Philosophy of Song and Singing Jeanette Bicknell,2015-07-03 In Philosophy of Song and Singing An Introduction Jeanette Bicknell explores key aesthetic ethical and other philosophical questions that have not yet been thoroughly researched by philosophers musicologists or scientists Issues addressed include The relationship between the meaning of a song s words and its music The performer s role and the ensuing gender complications social ontology and personal identity The performer s ethical obligations to audiences composers lyricists and those for whom the material holds particular significance The metaphysical status of isolated solo performances compared to the continuous singing of opera or the interrupted singing of stage and screen musicals Each chapter focuses on one major musical example and includes several shorter discussions of other selections All have been chosen for their illustrative power and their accessibility for any interested reader and are readily available **All Music Guide** Vladimir Bogdanov,Chris Woodstra,Stephen Thomas Erlewine,2001-11 Arranged in sixteen musical categories provides entries for twenty thousand releases from four thousand artists and includes a history of each musical genre **The Singer-Songwriter in Europe** Isabelle Marc,Stuart Green,2016-03-22 The Singer Songwriter in Europe is the first book to explore and compare the multifaceted discourses and practices of this figure within and across linguistic spaces in Europe and in dialogue with spaces beyond continental borders The concept of the singer songwriter is significant and much debated for a variety of reasons Many such musicians possess large and zealous followings their output often esteemed politically and usually held up as the nearest popular music gets to high art such facets often yielding sizeable economic benefits Yet this figure per se has been the object of scant critical discussion with individual practitioners celebrated for their isolated achievements instead In response to this lack of critical knowledge this volume identifies and interrogates the musical linguistic social and ideological elements that configure the

singer songwriter and its various equivalents in Europe such as the French auteur compositeur interpr te and the Italian cantautore since the late 1940s Particular attention is paid to the emergence of this figure in the post war period how and why its contours have changed over time and space subsequently cross cultural influences and the transformative agency of this figure as regards party and identity politics in lyrics and music often by means of individual case studies The book s polycentric approach endeavours to redress the hitherto Anglophone bias in scholarship on the singer songwriter in the English speaking world drawing on the knowledge of scholars from across Europe and from a variety of academic disciplines including modern language studies musicology sociology literary studies and history
