Peacekeeping And The United Nations Issues In International Security Series:

The UN Secretary-General and the Security Council Manuel Fröhlich, Abiodun Williams, 2018 The United Nations Secretary General and the United Nations Security Council spend significant amounts of time on their relationship with each other They rely on each other for such important activities as peacekeeping international mediation and the formulation and application of normative standards in defense of international peace and security in other words the executive aspects of the UN's work The UN Secretary General and the Security Council fills an important lacuna in the scholarship on the UN system Although there exists today an impressive body of literature on the development and significance of the Secretariat and the Security Council as separate organs an important gap remains in our understanding of the interactions between them Bringing together some of the most prominent authorities on the subject this volume is the first book length treatment of this topic It studies the UN from an innovative angle creating new insights on the autonomous policy making of international organizations and adds to our understanding of the dynamics of intra organizational relationships Within the book the contributors examine how each Secretary General interacted with the Security Council touching upon such issues as the role of personality the formal and informal infrastructure of the relationship the selection and appointment processes as well as the Secretary General's threefold role as a crisis manager administrative manager and manager of ideas Peacekeeping and the United Nations Stephen M. Hill, Shahin P. Malik, 1996 **UN Antiterrorism Strategy, Resolutions and Programs Handbook Volume 1 Strategic Information and Materials** IBP USA, **Private Armed Forces and Global Security** Juan Carlos Ortiz, 2010-03-11 Through an array of theoretical approaches and empirical material this comprehensive and accessible volume surveys private armed forces and directly challenges conventional stereotypes of security contractors Private Armed Forces and Global Security A Guide to the Issues is the first book to provide a comprehensive yet accessible survey of the private military groups involved in conflicts worldwide Organized around four themes it covers the history of private military forces since 1600 the main contemporary actors and their defining characteristics the environments in which private armed forces operate and provides an analysis of the logic behind privatizing security This book goes beyond conventional knowledge offering both a theoretical approach and a new practical perspective to advance the understanding of the ongoing climate of global instability and relevant players within it Numerous examples help the reader grasp the full range of real world challenges and conceptual facets surrounding this fascinating yet highly polarizing topic Towards a Theory of United Nations Peacekeeping A.B. Fetherston, 1994-12-13 At a time when peacekeepers are struggling to fulfil increasingly demanding mandates and UN peacekeeping is in danger of losing the distinct character that won it the 1988 Nobel Peace Prize this important book argues for a clear theoretical redefinition within a conflict resolution framework and examines the practical implications for training This is a valuable and original contribution to the peacekeeping literature Dr Oliver Ramsbotham Department of Peace Studies University of Bradford Both for the blue helmets on the ground and for the

diplomats at UN headquarters conflict resolution skills are essential for conducting peacekeeping operations Betts Fetherstone's excellent study points the way forward to a synthesis between conflict management and peacekeeping Hugh Miall Research Fellow European Programme Royal Institute of International Affairs The prevailing over taxed ad hoc system of peacekeeping does not meet the growing demands posed by the post Cold War world This volume argues that peacekeeping needs to be placed on firm conceptual footing directly congruent with its peaceful third party role The implications of this conceptualisation of peacekeeping for practice are then discussed Training is cited as a key means of translating conceptual understanding into practice Without this foundation work UN has little chance of changing its existing and largely ineffective system of conflict management At a time when peacekeepers are struggling to fulfil increasingly demanding mandates and UN peacekeeping is in danger of losing the distinct character that won it the 1988 Nobel Peace Prize this important book argues for a clear theoretical redefinition within a conflict resolution framework and examines the practical implications for training This is a valuable and original contribution to the peacekeeping literature **The "Third" United Nations** Tatiana Carayannis, Thomas G. Weiss, 2021-02-04 The Third UN is the ecology of supportive non state actors intellectuals scholars consultants think tanks NGOs the for profit private sector and the media that interacts with the intergovernmental machinery of the First UN member states and the Second UN staff members of international secretariats to formulate and refine ideas and decision making at key junctures in policy processes Some advocate for particular ideas others help analyze or operationalize their testing and implementation many thus help the UN think While think tanks knowledge brokers and epistemic communities are phenomena that have entered both the academic and policy lexicons their intellectual role remains marginal to analyses of such intergovernmental organizations as the United Nations

