*Ethics and Human Rights in a Globalized World* Klaus Hoffmann-Holland, 2009 In a globalized world an interdisciplinary dialogue on ethics and human rights is possible necessary and fruitful for jurisprudence Human rights can be understood as formalized ethics and ethics can thus serve as a foundation for human rights They are the framework for a communication of rights and this communication is the context in which wrongs can be transformed into rights Ethics do however also shape existing recognized human rights Human rights are ethics in action The enforcement of human rights especially in international criminal law as well as the implementation structures bring the ideas and principles of rights to life in a

globalized world Thus it is advisable to take an interdisciplinary approach to participation rights social rights and human rights in general in private and in public life This work contains articles that were presented at an international and interdisciplinary conference on Ethics and Human Rights in a Globalized World in Jerusalem in the fall of 2008 Young researchers from Israel and Germany who work in the fields of law philosophy political science and theology deal with the foundation of human rights the conflict between varying human rights and effective implementation structures The part played by the World Bank in implementing human rights is highlighted as is the significance of local cultural backgrounds Other articles deal with the correlation of international criminal law and human rights The book also contains an article by Aharon Barak former Chief Justice of the Israel Supreme Court *Governing Regional Integration for Development* Antoni Estevadeordal, 2016-04-22 Developing countries have joined the rapidly growing global system of regional trade agreements RTAs over the past years The drive towards regional integration has advanced with the formation of new markets and groups in Latin America Africa Asia the Middle East and Oceania with few developing countries remaining outside these regional schemes This volume looks at how getting governance right is a central element for successful RTA implementation taking stock of the quality and effectiveness of the monitoring of development country RTAs around the world Organized by the main world regions and primarily focusing on developing country RTAs the book also includes two case studies focused on monitoring in developed country regional agreements by way of comparison The contributors operationalize governance in the context of RTA implementation with a more narrow and technical term of monitoring and provide eight important lessons for assessing monitoring around the world **The Book Review** ,2005 **Peace Watch** ,2001-08 **Handbook of Regional Conflict Resolution Initiatives in the Global South** Jeronimo Delgado-Caicedo, 2022-07-28 During the first half of the twentieth century the international system was largely dominated by the USA and the colonial powers of western Europe After the two world wars the political and economic dominance of these states guaranteed them and their allies an almost complete control of world politics However as it is the norm in the international system power structures are not immutable After the end of the Cold War rapid changes to the existing international hierarchies took place as new countries from the so called developing world began to emerge as crucial actors capable of questioning and altering the power dynamics of the world It is therefore unthinkable to ignore emerging countries such as Russia the People s Republic of China India Brazil or South Africa in the decision making process in today s world order In addition there is a group of smaller yet increasingly important countries that while acknowledging their inability radically to change the rules of the international system are still eager to shift power relations and enhance their influence in the world Argentina Colombia Egypt Indonesia Iran South Korea Mexico Nigeria Pakistan Saudi Arabia Turkey and Vietnam are generally recognised as part of this grouping of emerging powers from the Global South While there is a consensus amongst academics that emerging powers from the Global South must have a stabilising role within their own regions previous analyses have focused primarily on the

impact that emerging powers have had in their own regions conflict resolution initiatives This volume instead aims to go beyond these analyses and provide new insights regarding the effect that this stabilising role has on the continental and global positioning of emerging powers In other words this book explores the relation between a country s involvement in conflict resolution initiatives and its positioning in the international system The volume will contribute to this approach using the perspective of academics and practitioners from countries of the Global South particularly from states that have strengthened or sometimes weakened their position in the international hierarchy of power through a leading role in regional conflict resolution initiatives
