therapeutic frameworks that undermine their democratic efficacy As a result online communities fail to revolutionize the civic landscape because they create cultures of membership that epitomize the commodification of community and public life altogether

Social Movements David S. Meyer, Nancy Whittier, Belinda Robnett, 2002 Why do social movements take the forms they do How do activists efforts and beliefs interact with the cultural and political contexts in which they work This book considers the intersections of opportunities and identities structures and cultures in social movements

Meaning and Modernity Richard Madsen, 2001-12-04 This interesting volume of essays on contemporary religion and its ambivalent relationship to modernity not only serves as a testimony to the intellectual influence of Robert Bellah it establishes a new school of comparative religious and social thought This Bellahian school at the intersection of sociological theological and contemporary philosophical thinking has roots in Durkheim and Weber borrows insights from Marx Foucault and Bourdieu and finds its clearest voice in the writings of Bellah himself The essays by some of Bellah's colleagues and former students that have been gathered in this volume address some of the most sagacious of these Bellahian themes the religious dimension of contemporary civil societies the relationship between religious and capitalist values the cultural critique of modernity and the moral visions that hold a promise of civic renewal Mark Juergensmeyer author of *Terror in the Mind of God* *The Global Rise*

of Religious Violence California 2000 This highly readable collection of original thought provoking essays by leading scholars provides fresh insights into the issues that Robert Bellah has addressed so fruitfully in his long career Readers will learn much about such issues as how Calvinism contributed to political revolution why democracies require an enlarged sense of political community how the religious foundations of Japan and the United States differ and what it means to be a Christian and an American Benton Johnson coauthor of Vanishing Boundaries The Religion of Protestant Baby Boomers 1994 and author of Functionalism in Modern Sociology Understanding Talcott Parsons 1975 **The Communitarian Reader** Amitai Etzioni, Drew Volmert, Elanit Rothschild, 2004 The Communitarian Reader Beyond the Essentials brings together essays by prominent social thinkers reflecting on issues ranging from moral obligations to civil liberties after 9 11 The result is a book both practical and theoretical and an essential guide for all interested in further exploring this important social movement

The State of Nonprofit America Lester M Salamon, 2012-05-14 Today America's nonprofit organizations seem caught in a force field buffeted by four impulses voluntarism professionalism civic activism and commercialism Too little attention however has been paid to the significant tensions among these impulses Understanding this force field and the factors shaping its dynamics thus becomes central to understanding the future of particular organizations and of the nonprofit sector as a whole In this second edition of an immensely successful volume Lester Salamon and his colleagues offer an overview of the current state of America's nonprofit sector examining the forces that are shaping its future and identifying the changes that might be needed The State of Nonprofit America has been completely revised and updated to reflect changing political realities and the punishing economic climate currently battering the nonprofit sector which faces significant financial challenges during a time when its services are needed more than ever The result is a comprehensive analysis of a set of institutions that Alexis de Tocqueville recognized to be more deserving of our attention than any other part of the American experiment **The Dynamics and Social Outcomes of Education Systems** J. Janmaat, M. Duru-Bellat, P. Méhaut, A.

Green, 2013-08-27 Some scholars argue that education systems across the western world are becoming increasingly similar due to the influence of transnational discourses and organizations Others believe that education is the panacea for all problems of social cohesion After all aren't the well educated usually more tolerant civically engaged and trusting than the poorly educated This book critically examines both claims It finds that western countries still differ markedly on key aspects of their education systems and that these differences reflect distinct political traditions and different responses to a set of competing normative and political principles The findings further suggest that raising the average education level is unlikely to be an effective strategy for promoting social cohesion Instead more promising are policies targeting the opposite ends of the lifelong learning continuum universalizing pre school education and care and promoting adult education with a pronounced second chance character Urban Grassroots Movements in Central and Eastern Europe Kerstin

Jacobsson, 2016-03-09 What can we learn about collective action across Central and Eastern Europe by focusing on activism

within urban spaces This volume argues that the recent resurgence of urban grassroots mobilisation represents a new phase in the development of post socialist civil societies and that these civil societies have significantly more vitality than is commonly perceived The case studies here reflect the diversity and complexity of post socialist urban movements capturing also the extent to which the laboratory of urban politics is richly illustrative of the complex nexus of state society market relations within post socialism The grassroots campaigns and actions reflect the new social cleavages and increased polarisation as a consequence of neoliberal urbanisation and global integration as well as the transformation of state power and authority in the region Studying urban activism in Central and Eastern Europe is instructive for urban movements scholars generally as it forces us to acknowledge the variety of forms that contention can take and the usefulness of embedding the study of urban movements within a larger understanding of civil society Rethinking Class and Social Difference Barry Eidlin, Michael A. McCarthy, 2020-09-30 This volume draws together scholars rethinking social scientific and theoretical approaches to a wide range of forms of social difference and inequality These include race nationalism sexuality professional classes domestic employment digital communication and uneven economic development