Understanding Emerging Security Challenges Ashok Swain, 2013 This book offers an overview of emerging security challenges in the global environment in the post Cold War era After the fall of the Berlin Wall and the subsequent shifting of international political environment a new broader concept of security began to gain acceptance This concept encompassed socio economic environmental challenges such as resource scarcity and climate change water sharing issues deforestation and forest protection measures food and health security and large population migration The book examines the causes and consequences of these emerging security threats and retains a critical focus on evolving approaches to address these issues The author attempts to develop a framework for sustainable security in a rapidly changing global political landscape which seeks to bring states and societies together in a way that addresses weaknesses of the evolving international system Moreover through a detailed analysis of the emerging security issues and their pathways the book further argues that the evolving processes not only pose critical challenges but also provide remarkable opportunity for cooperation and collaboration among and within various stakeholders This book will be of much interest to students of global security war and conflict studies peace studies and IR in general The EU, the UN and Collective Security Joachim Krause, Natalino

Ronzitti,2012 This book examines the effectiveness of multilateralism in ensuring collective security and in particular the EU's role in this process In 1992 shortly after the end of the Cold War a Security Council Summit in New York reaffirmed the salience of the system of collective security and stated the determination of the Heads of State to maintain it as the prime international instrument for preserving peace Twenty years later however the record of collective security as well as of multilateralism has not been very encouraging The system of collective security as enshrined in the United Nations UN Charter failed repeatedly to accomplish its mandate in the 1990s and has led to controversial debates in the United States and Europe that reached a climax during the Iraq crisis in 2002 03 The volume draws upon both theoretical and empirical research to answer the following core questions What are the reasons that have made multilateralism either effective or ineffective in the field of peacekeeping peace preservation and peacebuilding How can multilateralism be made more effective How can attempts made by Europe to render UN multilateralism in the security area more efficient be assessed This book will be of much interest to students of peacebuilding peacekeeping EU policy the UN security studies and IR in general

Africa: Facing Human Security Challenges in the 21st Century Mentan, Tatah, 2014-05-12 Africa's dynamic security environment is characterized by great diversity from conventional challenges such as insurgencies, resource and identity conflicts and post-conflict stabilization to growing threats from piracy, narcotics trafficking, violent extremism and organized crime taking root in urban slums among others. This precarious environment jeopardizes security at the societal, community and individual levels. In a globalized and interconnected world, millions of people worldwide are affected by some form of human insecurity. Infectious and parasitic diseases annually kill millions. Internally displaced persons number millions, including 5 million in Sudan alone. In Zambia, 1 million people in a population of 11 million are reported to be HIV positive, a situation much worse in other countries. Potable water crisis looms almost everywhere. In this book, Tatah Mentan points out the need to shift the focus away from a state-centric and military strategic emphasis on security to an interdisciplinary and people-centric approach that embraces notions like global citizenship, empowerment and participation. The primary elements of economic, food, health, environment, personal, community and political security all comprise the broader understanding of human security in an intricately interconnected world.

Knight, 2000-10-19 The United Nations is at a critical juncture It is faced with two distinct choices to remain a decision frozen in time or to develop a long term adaptation agenda and strategy that would allow it to be a relevant institution of global governance for the twenty first century Reform and reflexive institutional adjustments have failed to address underlying problems facing this organization After fifty five years of existence it is still considered an inefficient and ineffective world body Worse yet its relevance is being questioned This study offers a critique of existing UN change processes and then shifts focus to considerations of institutional learning strategies that would allow the UN to maintain relevance amidst the evolution of global governance arrangements
