Peenemunde To Canaveral:

From Peenemünde To Canaveral Dieter Huzel, 2014-08-15 Dieter Huzel was an electronic engineer with his whole career ahead of him when Germany lurched into the Second World War he was conscripted and destined for the Russian Front when fate intervened He and many other scientists were re assigned from combat duty to the top secret installation at Peenemünde Island off the Baltic coast as part of the Nazi search for Wonder Weapons Huzel describes how he became an integral part of the V weapon program which despite the frequent Allied bombings produced the feared V 1 and V 2 rockets that rained down on liberated parts of Europe during the later years of the war As the tide turned against the Nazi regime Huzel tells of the shifts in production of these weapons to central Germany and his team's rising fear that the rocket technology would fall into the hands of the Russians However Huzel and his team were captured by the West and offered relocation to Britain or America Huzel and his former director Werner Von Braun opted for America where they would become part of the groundbreaking Rocketdyne research team and spearhead of the NASA push for space exploration Peenemünde to Canaveral

Red Moon Rising Matthew Brzezinski, 2024-09-04 A vivid behind the scenes history of the Cold War s space race between the Soviets Americans following the launch of Sputnik In his exuberant narrative of the superpower space race Brzezinski tells the story of American and Soviet decisions with remarkable dramatic even cinematic flair The New York Times Book Review In Red Moon Rising Matthew Brzezinski recounts the dramatic behind the scenes story of the fierce battles on earth that preceded and followed the launch of Sputnik on October 4 1957 He takes us inside the Kremlin the White House secret military facilities deep cover safe houses and the halls of Congress to bring to life the Russians and Americans who feared and distrusted their compatriots at least as much as their superpower rivals Drawing on original interviews and new documentary sources Brzezinski tells a story rich in the paranoia of the time and the combatants include three U S presidents survivors of the gulag corporate chieftains ambitious apparatchiks rehabilitated Nazis and a general who won the day by refusing to follow orders The true story of the birth of the space age has never been told in such vivid detail and Red Moon Rising brings it memorably to life A spectacular and accessible history of the space race Brzezinski displays depth insight and showmanship USA Today Brzezinski is a wonderfully colorful writer combining a scientific plotline with the history and characters of a Cold War thriller The Times London The writing is fast paced and crisp the stakes high and the tension palpable from the first pages of this high flying account of the early days of the space race between the U S and U S S R Publishers Weekly starred review Comparable to Paul Dickson s Sputnik Shock of the Century Brzezinski s speedy narrative of the first satellite slings readers from launch pads to conference rooms A kinetic rendition of Sputnik this will score with spaceflight buffs Booklist

Power to Explore Andrew J. Dunar, Stephen P. Waring, 1999 This scholarly study of NASA s Marshall Space Flight Center places the institution in social political scientific and technological context It traces the evolution of Marshall located in Huntsville Alabama from its origins as an Army missile development organization to its status in 1990 as one of the most diversified of NASA s field Centers Chapters discuss military rocketry programs in Germany and the United States Apollo Saturn Skylab Space Shuttle Spacelab the Space Station and various scientific and technical projects including the Hubble Space Telescope It sheds light not only on the history of space technology science and exploration but also on the Cold War federal politics and complex organizations

The Origins of Surface-to-Air Guided Missile Technology James Mills, 2022-10-21 Author James Mills presents an amazing detailed history review of the German surface to air guided missile technology development Military Review World War II saw the appearance of numerous revolutionary armaments on both sides of the conflict that would radically change the nature of warfare from jet aircraft to the ballistic missile and the atomic bomb The greatest conflagration in history also saw the conception of the first surface to

