Peasant Life In The Medieval West:

Peasant Life in the Medieval West Robert Fossier, 1988 This is a history of peasant society in Europe from around 900 to the mid fourteenth century Robert Fossier one of Europe's leading historians of the subject provides a vivid and detailed picture of the daily life of the peasants discussing for example the food they cultivated and ate the houses and villages in which they lived their taboos and customs In particular he considers the peasants relationship to the rural landscape which they grazed and tilled and to their lords who controlled the land He describes the critical role women played in the medieval economy and society Professor Fossier focuses on the peasant as an individual within the rural community exploring changes in their legal and economic status family relationships and structures and inheritance customs

Women and Wealth in Late Medieval Europe T. Earenfight, 2010-03-15 The twelve essays in *Women and Wealth in Late Medieval Europe* re-examine the vexing issue of women money wealth and power from distinctive perspectives literature history architectural history using new archival sources The contributors examine how money and changing attitudes toward wealth affected power relations between women and men of all ranks especially the patriarchal social forces that constrained the range of women's economic choices Employing theories on gender culture and power this volume reveals wealth as both the motive force in gender relations and a precise indicator of other more subtle forms of power and influence mediated by gender

Rural Space in the Middle Ages and Early Modern Age Albrecht Classen, 2012-05-29 Older research on the premodern world limited its focus on the Church the court and more recently on urban space The present volume invites readers to consider the meaning of rural space both in light of ecocritical readings and social historical approaches While previous scholars examined the figure of the peasant in the premodern world the current volume combines a large number of specialized studies that investigate how the natural environment and the appearance of members of the rural population interacted with the world of the court and of the city The experience in rural space was important already for writers and artists in the premodern era as the large variety of scholarly approaches indicates The present volume signals how much the surprisingly close interaction between members of the aristocratic and of the peasant class determined many literary and art historical works In a surprisingly large number of cases we can even discover elements of utopia hidden in rural space We also observe how much the rural world was a significant element already in early medieval mentality Moreover as many authors point out the impact of natural forces on premodern society was tremendous if not catastrophic

Women in Medieval Europe 1200-1500 Jennifer Ward, 2016-04-14 *Women in Medieval Europe* explores the key areas of female experience in the later medieval period from peasant women to Queens It considers the women of the later Middle Ages in the context of their social relationships during a time of changing opportunities and activities so that by 1500 the world of work was becoming increasingly restricted to women The chapters are arranged thematically to show the varied roles and lives of women in and

out of the home covering topics such as marriage religion family and work For the second edition a new chapter draws together recent work on Jewish and Muslim women as well as those from other ethnic groups showing the wide ranging experiences of women from different backgrounds Particular attention is paid to women at work in the towns and specifically urban topics such as trade crafts healthcare and prostitution The latest research on women gender and masculinity has also been incorporated along with updated further reading recommendations This fully revised new edition is a comprehensive yet accessible introduction to the topic perfect for all those studying women in Europe in the later Middle Ages

Women in Medieval Europe Jennifer Ward, 2014-06-11 Women in Medieval Europe were expected to be submissive but such a broad picture ignores great areas of female experience Between the thirteenth and fifteenth centuries women are found in the workplace as well as the home and some women were numbered among the key rulers saints and mystics of the medieval world Opportunities and activities changed over time and by 1500 the world of work was becoming increasingly restricted for women Women of all social groups were primarily engaged with their families looking after husband and children and running the household Patterns of work varied geographically In the northern towns women engaged in a wide range of crafts with a small number becoming entrepreneurs Many of the poor made a living as servants and labourers Prostitution flourished in many medieval towns Some women turned to the religious life and here opportunities burgeoned in the thirteenth century The Middle Ages are not remote from the twenty first century the lives of medieval women evoke a response today The medieval mother faced similar problems to her modern counterpart The sheer variety of women's experience in the later Middle Ages is fully brought out in this book

The New Knighthood Malcolm Barber,2012-03-26 The Order of the Temple was founded in 1119 with the limited aim of protecting pilgrims around Jerusalem It developed into one of the most powerful corporations in the medieval world which lasted for nearly two centuries until its suppression in 1312 Despite the loss of its central archive in the sixteenth century the Order left many records of its existence as the spearhead of crusading activity in Palestine and Syria as the administrator of a great network of preceptories and lands in the Latin west and as a banker and ship owner Because of the dramatic nature of its abolition it has retained its grip on the imagination and consequently there has developed an entirely fictional after history in which its secret presence has been evoked to explain mysteries which range from masonic conspiracy to the survival of the Turin Shroud This book offers a concise and up to date introduction to the reality and the myth of this extraordinary institution

The Forge of Christendom Tom Holland,2009-05-05 A grand narrative history of the re emergence of Europe following the collapse of the Roman Empire At the approach of the first millennium the Christians of Europe did not seem likely candidates for future greatness Weak fractured and hemmed in by hostile nations they saw no future beyond the widely anticipated Second Coming of Christ But when the world did not end the peoples of Western

