who was first to Chicago and who won the Great Cowboy Race **The Body in the Anglosphere, 1880-1920** Robert W. The Disaster Experts Scott Gabriel

Knowles, 2012-07-02 In the wake of 9/11 and Hurricane Katrina many are asking what if anything can be done to prevent large scale disasters How is it that we know more about the hazards of modern American life than ever before yet the nation faces ever increasing losses from such events History shows that disasters are not simply random acts Where is the logic in creating an elaborate set of fire codes for buildings and then allowing structures like the Twin Towers tall impressive and risky to go up as design experiments Why prepare for terrorist attacks above all else when floods fires and earthquakes pose far more consistent threats to American life and prosperity *The Disaster Experts* takes on these questions offering historical context for understanding who the experts are that influence these decisions how they became powerful and why they are only slightly closer today than a decade ago to protecting the public from disasters Tracing the intertwined development of disaster expertise public policy and urbanization over the past century historian Scott Gabriel Knowles tells the fascinating story of how this diverse collection of professionals insurance inspectors engineers scientists journalists public officials civil defense planners and emergency managers emerged as the authorities on risk and disaster and in the process shaped modern America

Critical Theories, Radical Pedagogies, and Social Education, 2010-01-01 A refreshing collection of essays that offers a range of critical and radical voices which are generally marginalized in the critical social studies mainstream This collection is a good read with valuable insights that can impact teaching practice Canadian Social Studies Canada's National Social Studies Journal Volume 45 Issue 1 Award American Educational Studies Association AERA Critics Choice Book Award 2011 This edited collection begins with the assertion that there are emergent and provocative theories and practices that should be part of the discourse on social studies education in the 21st century Anarchist eco activist anti capitalist and other radical perspectives such as disability studies and critical race theory are explored as viable alternatives in responding to current neo conservative and neo liberal educational policies shaping social studies curriculum and teaching Despite the interdisciplinary nature the field and a historical commitment to investigating fundamental social issues such as democracy human rights and social justice social studies theory and practice tends to be steeped in a reproductive framework celebrating and sustaining the status quo encouraging passive acceptance of current social realities and historical

constructions rather than a critical examination of alternatives These tendencies have been reinforced by education policies such as No Child Left Behind which have narrowly defined ways of knowing as rooted in empirical science and apolitical forms of comprehension This book comes at a pivotal moment for radical teaching and for critical pedagogy bringing the radical debate occurring in social sciences and in activist circles where global protests have demonstrated the success that radical actions can have in resisting rigid state hierarchies and oppressive regimes worldwide to social studies education

Contesting the Past, Reconstructing the Nation Ben Railton, 2007-09-30 In this study of Gilded Age literature and culture Ben Railton proposes that in the years after Reconstruction America's identity was often connected through distinct and competing conceptions of the nation's history Concerned with key social questions such as race Native Americans women and the South *Contesting the Past Reconstructing the Nation* provided close readings of a number of texts for the ways they highlight these issues This book examines established classics newer additions to the canon largely forgotten best sellers recovery gems and autobiographical works by Douglass and Truth poems by Harper and Piatt and short stories by Woolson and Cooke These readings contribute to ongoing conversations over historical literature's definition and value and a greater understanding of not only American society in the Gilded Age but also debates on our shared but contested history that remain very much alive in the present From publisher's description *Earth Into Property* Tony Hall, 2010 A broad exploration of the colonial roots of global capitalism and the worldwide quest of Indigenous people for liberation through decolonization

Mystery and Marvel John Henry Hepp, 2024-11-30 First book on the Centennial in nearly four decades offering a new insight into this seminal event The Centennial was America's first world's fair taking place only twenty five years after the first international exposition in London The exhibition was a paean to progress by people fascinated by science and technology The organizers largely leading Pennsylvania industrialists and merchants wanted to show the world that the United States was as advanced as any nation in Europe and for the most part their plan succeeded Everyday Americans attended the fair to be reassured of their nation's economic and technological past present and future

Mystery and Marvel looks at the 1876 Centennial Exposition through the eyes of the ten million visitors to the fair to help us understand the technological enthusiasm of middle class Victorians. Although this enthusiasm was not unbounded and was occasionally tinged with a combination of nostalgia and uncertainty, overall the women and men of the late nineteenth century were usually happy to be part of a world they thought was as modern and as cutting edge as the one we live in today. In and around the buildings that appeared in the city's Fairmount Park that spring and summer were the physical embodiments of this culture. The sights, the sounds, and even the smells of the exhibition presaged the coming of a modern America. In 1876 Philadelphia was the nation's largest manufacturing city and Pennsylvania one of the most important industrial states. The exposition can serve as a wonderful lens to examine America's shift from the young agricultural republic of 1800 to the industrial empire of 1900.
