Felice,2017-04-28 Dr Felice has put together clinical reviews articles that cover a broad scope of clinical issues that are common among sexually active adolescent patients Some issues addressed include HPV Vaccine Update Treating Dysmenorrhea Menorrhagia New STD Guidelines Emergency Contraception Talking to Parents about Teen Sexuality and Long acting Reversible Contraception Most pediatricians feel poorly equipped to address these problems They are also complicated issues that give the average pediatric clinician pause and often take more time than usually scheduled in a busy practice By providing practical updated information on these clinical problems pediatric practitioners can become more comfortable in dealing with these topics

Although many clinicians are not involved with adolescents in the juvenile justice system Dr Felice included an article on this so that pediatricians can be more educated and sensitive to the needs of these young people An article on human trafficking of teens is included with the hope bringing awareness of this issue Articles in this issue were selected specifically because they directly affect primary pediatric care For example an article is included on how to help young people avoid being victims of partner violence rather than an article on sexual abuse and rape because adolescents would be treated in the emergency room and not the pediatrician's office
