Physical Education Technology Playbook Darla M.

Castelli, Leah Fiorentino, 2008 It is widely accepted that the increasing use of technology such as TV and computers has led to a reduction in physical activity. But in *Physical Education Technology Playbook* authors Darla Castelli and Leah Holland Fiorentino show you how to use technology to increase physical activity and enhance learning about health and fitness. This book comes with detailed instructions and examples so you can easily incorporate the described technologies into your teaching. From cover

Handbook of Mobile Systems Applications and Services Anup Kumar, Bin Xie, 2012-04-26 From fundamental concepts and theories to implementation protocols and cutting edge applications the *Handbook of Mobile Systems Applications and Services* supplies a complete examination of the evolution of mobile services technologies. It examines service oriented architecture SOA and explains why SOA and service oriented computing SOC will play key roles in the development of future mobile services. Investigating current service discovery frameworks the book covers the basics of mobile services and applications developed in various contexts. The first section provides readers with the required background in mobile services architecture. Next it details of middleware support for mobile services. The final section discusses security and applications of mobile services. Containing the contributions of leading researchers and academics from around the world the book introduces a new location based access control model. Unveils a simple yet powerful enhancement that enables Web services to locally manage workflow dependencies and handle messages resulting from multiple workflows. Examines an event based location aware query model that continuously aggregates data in specific areas around mobile sensors of interest. Addresses the problem of location based access control in the context of privacy protection. Presents a layered architecture of context aware middleware. Considers the development of assistive technology solutions for the blind or visually impaired. Discussing architecture for supporting multi mode terminals in integrated heterogeneous wireless networks this book addresses the network availability constraint to serve all mobile services originating from a single user terminal. It examines QoS protocols and their enhancements in supporting user mobility. Analyzing mobile services security vulnerabilities it details security design best practices that mobile service developers can use to improve the security of their mobile systems.

Designing Ubiquitous Information Environments: Socio-Technical Issues and Challenges Carsten Sørensen, Youngjin Yoo, Kalle Lyytinen, Janice I. DeGross, 2006-01-17 This book records one of the continuous attempts of the IFIP Working Group 8.2 studying the interaction of information systems and the organization to explore and understand the shifting boundaries and dependencies between organizational activities and their computer support The book marks the result of the IFIP WG 8.2 conference on Designing Ubiquitous Information Environments Socio Technical Issues and Challenges Since its inception in the late 1970s IFIP WG 8.2 has sought to understand how computer based information systems interact and must be designed as an integrated part of the organizational design At that time information systems handled repetitive and remote back office functions and the main concern was work task design for repetitive input tasks and the potential impact of improved information support on organizational decision making and structure The focus of the information system design shifted in the 1980s when computers became part of the furniture and moved into the office

Reflecting this significant change IFIP WG 8.2 in 1989 organized a conference dedicated to the design and impact of desktop technology in order to examine how organizational processes and the locus of action changed when the computer was moved into the office. Sixteen years later we are experiencing another significant change. Computers are now becoming part of our body and sensory system and will move out of the traditional office locations and into the wilderness. Again IFIP WG 8
