PEDAGOGICAL PLEASURES

Pedagogical Pleasures

Anita Harris

Pedagogical Pleasures:

Pedagogical Pleasures Erica McWilliam, 1999 Pedagogical Pleasures inquires into pleasure understood as enjoyment, delight and or gratification as a crucial but neglected aspect of teachers' lives and work. Pleasure is examined as an historically contingent and unstable product of language use rather than as a spontaneous personal and psychological feeling. This book is a departure from conventional accounts of pedagogy in two ways. It is unashamedly about teachers rather than students and it does not offer any solution to pedagogical problems. Instead it seeks to extend pedagogical knowledge by inquiring into the sorts of pleasure that are available to teachers at this historical time. Pedagogy and Human Movement Richard Tinning, 2009-09-10 Pedagogy and Human Movement explores the pedagogies of human movement and how they reproduce knowledge related to physical activity, the body and health. This is an essential read for all interested in the teaching or studying of human movement studies. *Dangerous Coagulations?* Bernadette M. Baker, Katharina Elisabeth Heyning, 2004 This book brings together an outstanding group of scholars who draw on the works of Michel Foucault. Eclectic in topic and method, the essays illustrate Foucault's usefulness. *Dangerous Coagulations* constitutes a departure from the more formulaic Foucault work that has emerged and highlights new possibilities for undertaking problematizing approaches to educational research. **All about the Girl** Anita Harris, 2004 First Published in 2004 Routledge is an imprint of Taylor Francis, an information company. **A Political Sociology of Educational Knowledge** Thomas A. Popkewitz, Jennifer Diaz, Christopher Kirchgasser, 2017-01-20 Bringing together the sociology of knowledge, cultural studies and post-foundational and historical approaches, this book asks what schooling does and what are its limits and dangers. The focus is on how the systems of reason that govern schooling embody historically generated rules and standards about what is talked about, thought and acted on about the nature of children, about the practices and paradoxes of educational reform. These systems of reason are examined to consider issues of power, the political and social exclusion. The transnational perspectives interrelate historical and ethnographic studies of the modern school to explore how curriculum is translated through social and cognitive psychologies that make up the subjects of schooling and how educational sciences act to order and divide what is deemed possible to think and do. The central argument is that taken-for-granted notions of educational change and research paradoxically produce differences that simultaneously include and exclude. *Research Methods for Pedagogy* Melanie Nind, Alicia Curtin, Kathy Hall, 2016-10-06 Aspects of pedagogy are frequently researched but the concept itself is poorly understood. More than just teaching and learning, pedagogy is about values, identities, relationships and interactions bounded by context. As such, researchers of pedagogy face the challenge of working out what constitutes pedagogical texts, data or evidence and how these can be generated and understood. *Research Methods for Pedagogy* begins by exploring the different conceptualisations of pedagogy and their implications for how it is researched. The authors reflect on how their sociocultural stance on pedagogy influences the methods they choose to focus on in the book. Moving beyond just schools and formal

pedagogies into informal and everyday pedagogies the authors use a range of case studies across educational sectors and cultures to discuss methods for researching pedagogy Common approaches such as ethnography and action research are included alongside some quantitative and quasi experimental methods and often less familiar participatory multimodal and reflective methods The authors demonstrate the relationships between theoretical stance pedagogical context and research approach Finally the book addresses the complexity of pedagogy research through discussion of particular ethical and relational aspects as it highlights innovations and developments in research methods for pedagogy Boxed case studies reflections on real research projects a glossary of key terms and an annotated list of further reading all help to guide students and scholars through their research design and choice of methods in this area **Food Pedagogies** Rick

