Repression Alexander W. Pisciotta, 1994. The opening in 1876 of the Elmira Reformatory marked the birth of the American adult reformatory movement and the introduction of a new approach to crime and the treatment of criminals. Hailed as a reform panacea and the humane solution to America's ongoing crisis of crime and social disorder, Elmira sparked an ideological revolution. Repression and punishment were supposedly out. Academic and vocational education, military drill, indeterminate sentencing and parole, benevolent reform were now considered instrumental to instilling in prisoners a respect for God, law and capitalism. Not so, says Al Pisciotta in this highly original, startling and revealing work. Drawing upon previously unexamined sources from over a half dozen states and a decade of research, Pisciotta explodes the myth that Elmira and other institutions of the new penology represented a significant advance in the treatment of criminals and youthful offenders. The much-touted programs failed to achieve their goals; instead, prisoners under Superintendent Zebulon Brockway, considered the Father of American Corrections, were whipped with rubber hoses and two-foot leather straps, restricted to bread and water in dark dungeons during months of solitary confinement and brutally subjected to a wide range of other draconian psychological and physical abuses intended to pound them into submission. Escapes, riots, violence, drugs, suicide, arson and rape were the order of the day in these prisons, hardly conducive to the transformation of dangerous criminal classes into Christian gentlemen as was claimed. Reflecting the racism and sexism in the social order in general, the new penology also legitimized the repression of the lower classes. Highlighting the disparity between promise and practice in America's prisons, Pisciotta draws on seven inmate case histories to illustrate convincingly that the March of Progress was nothing more than a reversion to the ways of old. In short, the adult reformatory movement promised benevolent reform but delivered benevolent repression, a pattern that continues to this day. A vital contribution to the history of crime, corrections and criminal justice, this book will also have a major impact on our thinking about contemporary corrections and issues surrounding crime, punishment and social control.

The Law of Beauty Fabio Macioce, 2025-07-25. This book examines the longstanding yet ambiguous and deeply complex relationship between law and aesthetics. Despite numerous studies dedicated to the topic, the relationship between aesthetics and law tends to be interpreted as one between two approaches, two thematic horizons, two disciplines or two distinct semantic universes. Conversely, the book argues that legal phenomena cannot be properly understood without grasping the relevance of aesthetics within the experience of law itself, nor the

intrinsically political and regulatory character of aesthetic experience considering how it shapes our social world by affecting people as sensate bodies The book examines a series of current issues that arise from the ambiguous relationship between law and aesthetics such as the legal status of aesthetic objects the aesthetic analysis of legal texts the conflicts between aesthetics and legal principles as well as the legal relevance of ugliness It is only by taking into account the inextricable nexus between aesthetics and aesthesis that is both the epistemological level and the question of how people see hear and feel that we can understand these issues This book will appeal to scholars and students in legal theory and philosophers with interests in law and aesthetics

Blood Groups and Human Heredity, 1900-1950 William H. Schneider,2024-11-29 This monograph presents a detailed analysis of the beginning and rapid establishment of blood group research in the first half of the twentieth century. The main theme of this book is how blood groups were used as a scientific explanation of differences in race health and human behaviour. The discovery of the inheritance of blood groups and their uneven distribution among various human populations quickly developed into a new field of scientific study in various countries around the world. Almost as quickly the discoveries were studied as genetic markers of race disease and behaviours such as crime insanity and temperament. The time scope of coverage is the first half of the twentieth century beginning with Landsteiner's discovery of blood groups and ending with the period following the Second World War when the research was picked up again and became part of the revolution in human genetics accelerated by the discovery of the double helix. By this time blood group genetics had undermined the very concept of race and became the foundation of population genetics. The focus on the formative period of blood group research complements the recent resurgence of interest in the subject by providing in depth background and a base for further research.
