## **Peasants King In Burgundy Agrarian Foundations Of French Absolutism:**

*Peasants and King in Burgundy* Hilton L. Root, 1987      **The Social Interpretation of the French Revolution** Alfred Cobban, 1999-05-27 Alfred Cobban's *The Social Interpretation of the French Revolution* is one of the acknowledged classics of post-war historiography. This revisionist analysis of the French Revolution caused a furore on first publication in 1964, challenging as it did established orthodoxies during the crucial period of the Cold War. Cobban saw the French Revolution as central to the grand narrative of modern history but provided a salutary corrective to many celebrated social explanations, determinist and otherwise, of its origins and development. A generation later, this concise but powerful intervention was reissued in this 1999 edition with an introduction by Gwynne Lewis providing students with both a context for Cobban's own arguments and assessing the course of Revolutionary studies in the wake of *The Social Interpretation*. This book remains a handbook of revisionism for Anglo-Saxon scholars and is essential reading for all students of French history at undergraduate level and above.

**Spain, Europe, and the 'Spanish Miracle', 1700-1900** David R. Ringrose, 1998-11-26 A challenging re-examination of Spanish history questioning orthodoxies about Spain's economy and society.

**The Military Revolution and Political Change** Brian Downing, 2020-12-08 To examine the long-run origins of democracy and dictatorship, Brian Downing focuses on the importance of medieval political configurations and of military modernization in the early modern period. He maintains that in late medieval times an array of constitutional arrangements distinguished Western Europe from other parts of the world and predisposed it toward liberal democracy. He then looks at how medieval constitutionalism was affected by the military revolution of the early modern era: the shift from small decentralized feudal levies to large standing armies. Downing won the American Political Science Association's Gabriel Almond Award for the dissertation on which this book was based.

**Revolutions in the Atlantic World, New Edition** Wim Klooster, 2018-01-23 Introduction: Empires at war, Civil war in the British Empire, the American Revolution, The war on privilege and dissension, the French Revolution, From prize colony to black independence, the revolution in Haiti, Multiple routes to sovereignty, the Spanish American revolutions. The revolutions compared: causes, patterns, legacies.

*Revolutions and the Collapse of Monarchy* Zhand Shakibi, 2007-02-23 What causes revolution? What brought about the end of the last major monarchies of the modern period? Were Louis XVI, Nicholas II, and Mohammad Reza Pahlavi the unwitting victims of historical circumstance, or did their own actions help to bring about the revolutions that overthrew them? This powerful and original book is the first comparative study of the revolutions in Bourbon France, Romanov Russia, and Pahlavi Iran. Zhand Shakibi analyses fully the timing and causes of these three revolutions and reveals the important similarities between them. *Revolutions and the Collapse of Monarchy* argues provocatively that it is often the monarch's own personality that provides the vital spark which produces revolution. This ambitious and important book challenges the Marxist interpretation of history and adds a compelling new perspective to theories of revolution.

**The French Revolution and the People** David Andress, 2006-08-23 *The French Revolution of*

1789 was the central event of modern history For the first time a major nation fell prey to political and then social revolution with civil war and the Reign of Terror following the execution of Louis XVI in January 1793 Although the Revolution started with the resistance of a minority to absolutist government it soon spread to involve the whole nation including the men and women who made up by far the largest part of it the peasantry as well as towns and craftsmen the poor and those living on the margins of society The French Revolution and the People is a portrait of the common people of France in the towns and in the countryside in Paris and Lyon in the Vendee Brittany Provence Popular grievances and reactions affected the events and outcome of the Revolution at all stages and in turn everyone in France was affected by the Revolution The French Revolution and the People is a vivid story of conflict violence and death but there were winners as well as losers and not all the suffering was in vain as the injustices of the Ancien Regime were thrown off

**The Dynastic State and the Army under Louis XIV**  
Guy Rowlands,2002-08-29 The personal rule of Louis XIV witnessed a massive increase in the size of the French army and an apparent improvement in the quality of its officers its men and the War Ministry However this is the first book to treat the French army under Louis XIV as a living political social and economic organism an institution which reflected the dynastic interests and personal concerns of the king and his privileged subjects The book explains the development of the army between the end of Cardinal Mazarin s ministry and the outbreak of the War of the Spanish Succession emphasising the awareness of Louis XIV and his ministers of the need to pay careful attention to the condition of the king s officers and to take account of their military political social and cultural aspirations

