Research Anthology on Improving Health Literacy Through Patient Communication and Mass Media Management Association, Information Resources, 2021-07-16. Increasing health literacy among patients is a difficult task as medical jargon and healthcare directions can be overwhelming and difficult to comprehend. In today's digital

world people are more connected than ever before and have the ability to find healthcare information in a way that was not possible in recent years. Mass media and social media have become particularly influential in conveying health information to the public. With the amount of misinformation being spread coupled with poor health literacy skills, it is imperative that new strategies and policies are undertaken to ensure that patients and the general public receive accurate information and are appropriately educated in order to provide them with the best possible knowledge and care. The Research Anthology on Improving Health Literacy Through Patient Communication and Mass Media provides an overview of the importance of health literacy and the various means to achieve health literacy for patients using several strategies and elements such as patient communication and mass media. The book covers health awareness challenges that have been faced recently and historically and pushes for better patient-provider communication. The book also examines the use of social media, virtual support groups, and technological tools that aid in the facilitation of health knowledge. Covering a range of key topics such as patient safety, health illiteracy, and eHealth, this anthology is crucial for healthcare professionals, researchers, academicians, students, and those interested in understanding the importance of health literacy and how it connects to media and communication.

Media Education Assessment Handbook William G. Christ, 2020-07-24. Assessing media education is a formidable task because both assessment and media education are complex and controversial concepts. Assessment, which can take place at the individual, student, class, sequence, program, department, or unit, and university levels, is questioned in terms of reliability, validity, relevance, and cost. Media education, which has been challenged at a number of schools, finds faculty and administrators in the midst of soul searching about how to clearly articulate its missions and purposes to a broader audience. Departments are under increasing national, state, and institutional pressure to get assessment procedures carried out quickly, but there is an obvious danger in rushing to implement assessment strategies before establishing what is essential in media education. In communication education, in general, the what of assessment is often discussed in terms of skills, attitudes, affect, values, and knowledge. People assess students to determine what they know, think, feel, value, and can do. Here, it is suggested that one of the places to start defining what students should learn from their media education is by identifying outcomes. Outcomes can be assessed in a variety of ways, but first they need to be developed and clearly articulated.
