The Laissez-Faire Peasant Jovana Diković, 2025-01-14 In rural development studies there are two mainstream assumptions One holds that peasants are the victims of state rural development schemes the other that only planning can ensure change and prosperity in rural regions It is rarely considered that peasants are architects of their own and local wellbeing notions which are often in opposition to state plans for agriculture *The Laissez Faire Peasant* explores how rural development emerges on the ground The concept involves the manifestation of peasant worldviews in which autonomy in decision making freedom of action spontaneity and flexibility in everyday cooperation play a dominant role A role in which individual and local values generate a self regulating system that manages a range of economic social and political relationships The book examines manifestations of peasant autonomy both in response to and independent of state rural development policies through a multi sited ethnography of three Serbian villages It is shown how these factors impede state programs for rural development while enabling the spontaneous flourishing of local communities By focusing on the agency of rural residents the book finds that peasants are resilient and competent agents who do not need government plans to thrive Praise for *The Laissez Faire Peasant* Anthropologists and missionaries claim to love their peasants Economists and planners claim to help them Both look down Diković brilliantly proposes a new approach which might be called humanomics It gives respect looking up from where people actually live Deirdre Nansen McCloskey University of Illinois at Chicago This is an ethnographically rich and conceptually original study of post socialist peasantry and rural development in Serbia Jovana Diković draws a complex picture of the post socialist peasants as autonomous and resilient subjects motivated

by the visions of rural development anchored in their local lifeworlds Agnieszka Joniak L thi University of Fribourg In her excellent study Jovana Dikovi challenges the narrative about Serbian peasants usually viewed as downtrodden and exploited underdogs in need of governmental help In this careful case study these peasants represent an entrepreneurial self reliant and individualistic social group that can survive and thrive even in the conditions of modern and technologically advanced capitalism Ivan Jankovi Institut auf dem Rosenberg

Koster, 1994-05-01 A Baluch tribesman follows his goats as they search for a bit of vegetation a Turkana youth guards his father's cattle against theft by raiders These pastoral inhabitants of mountain and desert waste are considered to be among the most geographically economically and politically peripheral of peoples yet they are not entirely isolated from broader sociopolitical and economic forces The lives of modern pastoralists are greatly affected by the policies of nations and the demands of world markets They may face military control forced settlement stock reduction programs or even efforts at development by governments claiming sovereignty over the lands they roam The authors of this collection of essays examine the impact of capitalism on nineteenth and early twentieth century pastoralists and discuss the historical transformations that have occurred in the lives and societies of herding peoples around the world They argue that pastoralists were not simply passive recipients of change imposed by capitalist polities and that historical and economic factors impinging on their societies were as important as ecological ones Collectively these papers demonstrate that twentieth century pastoralists and their nineteenth century predecessors should not be seen as immutably locked in a pastoral mode of production but rather as actively negotiating encounters between themselves and the expanding power of capitalist states