Flowers, Elaine Swan, 2016-04-22 In recent years everyone from politicians to celebrity chefs has been proselytizing about how we should grow buy prepare present cook taste eat and dispose of food In light of this contributors to this book argue that food has become the target of intensified pedagogical activity across a range of domains including schools supermarkets families advertising and TV media Illustrated with a range of empirical studies this edited and interdisciplinary volume the first book on food pedagogies develops innovative and theoretical perspectives to problematize the practices of teaching and learning about food While many different pedagogues policy makers churches activists health educators schools tourist agencies chefs think we do not know enough about food and what to do with it the aims effects and politics of these pedagogies has been much less studied Drawing on a range of international studies diverse contexts genres and different methods this book provides new sites of investigation and lines of inquiry As a result of its broad ranging critical evaluation of food as classroom and food as teacher it provides theoretical resources for opening up the concept of pedagogy and assessing the moralities and politics of teaching and learning about food in the classroom and beyond *Social Justice*

illustrates how this catalyzes girls critiques of their futures and of the schooled storylines of female success While teachers might trumpet college career and limitless horizons girls seek to understand their social positions and try to make sense of family passions and future happiness This book will be of great interest to graduate and postgraduate students academics researchers libraries in secondary education girlhood studies sociology of education gender and sexuality in education single sex schooling and feminist theory **A Passion for Teaching** Christopher Day,2004-04 This book concentrates on the heart of teaching teachers moral purposes the nature of care emotional commitment and motivation celebrating and acknowledging the best teaching and the best teachers Writing for Pleasure Ross Young,Felicity Ferguson,2020-12-29 This book explores what writing for pleasure means and how it can be realised as a much needed pedagogy whose aim is to develop children young people and their teachers as extraordinary and life long writers The approach described is grounded in what global research has long been telling us are the most effective ways of teaching writing and contains a description of the authors own research project into what exceptional teachers of writing do that makes the difference The authors describe ways of building communities of committed and successful writers who write with purpose power and pleasure and they underline the importance of the affective aspects of writing teaching including promoting in apprentice writers a sense of self efficacy agency self regulation volition motivation and writer identity They define and discuss 14 research informed principles which constitute a Writing for Pleasure pedagogy and show how they are applied by teachers in classroom practice Case studies of outstanding teachers across the globe further illustrate what world class writing teaching is This ground breaking text is essential reading for anyone who is concerned about the current status and nature of writing teaching in schools The rich Writing for Pleasure pedagogy presented here is a radical new conception of what it means to teach young writers effectively today Shaping the Future ,2007-01-01 World wide the production of teachers has become a sharp political issue during the early years of the twenty first century Current systems for ensuring a supply of capable and knowledgeable teachers have come sustained under attack from politicians economists parents organisations and social critics alike There is less agreement now about teacher education than in any time over the pass fifty years Much of the debate in the public and political arenas has been driven by narrow and expedient consideration and too much of it demonstrates a poor grasp of the deep and complex issues which teacher education in a democracy must confront At the same time there has been a serious educational debate which has focused on what a well trained teacher ought to be able to do and what methods of training and education can produce competent teachers The chapters of this book address these issues in a critical way asking what should the objectives of teacher education be The authors demonstrate the international reach of the debate over teacher education and they ground their discussions within the national contexts of their own experience All the authors share the view that teacher education involves much more than acquiring a set of skills and techniques Important as these are the well trained teacher needs for example to have an understanding of the contexts of

teaching of the reasons why we teach of the role of schools as institutions within political environments as well as a coherent perspective on curriculum and the relevant bodies of theory which give overall point to what is being done What teacher education entails will probably never be beyond contestation at least not so long as it takes place within capitalist democracies These democracies with their tensions running between liberal ideals and economic imperative push and pull teacher education in contradictory directions At present educational ideals seems too quickly and too dogmatically to be traded for immediate fiscal policy The authors of these chapters articulate the reasons why such short term thinking will be detrimental to any approach to teacher education which commits itself to producing well rounded and comprehensively professional teachers The Pedagogical Seminary, 1921 Vols 5 15 include Bibliography of child study by Louis N Wilson
