**of Russia's Special Forces** Mark Galeotti, 2020-05-28 An illustrated study of both the combat vehicles of Russia's legendary Spetsnaz special forces and the whole range of unique and modified vehicles that Russia's elite units use from combat snowmobiles to the world's biggest water cannon. Elite forces need elite vehicles. As Vladimir Putin has devoted effort and funds into modernising Russia's armed forces and turning them into an instrument geared not just for defending the Motherland but also projecting power beyond its borders, Russia has seen a growing emphasis on special and specialist forces. Traditionally the elite Spetsnaz commandos had to make do with regular vehicles or civilian-based technicals not least to conceal their presence or indeed very existence. Now increasingly at the forefront of Russian power projection the Spetsnaz are acquiring more capable versatile vehicles such as the paratroopers BTR-D personnel carrier and also experimenting with exotic specialist new acquisitions such as the Chaborz M-3 buggy and Yamaha Grizzly all-terrain vehicle. The other elite branches of Russia's forces such as the Arctic warfare troops of the 200th Independent Motor Rifle Brigade the paratroopers of the Air Assault Troops VDV the Naval Infantry and the elite units of the security forces are also developing and fielding new vehicles for their specialist roles from combat snowmobiles to urban warfare vehicles. From highly mobile LMVs able to operate in the deserts of Syria or the streets of Ukraine through dedicated fire support vehicles such as the air-droppable Sprut-SD or the massive BMPT Terminator to amphibious tanks and drone-equipped security trucks these are the workhorses of Russia's special forces. This study explores all these combat vehicles in detail combining expert analysis from Russia expert Mark Galeotti with highly accurate full-colour illustrations and photographs.

**The Russian S-300 and S-400 Missile Systems** Steven J. Zaloga, 2023-02-16 An expert account of the development, role and capabilities of the S-300 and S-400 air defence missile systems, key strategic weapons in Putin's Russia. Few modern missile systems have had such significance as the S-300 family. Highly regarded technically, Russia's most powerful air defence systems have been a major strategic asset to the country, exported to major powers around the world and are a key weapon in many international hotspots and in recent wars. In this book, professional missile systems analyst Steve Zaloga uses his specialist knowledge to assess and analyse them in detail. He explains that the S-300 is in fact three systems: the S-300P designed as a replacement for older Soviet strategic SAM systems, the S-300V developed to defend against Pershing ballistic missiles and the S-300F designed for ship defence. He also considers the supplementary S-350 system and the new generation S-400 system deployed in Syria and sold to both China and Turkey. An assessment of the latest S-500 system designed to counter ballistic missiles and hypersonic cruise missiles is also provided. Packed with detailed colour artwork and new photos, this book explains the considerable evolution of the S-300 family, perhaps the world's most famous strategic SAM over the last three decades.

*Neither Foe Nor Friend* Katrin Ullmann, 2005 For almost half a century the Iron Curtain had separated Americans and Russians by barriers of misunderstanding, suspicion and alienation. The accession of Mikhail Gorbachev to power in the mid-1980s signalled the beginning of a revolutionary stage in American-Soviet relations. In the course of the following two decades, Americans and

