Manual of Pediatric Anesthesia David J. Steward, 1995 **Pediatric Anesthesia Handbook** Melinda Finkenbinder, Jessica Spencer, 2015

Background Different tools existed to aid the novice nurse anesthetist student in caring for the pediatric population However

a handbook had yet to be created for use specific to students in the Newman University nurse anesthesia program Purpose While multiple pediatric tools currently exist we feel it necessary to produce a reference tool to provide additional information to Student Registered Nurse Anesthetist SRNA during pediatric cases that is clear concise and convenient for quick reference information Design A quantitative survey to establish usefulness of a pediatric handbook was administered to junior and senior SRNA s from Newman University Upon completion of the survey the information was analyzed using a variety of different statistical analysis software Findings The needs assessment survey determined the content that was deemed useful to the SRNAs during pediatric anesthesia Conclusion A pediatric quick reference handbook was developed to meet the needs of the novice Student Registered Nurse Anesthetist in the Newman University Nurse Anesthesia program Recommendations It is suggested that future students within the Nurse Anesthesia program of Newman University continue to validate the information and re produce the product with the newest and up to date information in current practice