Lawyers and Citizens David A. Bell,1994-04-14  
David Bell s new book traces the development of the French legal profession between the reign of Louis XIV and the French Revolution showing how lawyers influenced and were influenced by the period s passionate political and religious conflicts Bell analyzes how these key middling figures in French society were transformed from the institutional technicians of absolute monarchy into the self appointed voices of public opinion and leaders of opposition political journalism He describes the birth of an independent legal profession in the late seventeenth century its alienation from the monarchy under the pressure of religious disputes in the early eighteenth century and its transformation into a standard bearer of enlightened opinion in the decades before the Revolution His work illuminates the workings of politics under a theoretically absolute monarchy and the importance of long standing constitutional debates for the ideological origins of the Revolution It also sheds new light on the development of the modern professions and of the middle classes in France

**Is Rational Choice Theory All of Social Science?** Mark I. Lichbach, 2009-12-11 A timely examination of the current paradigm wars in political science

**France 1715-1804** Gwynne Lewis, 2018-12-14 Gwynne Lewis history opens with a full analysis of all the components of traditional France including political and religious structures the seigneurial system the bourgeoisie and the poor Part two examines the meaning and challenge of the Enlightenment with particular reference to women and the mass of the poor Part three concentrates upon the relationship between the shift to laissez faire economics popular revolts and government repression providing the essential background to the Revolutionary decade of the 1790s The Revolution witnessed the rise of a politicised Popular Movement that achieved briefly a measure of popular democracy War and counter revolution blocked the move towards real democracy strengthened the authority of the centralised state and enhanced the credibility of bourgeois political and economic power One of the main contentions of this work is that the failure of both monarchical and Revolutionary regimes to deal with the massive social problem of poverty played a far larger part in explaining the collapse of the Bourbons in 1789 and the failure of democracy during the 1790s than most historians have

allowed Likewise the importance of religion in directing the momentous events of this period has also been under estimated

**Provincializing Global History** James Gerard Livesey,2020-01-07 A microhistory of eighteenth century systemic change that places ordinary French lives alongside global advances Provincializing Global History explores the subtle transformation of the coastal province of the Languedoc in the eighteenth century Mining a wealth of archival sources James Livesey unveils how provincial elites and peasant households unwittingly created new practices Managing local political institutions establishing new credit systems building networks of natural historians and introducing new plants and farm machinery to the region opened up the inhabitants of the province to new norms and standards The practices were gradually embedded in daily life and allowed the province to negotiate the new worlds of industrial society and capitalism **Elections in the**

**French Revolution** Malcolm Crook,1996-03-07 This book explores the vital but neglected issue of elections in the French Revolution Based on extensive research in different regions of France it is the only general survey to examine the full range of local and national contests from the Estates General to the advent of Napoleon Focusing on electoral behaviour it reveals a fascinating experiment with a quasi universal suffrage which established enduring features of French elections The retention of the traditional practice of voting in assemblies and a refusal to acknowledge candidates canvassing and competing political parties inhibited the emergence of a pluralistic electoral culture Nonetheless frequent polling offered unprecedented political opportunities to millions This revolutionary apprenticeship in democracy left a lasting imprint on the development of modern French citizenship **The Myth of 1648** Benno Teschke,2020-05-05 Winner of the 2003 Isaac and Tamara

Deutscher Memorial Prize This book rejects a commonplace of European history that the treaties of Westphalia not only closed the Thirty Years War but also inaugurated a new international order driven by the interaction of territorial sovereign states Benno Teschke through this thorough and incisive critique argues that this is not the case Domestic social property relations shaped international relations in continental Europe down to 1789 and even beyond The dynastic monarchies that ruled during this time differed from their medieval predecessors in degree and form of personalization but not in underlying dynamic 1648 therefore is a false caesura in the history of international relations For real change we must wait until relatively recent times and the development of modern states and true capitalism In effect it s not until governments are run impersonally with no function other than the exercise of its monopoly on violence that modern international relations are born

**Class and State in Ancien Regime France** David Parker,2002-11-01 Class and State in Early Modern France explores the economic social ideological and political foundations of French Absolutism David Parker s challenging interpretation presents French Absolutism as a remarkably successful attempt to preserve the political and ideological structures of the traditional order This reassessment runs contrary to much revisionist historiography rejecting the widespread tendency to treat French Absolutism either as an instrument of capitalism or political modernisation It also discusses a number of contentious issues such as the agrarian foundations of capitalism the relationship between class and status as well as the

structure and ideology of the absolute state itself It will be of interest to early modern historians of France Britain and Europe