Russians would interact to an extent never anticipated and come to call each other partners or even friends The word friendship however is often used superficially This book provides a more profound answer to the question of how from the American perspective the image of and the relationship to Russia have changed since the former adversary opened its doors to the West Ullmann not only reveals how the American public's attitudes toward Russia or the scope of people to people contacts have changed she also analyses to what extent Americans have been able to learn about Russia in the mass media and to what extent they have been interested in studying Russian culture and language **Commerce Business Daily**,2001-06 Russian Security and Paramilitary Forces since 1991 Mark Galeotti,2013-08-20 While the size of Russia's regular forces has shrunk recently its security and paramilitary elements have become increasingly powerful Under the Putin regime they have proliferated and importantly seem set to remain Russia's most active armed agencies for the immediate future In parallel within the murky world where government and private interests intersect a number of paramilitary private armies operate almost as vigilantes with government toleration or approval This book offers a succinct overview of the official semi official and unofficial agencies that pursue Russian government and quasi government objectives by armed means from the 200 000 strong Interior Troops through Police and other independent departmental forces down to private security firms Featuring rare photographs and detailed colour plates of uniforms insignia and equipment this study by a renowned authority explores the Putin regime's shadowy special forces apparatus active in an array of counter terrorist and counter mafia wars since 1991 **Russian Battleships and Cruisers of the Russo-Japanese War** Mark Lardas,2019-10-31 This book examines the major warships of the Imperial Russian Navy which participated in the Russo Japanese War The focus is on the battleships coastal defence warships and cruisers of the Pacific Squadron and Baltic Squadron that fought during the war It discusses in detail their design and development between the years of 1885 and 1905 concentrating particularly on battleships and cruisers The book explores in depth the mutually influential relationship between Russian and foreign warship design as Russia progressed from a reliance on foreign designs and shipyards towards an ability to produce its own influential ships such as the Novik The title also outlines the gripping operational history of the Russian warships which participated in the Russo Japanese war tracing their activity before and during the combat as well as the post war fate of those ships which were bombarded scuttled captured or salvaged Packed with contemporary photography and full colour illustrations this title offers a detailed and definitive guide to the design development and destiny of the Russian warships which battled the Japanese in the Eastern seas Soviet Pistols Leroy Thompson,2022-10-27 This is the absorbing story of the development combat use and legacy of the influential sidearms used by the armed forces of the Soviet Union Featuring archive and present day photography and specially commissioned artwork this is the story of the pistols that armed the forces of the Soviet Union and its allies during and after World War II In 1930 the TT a single action semi automatic pistol developed by Fedor Vasilyevich Tokarev and firing 7.62 25mm ammunition began to supplement the

venerable Nagant M1895 revolver in Soviet military service From 1933 the TT 33 a simplified version was also issued all three would equip Soviet and proxy forces throughout and after World War II seeing action across the globe In 1951 a new pistol designed by Nikolay Fyodorovich Makarov entered Soviet service it became the primary Soviet military and police sidearm during the Cold War era and continued in use into the 21st century The 9 18mm Makarov round was used in various weapons used by Soviet allies notably the Czech vz 82 the Hungarian F G PA63 and the Polish P64 and P83 The PM was quickly joined by the Stechkin machine pistol Other specialized versions of the Makarov were developed including the PB suppressed version and the 5 45 18mm PSM a more compact version Initially developed in 1990 the improved PMM version of the Makarov was intended primarily to increase the stopping power of the 9 18mm round by chambering a higher pressure load In this study noted weaponry expert Leroy Thompson tells the story of the Tokarev Makarov Stechkin and other handguns in service with Soviet and other forces around the world exploring the development combat use and legacy of these formidable firearms

Russia's Five-Day War Mark Galeotti, 2023-03-16 A fascinating account of Russia's Five Day War against Georgia in 2008 notable for its strategic mistakes which prompted President Putin to undertake major military reforms After Georgia's independence from

Russia in 1991 President Saakashvili invited NATO advisers to assist in military reforms Separatist groups in Georgia's border provinces rebelled which led to fighting in South Ossetia during August 2008 The Russian Army invaded Georgia alongside these forces stripped it of these rebellious provinces and garrisoned them to maintain a threat over Georgia But despite the inevitable outcome of this hugely unbalanced conflict it revealed serious Russian military weaknesses and incompetence and the NATO trained and partly Western equipped Georgian Army put up a much more successful local resistance than Russia had expected The conflict also demonstrated the first use of Russian cyber warfare and its so called hybrid warfare doctrine Author Mark Galeotti is an expert in the field of international relations and a former Foreign Office adviser on Russian security affairs In this book he provides a vivid snapshot of the Russian Georgian Abkhazian and South Ossetian forces and gives an in depth analysis of the conflict Using meticulous color artwork for uniforms insignia and equipment rare photographs and detailed fact boxes for significant units and individuals this book is a compelling guide to Russia's Five Day War in Georgia      National Institutes of Health Annual Report of International Activities John E.