Europe suddenly found themselves with no choice but to begin the heroic task of building a Jerusalem on earth In *The Forge of Christendom* Tom Holland masterfully describes this remarkable new age a time of caliphs and Viking sea kings the spread of castles and the invention of knighthood It was one of the most significant departure points in history the emergence of Western Europe as a distinctive and expansionist power *The Early Medieval World* Michael Frassetto,2013-03-14 This book examines a pivotal period in ancient human history the fall of the Roman Empire and the birth of a new European civilization in the early Middle Ages *The Early Medieval World From the Fall of Rome to the Time of Charlemagne* addresses the social and material culture of this critical period in the evolution of Western society covering the social political cultural and religious history of the Mediterranean world and northern Europe The two volume set explains how invading and migrating barbarian tribes spurred by raiding Huns from the steppes of Central Asia contributed to the fall of the Western Roman Empire and documents how the blending of Greco Roman Germanic and Christian cultures birthed a new civilization in Western Europe creating the Christian Church and the modern nation state A Z entries discuss political transformation changing religious practices in daily life sculpture and the arts material culture and social structure and provide biographies of important men and women in the transitional period of late antiquity The work will be extremely helpful to students learning about the factors that contributed to the decline of the Roman Empire an important and common topic in world history curricula **Strange Parallels: Volume 2, Mainland Mirrors: Europe, Japan, China, South Asia, and the Islands** Victor Lieberman,2009-10-30 Blending fine grained case studies with overarching theory this book seeks both to integrate Southeast Asia into world history and to rethink much of Eurasia s premodern past It argues that Southeast Asia Europe Japan China and South Asia all embodied idiosyncratic versions of a Eurasian wide pattern whereby local isolates cohered to form ever larger more stable more complex political and cultural systems With accelerating force climatic commercial and military stimuli joined to produce patterns of linear cum cyclic construction that became remarkably synchronized even between regions that had no contact with one another Yet this study also distinguishes between two zones of integration one where indigenous groups remained in control and a second where agency gravitated to external conquest elites Here then is a fundamentally original view of Eurasia during a 1 000 year period that speaks to both historians of individual regions and those interested in global trends *The Central Middle Ages* Daniel Power,2006 Daniel Power traces the history of Europe in the central Middle Ages 950 1320 an age of far reaching change for the continent Seven contributors consider the history of this period from a variety of perspectives including political social economic religious and intellectual history Northwest Europe in the Early Middle Ages, c.AD 600-1150 Christopher Loveluck,2013-10-24 Christopher Loveluck s study explores the transformation of Northwest Europe primarily Britain France and Belgium from the era of the first post Roman European Union under the Carolingian Frankish kings to the so called feudal age between c AD 600 and 1150 During these centuries radical changes occurred in the organisation of the rural world Towns and complex communities

of artisans and merchant traders emerged and networks of contact between northern Europe the Mediterranean and the Middle and Far East were redefined with long lasting consequences into the present day Loveluck provides the most comprehensive comparative analysis of the rural and urban archaeological remains in this area for twenty five years Supported by evidence from architecture relics manuscript illuminations and texts this book explains how the power and intentions of elites were confronted by the aspirations and actions of the diverse rural peasantry artisans and merchants producing both intended and unforeseen social changes

The Concealment of the State Jason Royce Lindsey,2013-08-01 This book is available as open access through the Bloomsbury Open Access programme and is available on www.bloomsburycollections.com Concealing the state frees us from admitting the unpleasant truth in today s world we are utterly dependent upon the state s increasingly frantic efforts to control risk To this end states have created systems of coercion and surveillance that are difficult to reconcile with our theories of political legitimacy The dominant ideology of contemporary politics has become the concealment of the state s overwhelming power and role in daily life We prefer the comfortable illusion that we are autonomous individuals pursuing our plans in a free market If we hold fast to that idea then our distance from policy makers and dwindling political influence seems less important Nonetheless this book draws upon the anarchist tradition and a wide range of accessible policy examples ranging from military organization and environmental regulations to scientific investment and education to reveal the active role of contemporary states behind this ideological screen Lindsey argues that we need a new politics that focuses on exposing and challenging the contemporary state s hidden agency Otherwise how can we democratically control the state when it denies from the outset having the ability to meet our demands

Beliefs and the Dead in Reformation England Peter Marshall,2002-07-11 This is the first comprehensive study of one of the most important aspects of the Reformation in England its impact on the status of the dead Protestant reformers insisted vehemently that between heaven and hell there was no middle place of purgatory where the souls of the departed could be assisted by the prayers of those still living on earth This was no remote theological proposition but a revolutionary doctrine affecting the lives of all sixteenth century English people and the ways in which their Church and society were organized This book illuminates the sometimes ambivalent attitudes towards the dead to be discerned in pre Reformation religious culture and traces up to about 1630 the uncertain progress of the reformation of the dead attempted by Protestant authorities as they sought both to stamp out traditional rituals and to provide the replacements acceptable in an increasingly fragmented religious world It also provides detailed surveys of Protestant perceptions of the afterlife of the cultural meanings of the appearance of ghosts and of the patterns of commemoration and memory which became characteristic of post Reformation England Together these topics constitute an important case study in the nature and tempo of the English

Reformation as an agent of social and cultural transformation The book speaks directly to the central concerns of current Reformation scholarship addressing questions posed by revisionist historians about the vibrancy and resilience of traditional religious culture and by post revisionists about the penetration of reformed ideas Dr Marshall demonstrates not only that the dead can be regarded as a significant marker of religious and cultural change but that a persistent concern with their status did a great deal to fashion the distinctive appearance of the English Reformation as a whole and to create its peculiarities and contradictory impulses
