Google is a champion of cultural democracy but without culture and without democracy In this witty and polemical critique the philosopher Barbara Cassin takes aim at Google and our culture of big data Enlisting her formidable knowledge of the rhetorical tradition Cassin demolishes the Google myth of a good tech company and its democracy of clicks laying bare the philosophical poverty and political naiveté that underwrites its founding slogans Organize the world s information and Don t be evil For Cassin this conjunction of globalizing knowledge and moral imperative is frighteningly similar to the way American demagogues justify their own universalizing mission before the world While sensitive to the possibilities of technology and to Google s playful appeal Cassin shows what is lost when a narrow worship of information becomes dogma such that research comes to mean data mining and other languages become provincial flavors folded into an impoverished Globish or global English **Gurus on E-business** John Middleton,2006 Evaluates thought leaders in e commerce This book explores the impact and significance of e business as illustrated by the work and thinking of a number of key players in the field Its aim is to be a guide for business people who are looking to make optimal and profitable use of e business as well as to students **Bulletin of the Authors' League of America** ,1917 Until Dawn Melinda Di Lorenzo,2018-04-03