air guided missile systems technology pioneered by German scientists and engineers through an extensive development program which ran from 1942 to 1945 Although the program did not achieve its main objective to introduce a functional weapon system into the Luftwaffe air defense network German research and development in most aspects of the technology was ahead of comparable research in the United Kingdom and the United States The history of the transfer of German SAM technology to the Allies after 1945 has previously been overshadowed by the well published transfers of the V 1 and V 2 guided missiles This book presents the first complete history of Germany s wartime development of surface to air missile SAM technology how the Allies acquired this secret research towards the end of World War II in Europe and in the early postwar period and how they then exploited this knowledge **The Hidden Nazi** Dean Reuter,Keith Chester,Colm Lowery,2019-10-08 He s the worst Nazi war criminal you ve never heard of Sidekick to SS Chief Heinrich Himmler and supervisor of Nazi rocket scientist Wernher von Braun General Hans Kammler was responsible for the construction of Hitler s slave labor sites and concentration camps He personally altered the design of Auschwitz to increase crowding ensuring that epidemic diseases would complement the work of the gas chambers Why has the world forgotten this monster Kammler was declared dead after the war But the aide who testified to Kammler s supposed suicide never produced the general s dog tags or any other proof of death Dean Reuter Colm Lowery and Keith Chester have spent decades on the trail of the elusive Kammler uncovering documents unseen since the 1940s and visiting the purported site of Kammler s death now in the Czech Republic Their astonishing discovery US government documents prove that Hans Kammler was in American custody for months after the war well after his officially declared suicide And what happened to him after that Kammler was kept out of public view never indicted or tried but to what end Did he cooperate with Nuremberg prosecutors investigating Nazi war crimes Was he protected so the United States could benefit from his intimate knowledge of the Nazi rocket program and Germany s secret weapons The Hidden Nazi is true history more harrowing and shocking than the most thrilling fiction

German Rocketeers in the Heart of Dixie Monique Laney,2015-06-23 This thought provoking study by historian Monique Laney focuses on the U S government assisted integration of German rocket specialists and their families into a small southern community soon after World War II In 1950 Wernher von Braun and his team of rocket experts relocated to Huntsville Alabama a town that would celebrate the team despite their essential role in the recent Nazi war effort for their contributions to the U S Army missile program and later to NASA s space program Based on oral histories provided by members of the African American and Jewish communities and by the rocketeers families co workers friends and neighbors Laney s book demonstrates how the histories of German Nazism and Jim Crow in the American South intertwine in narratives about the past This is a critical reassessment of a singular time that links the Cold War the Space Race and the Civil Rights era while addressing important issues of transnational science and technology and asking Americans to consider their country s own history of racism when reflecting on the Nazi past *The Rocket and the Reich* Michael J. Neufeld,2013-09-10

WINNER OF THE DEXTER PRIZE OF THE SOCIETY FOR THE HISTORY OF TECHNOLOGY Launched by the Third Reich in late 1944 the first ballistic missile the V 2 fell on London Paris and Antwerp after covering nearly two hundred miles in five minutes It was a stunning achievement one that heralded a new age of ballistic missiles and space launch vehicles Michael J Neufeld gives the first comprehensive and accurate account of the story behind one of the greatest engineering feats of World War II At a time when rockets were minor battlefield weapons Germany ushered in a new form of warfare that would bequeath a long legacy of terror to the Cold War as well as the means to go into space Both the US and USSR s rocket programs had their origins in the Nazi state V2 Robert Harris,2020-11-17 NEW YORK TIMES BESTSELLER From the bestselling author of Fatherland and Munich comes a WWII thriller about a German rocket engineer a former actress turned British spy and the Nazi rocket program The first rocket will take five minutes to hit London You have six minutes to stop the second Rudi Graf is an engineer who always dreamed of sending rockets to the moon But instead he finds himself working alongside Wernher von Braun launching V2 rockets at London for the Nazis from a bleak seaside town in occupied Holland As the SS increases its scrutiny on the project Graf an engineer more than a soldier has to muster all of his willpower to toe the party line And when rumors of a defector circulate through the German ranks Graf becomes a prime suspect Meanwhile Kay Caton Walsh a young English intelligence officer is living through the turmoil of war After she and her lover an RAF officer are caught in a V2 attack she volunteers to ship out for newly liberated Belgium Armed with little more than a slide rule and a few equations Kay and her colleagues hope to locate and destroy the launch sites But at this stage in the war it s hard to know who if anyone she can trust As the death toll soars these twin stories play out against the background of the German missile campaign during the Second World War And what the reader comes to understand is that Kay s and Graf s destinies are on a collision course

