Seasilver Inside British Columbias Salmonfarming Industry:

The Aquaculture Controversy in Canada Nathan Young, Ralph Matthews, 2011-01-01 Aquaculture the farming of aquatic organisms is one of the most promising but controversial new industries in Canada Advocates believe aquaculture has the potential to solve environmental and food supply problems resulting from global overfishing Critics argue that industrial scale aquaculture poses unacceptable threats to human health local communities and the environment The Aquaculture Controversy in Canada is not about methods of aquaculture but rather an exploration of why the practice has been the centre of intense debate in Canada Nathan Young and Ralph Matthews present the controversy as rooted in local and global conflicts over risk development rights and knowledge The inability of the industry to address the controversy s complexities they argue has only fuelled the debate Comprehensive and balanced this book will appeal to anyone who wants a deeper understanding of one of the most contentious public policy and environmental issues facing the world today *Sea-silver* Betty Keller, Rosella M. Leslie, 1996 *Environmental Risks of Genetically Engineered Fish* United States. Congress. Senate. Committee on Commerce, Science, and Transportation. Subcommittee on Oceans, Atmosphere, Fisheries, and Coast Guard, 2013 Salmon Farming Peter Andrew Robson, 2006 The first comprehensive agenda free book on the subject of BC s fish farming industry To date there has been little objective information on the topic and this book fills that void It includes history information and context that will equip experts lay readers and everyone in between with everything they need to know to develop an informed opinion about fish farms in BC Because of the polarised nature of the issue most information has been biased to a particular side The aquaculture industry and its government supporters say that fish farming makes good economic sense and is not an environmental threat Critics of the industry want salmon farming stopped they say it pollutes the ocean waters and is unsustainable that farmed fish will spread disease to wild fish and escaped fish will displace wild salmon Consumers and their questions have been lost in the middle of the controversy Is it safe to eat farmed salmon Does the industry harm the environment Will this practice threaten our wild fish stocks In this book Peter Robson explains the biology and the effects of salmon farming using a balanced approach supported by up to date information to shed an objective light on this important and contentious subject Steveston Cannery Row Mitsuo Yesaki, Harold Steves, Kathy Steves, 2005 *Coasts Under Stress* Rosemary Ommer, 2007 While coasts are often places of unsurpassed beauty many coastal communities suffer from poverty unemployment health risks and the effects of environmental degradation *Coasts Under Stress* is a unique inter disciplinary exploration of the complex interplay of economy culture environment and health in the coastal communities of eastern and western Canada Rosemary Ommer and her project team combine formal scientific natural and social and humanist analysis with an examination of the lived experience of coastal people They analyze community erosion created by economic decline and the ecosystem damage caused by unrelenting industrial pressure on natural resources and look at the history of coastal communities their resource bases their economies and the way the lives

of people are embedded in their environments Coasts Under Stress shows that many coastal people are determined to survive in the places they love and stresses the need for investment to encourage the recovery of coastal communities
