Grigg, 1980-12-18 This book first published in 1980 suggests some ways of looking at the interrelationships between population growth and agrarian change and uses these approaches to consider the demographic and agrarian problems of various parts of Europe in the past in the fourteenth century the sixteenth and early seventeenth centuries and in the early nineteenth century *The Peasantry of Europe* Werner Rösener, 1994 **peasant society and culture** robert redfield, 1956 **Peasants in World History** Eric Vanhaute, 2021-03-22 This is the first world history of peasants Peasants in World History analyzes the multiple transformations of peasant life through history by focusing on three primary areas the organization of peasant societies their integration within wider societal structures and the changing connections between local regional and global processes Peasants have been a vital component in human history over the last 10 000 years with nearly one third of the world s population still living a peasant lifestyle today Their role as rural producers of ever new surpluses instigated complex and often opposing processes of social and spatial change throughout the world Eric Vanhaute frames this social change in a story of evolving peasant frontiers These frontiers provide a global comparative historical lens to look at the social economic and ecological changes within village systems agrarian empires and global capitalism Bringing the story of the peasantry up through the modern period and looking to the future the author offers a succinct overview with students in mind This book is recommended reading to anyone interested in the history and future of peasantries and is a valuable addition to undergraduate and graduate courses in World History Global Economic History Global Studies and Rural Sociology **Re-Thinking Kinship and Feudalism in Early Medieval Europe** Stephen D. White, 2023-07-07 This is the second collection of studies by Stephen D White to be published by Variorum the first being Feuding and Peace Making in

Eleventh Century France The essays in this volume look principally at France and England from Merovingian and Anglo Saxon times up to the 12th century They analyze Latin and Old French discourses that medieval nobles used to construct their relationships with kin lords men and friends and investigate the political dimensions of such relationships with particular reference to patronage clientage the use of land as an item of exchange and feuding In so doing the essays call into question the conventional practice of studying kinship and feudalism as independent systems of legal institutions and propose new strategies for studying them **Famine in Peasant Societies** Ronald E. Seavoy,1986-06-24 In this controversial study Seavoy offers a new approach to the problem of periodic peacetime famine based on the actual behavior of peasants He maintains that it is possible to increase per capita food production without massive and inappropriate technological inputs Seavoy shifts the focus from modern development economics to a cultural and historical analysis of subsistence agriculture in Western Europe England and Ireland Indonesia and India From his survey of peasant civilization practices in these countries he generalizes on the social values that create what he terms the subsistence compromise In all of the ages and culture Seavoy finds a consistent social organization of agriculture that produces identical results seasonal hunger in poor crop years and famine conditions in consecutive poor crop years He argues that economic policies have failed to increase per capita food production because economists and government planners try to apply market oriented policies to populations that are not commercially motivated Once they understand the subsistence compromise policy makers can take appropriate political action **Post-Socialist Peasant?** D. Kaneff,2001-12-03 During the past decade life in post socialist states has been fraught with instability and conflict This book focuses on changing rural urban relations and growing divisions between them in the context of the reforms Contributions to this volume explore responses to capitalist oriented policies and reasons for rural disenfranchisement The work takes an ethnographic approach to exploring how global processes engage with local rural concerns in the post socialist world **Peasant Rebellion in a Slave Society** Matthias Röhrig Assunção,2024-07-11 Peasant Rebellion in a Slave Society identifies the immediate and remote reasons for the Balaiada revolt in Maranhão Brazil analyzing the special characteristics of the region that favored the development of a relatively independent peasantry within and around the cotton rice cassava and cattle estates The book explores the demography of Maranhão and patterns of land ownership and documents the rapid degradation of the environment by plantation based export agriculture The analysis of various types of coerced and free labor the oligopolistic structure of the colonial economy and the key determinants of class and status contextualizes the conflict potential in Maranhão during the first half of the nineteenth century The People of Color as they called themselves and enslaved workers from plantations rose against a White and conservative elite claiming their constitutional rights or their freedom The central government in Rio de Janeiro had to dispatch considerable amounts of money and troops to defeat the insurrection and subject the province again to imperial rule and enslaved workers and peasants to the plantocracy This richly illustrated volume will be of interest to students and scholars working on slavery in

Kautsky,2017-09-29 *The Politics of Aristocratic Empires* is a study of a political order that prevailed throughout much of the world for many centuries without any major social conflict or change and with hardly any government in the modern sense Although previously ignored by political science powerful remnants of this old order still persist in modern politics The historical literature on aristocratic empires typically is descriptive and treats each empire as unique By contrast this work adopts an analytical explanatory and comparative approach and clearly distinguishes aristocratic empires from both primitive and more modern commercialized societies It develops generalizations that are supported and richly illustrated by data from many empires and demonstrates that a pattern of politics prevailed across time space and cultures from ancient Egypt five millennia ago to Saudi Arabia five decades ago from China and Japan to Europe from the Incas and the Aztecs to the Tutsi Kautsky argues that aristocrats because they live off the labor of peasants must perform the primary governmental functions of taxation and warfare Their performance is linked to particular values and beliefs and both functions and ideologies in turn condition the stakes the forms and the arenas of intra aristocratic conflict the politics of the aristocracy The author also analyzes the roles of the peasantry and the townspeople in aristocratic politics and shows that peasant revolts on any large scale occur only after commercial modernization He concludes with chapters on the modernization of aristocratic empires and on the importance in modern politics of institutional and ideological remnants of the old aristocratic order      Framing Social Criticism in the Jesus Movement Sarah E.
