

Seasons Of The Cranes

Rachel Sandford

Seasons Of The Cranes:

Seasons of the Tallgrass Prairie Paul A. Johnsgard, 2014-12-01 A respected author and scholar Paul A Johnsgard has spent a lifetime observing the natural delights of Nebraska's woodlands grasslands and wetlands Seasons of the Tallgrass Prairie collects his musings on Nebraska's natural history and the issues of conservation facing our future Johnsgard crafts essays featuring snow geese owls hummingbirds and other creatures against the backdrop of Great Plains landscapes He describes prairie chickens courting during predawn hours and the calls of sandhill cranes he evokes the magic of lying upon the prairie hearing only the sounds of insects and the wind through the grasses From reflections following a visit to a Pawnee sacred site to meditations on the perils facing the state's finite natural resources Seasons of the Tallgrass Prairie celebrates the gifts of a half century spent roaming Nebraska's back roads trails and sometimes forgotten places *The Cranes* Curt Meine, George Archibald, 1996 The Cranes are among the most ancient and distinctive families of birds on Earth yet they are among the world's most threatened groups of birds This Action Plan describes the many different sorts of threats facing cranes especially as they migrate through different countries and the many solutions that have been attempted to overcome them It is intended for all those involved in crane conservation including conservation biologists conservation organizations other non governmental organizations inter national development agencies political civic and business leaders funding agencies and foundations educators and members of the general public **Sandhill Crane Study in the Central Flyway**

Raymond J. Buller, 1967 Fall migrating sandhill cranes arrived at congregation sites in southern Canada and in the States of the Central Flyway between late July and early October Sandhills peaked at about 100 000 birds at way stations during the fall of 1964 Footprint measurements indicated that the lesser sandhill was by far the most numerous subspecies at way stations in Montana North Dakota South Dakota and Colorado These measurements also indicated that flocks stopping over in Wyoming Kansas and Oklahoma contained a significant number of Canadian sandhill or greater sandhill or both A selective collecting program indicated that the footprint measurement technique overemphasized the incidence of the greater sandhill at way stations in North Dakota and South Dakota Whooping cranes and sandhills were occasionally observed together during the early part of the fall migration At times fall migrating sandhills fed on standing and harvested grain crops in Canada and the States of the Central Flyway but seldom were depredations considered serious *Management of Migratory Shore and Upland Game Birds in North America* Glen C. Sanderson, 1977 **Final Environmental Statement for the**
