Searching For World Security Understanding Global Armament And Disarmament Hb:

Searching for World Security Curt Walter Gasteyger,1985 **Toward Nuclear Disarmament And Global Security** Burns H Weston,2019-06-04 This text is designed to provide students and others with a theoretical and factual base for understanding the complex questions posed by continued reliance on nuclear weapons to protect geopolitical interests In Part One the authors examine the destructiveness and cost of modern nuclear arsenals and offer both normative and systemic explanations *International Books in Print* ,1997 **The World Today** ,1985 Environmental Change and Security Project Report ,1996 Compilation of Hearings Held Before the U.S.-China Security Review Commission U.S.-China Security Review Commission,2002 The Evolution of Cyber War Brian M. Mazanec,2015 Former secretary of defense Leon Panetta once described cyber warfare as the most serious threat in the twenty first century capable of destroying our entire infrastructure and crippling the nation Already major cyber attacks have affected countries around the world Estonia in 2007 Georgia in 2008 Iran in 2010 and most recently the United States As with other methods of war cyber technology can be used not only against military forces and facilities but also against civilian targets Information technology has enabled a new method of warfare that is proving extremely difficult to combat let alone defeat And yet cyber warfare is still in its infancy with innumerable possibilities and contingencies for how such conflicts may play out in the coming decades Brian M Mazanec examines the worldwide development of constraining norms for cyber war and predicts how those norms will unfold in the future Employing case studies of other emerging technology weapons chemical and biological strategic bombing and nuclear weaponry Mazanec expands previous understandings of norm evolution theory offering recommendations for U S policymakers and citizens alike as they grapple with the reality of cyber terrorism in our own backyard **Subject Guide to Books in Print** ,1997 **World Christian Trends Ad30-ad2200 (hb)** ,2001 Nigeria in the United Nations ,1975 **Official Congressional Directory** United States. Congress,1960 Strategic Disarmament, Verification and National Security Stockholm International Peace Research Institute,2020-12-01 Originally published in 1977 the purpose of this book was to analyse the relationship between the security of two states mutually undergoing strategic disarmament at the time and the need for safeguarding their security by means of a verification system The book thus studies some of the basic problems in the disarmament debate issues that had been the subject of great political controversy Previous studies had been mainly descriptive or historical lacking in objective political analysis and tending to political bias depending on the political school of the author There was thus some justification for the statement made by some outstanding authorities in the field that to date no systematic analysis has been attempted to determine what disarmament measures would optimally require of verification methods Our ambition is to respond to this criticism at least so far as the strategic context of disarmament is concerned Chapter 1 introduces us to the enormous range of repercussions caused by a disarmament agreement Chapter 2 examines the concept of verification analysing the meaning of the term

presenting various definitions of what verification is and attempting to systematize the concept It has been noted on many occasions that the verification set up in a disarmament treaty is only one of a number of factors working towards compliance with a treaty In fact the role of verification in presenting the treaty and therefore the security of its participants is to a large extent limited However without many other conditions being satisfied verification on its own can do little to preserve the treaty regime Chapter 3 discusses these conditions Chapter 4 gives a brief analysis of the concept of national interests in general and the concept of national security in particular Among all the elements of security it is military security that plays by far the largest role Because of this Chapter 5 considers a specific case of strategic military security in which security defined as stable strategic deterrence between two states is analysed Finally Chapter 6 analyses the question of what happens to security based on strategic deterrence when states enter into the disarmament process More specifically the role of verification in preserving security in such circumstances is analysed thereby answering the main problem of the book The supporting data for Chapter 6 is given in the Appendix

Postinternationalism and Small Arms Control Damien Rogers,2016-04-08 Even though impacts generated by the widespread availability and ongoing use of small arms and light weapons have not reached a magnitude sufficient to radically reorder contemporary world affairs awareness of the nature and extent of these impacts has compelled some international actors to take decisive action Damien Rogers examines how the international community has responded to the challenge of controlling small arms and light weapons since the early 1990s Using a postinternationalist analytic framework he specifically focuses on the maturing relationships between particular actors of world affairs and the nascent interconnectivity between their strategies for and approaches toward controlling these weapons Furthermore the book identifies ways in which the captains of small arms industry arms brokers and chief users of these weapons are able to mitigate resist or elude the intended effects of those responses
