Scattered Minds Gabor Maté, MD,2023-02-07 From renowned mental health expert and speaker Dr Gabor Mat Scattered Minds explodes the myth of attention deficit disorder ADD ADHD as genetically based and offers real hope and advice for

children and adults who live with the condition In this breakthrough guide to understanding treating and healing Attention Deficit Disorder Dr Gabor Mat bestselling author of The Myth of Normal and himself diagnosed with ADD Demonstrates that the condition is not a genetic illness but a response to environmental stress Explains that in ADD circuits in the brain whose job is emotional self regulation and attention control fail to develop in infancy and why Shows how distractibility is the psychological product of life experience Allows parents to understand what makes their ADD children tick and adults with ADD to gain insights into their emotions and behaviors Expresses optimism about neurological development even in adulthood Presents a program of how to promote this development in both children and adults Whereas other books on the subject describe the condition as inherited Dr Mat believes that our social and emotional environments play a key role in both the cause of and cure for this condition In Scattered Minds he describes the painful realities of ADD and its effect on children as well as on career and social paths in adults While acknowledging that genetics may indeed play a part in predisposing a person toward ADD Dr Mat moves beyond that to focus on the things we can control changes in environment family dynamics and parenting choices He draws heavily on his own experience with the disorder as both an ADD sufferer and the parent of diagnosed children Providing a thorough overview of ADD and its treatments without blaming anyone Scattered Minds is essential and life changing reading for the millions of ADD sufferers in North America today Living Consciousness G. William Barnard, 2012-04-01 Winner of the 2012 Godbey Authors Awards presented by the Godbey Lecture Series in Southern Methodist University's Dedman College of Humanities and Sciences Living Consciousness examines the brilliant but now largely ignored insights of French philosopher Henri Bergson 1859 1941 Presenting a detailed and accessible analysis of Bergson's thought G William Barnard highlights how Bergson's understanding of the nature of consciousness and in particular its relationship to the physical world remain strikingly relevant to numerous contemporary fields These range from quantum physics and process thought to philosophy of mind depth psychology transpersonal theory and religious studies Bergson's notion of consciousness as a ceaselessly dynamic inherently temporal substance of reality itself provides a vision that can function as a persuasive alternative to mechanistic and reductionistic understandings of consciousness and reality Throughout the work Barnard offers ruminations or neo Bergsonian responses to a series of vitally important questions such as What does it mean to live consciously authentically and attuned to our inner depths Is there a philosophically sophisticated way to claim that the survival of consciousness after physical death is not only possible but likely **Forget Memory** Anne Davis Basting, 2009-07-01 Memory loss can be one of the most terrifying aspects of a diagnosis of dementia Yet the fear and dread of losing our memory make the experience of the disease worse than it needs to be according to cultural critic and playwright Anne Davis Basting She says Forget memory Basting emphasizes the importance of activities that focus on the present to improve the lives of persons with Alzheimer's disease and other dementias Based on ten years of practice and research in the field Basting's study includes specific examples of innovative

programs that stimulate growth humor and emotional connection translates into accessible language a wide range of provocative academic works on memory and addresses how advances in medical research and clinical practice are already pushing radical changes in care for persons with dementia Bold optimistic and innovative Basting's cultural critique of dementia care offers a vision for how we can change the way we think about and care for people with memory loss