The Development of Propulsion Technology for U.S. Space-Launch Vehicles, 1926-1991 J. D. Hunley,2013-03-15 In this definitive study J D Hunley traces the program s development from Goddard s early rockets and the German V 2 missile through the Titan IVA and the Space Shuttle with a focus on space launch vehicles Since these rockets often evolved from early missiles he pays considerable attention to missile technology not as an end in itself but as a contributor to launch vehicle technology Focusing especially on the engineering culture of the program Hunley communicates this very human side of technological development by means of anecdotes character sketches and case studies of problems faced by rocket engineers He shows how such a highly adaptive approach enabled the evolution of a hugely complicated technology that was impressive but decidedly not rocket science Unique in its single volume coverage of the evolution of launch vehicle technology from 1926 to 1991 this meticulously researched work will inform scholars and engineers interested in the history of technology and innovation as well as those specializing in the history of space flight

The 20th Century O-Z Frank N. Magill,2013-05-13 Each volume of the Dictionary of World Biography contains 250 entries on the lives of the individuals who shaped their times and left their mark on world history This is not a who s who

Instead each entry provides an in depth essay on the life and career of the individual concerned Essays commence with a quick reference section that provides basic facts on the individual s life and achievements The extended biography places the life and works of the individual within an historical context and the summary at the end of each essay provides a synopsis of the individual s place in history All entries conclude with a fully annotated bibliography

Rockets Into Space Frank H. Winter,1990 Since ancient times men and women have dreamed of soaring among the stars but only in this century has that dream been realized In *Rockets into Space* Frank Winter tells the fascinating story of the modern launch vehicle from the mythological musings of the Babylonians and Greeks to the present day reality of manned and unmanned space flight In concise yet comprehensive chapters dense with anecdotal detail Winter tracks the theoretical formulations and technological breakthroughs that have charted the evolution of rocket propulsion and vehicle design He pays particular attention to the remarkable contributions of pioneers Konstantin Tsiolkovsky Robert Goddard Hermann Oberth Eugen S nger and Sergei Korolev whose genius and vision paved the way for later innovation He describes the clandestine development of the V 2 rocket in Germany under the technical leadership of Wernher von Braun and its dramatic impact on postwar rocket research and satellite development in the United States and the Soviet Union He also chronicles the complex events of the last three decades which have produced ever more sophisticated rockets capable of launching larger payloads from weapons to weather and communications satellites Finally he surveys exotic propulsion systems nuclear electric solar photon laser that lie on the frontiers of science today but that will shape the spaceflight and space policy decisions of tomorrow *Rockets into Space* is an authoritative entertaining guidebook for all who are interested in the history of space travel

Dr. Space Robinson J Ward,2009-09-01 Written by veteran aerospace journalist Bob Ward who spent years investigating his subject this biography presents a revealing but even handed portrait of the father of modern rocketry As he chronicles Werner von Braun s life Ward explodes many myths and misconceptions about the controversial genius who was a hero to some a villain to others The picture of von Braun that emerges is of a brilliant scientist with limitless curiosity and a drive to achieve his goals at almost any price from developing the world s first ballistic missile used against the Allies in World War II to helping launch the first U S satellite that hurled Americans into space and the Saturn V super booster that powered them to the moon Along the way readers are introduced to the human side of this charismatic visionary who brought the United States into the Space Age

The Peenemünde Wind Tunnels Peter P. Wegener,1996-01-01 In 1943 on orders from the German Air Ministry young physicist Peter P Wegener left the Russian front and reported to the Baltic village of Peenemünde His assignment was to work at the supersonic wind tunnels of the rocket laboratories of the German Army Here Wernher von Braun led a team that developed the V 2 the world s first large rocket powered guided missile and laid much of the groundwork for postwar rocket development In this fascinating book Wegener recounts his experiences during Hitler s time World War II and his years at Peenemünde He tells how he was working one night in August 1943 when the Allies bombed the laboratories but left the wind

tunnels undamaged The tunnels were moved to Bavaria and Wegener was ordered to follow in 1944 After the war the tunnels were moved again this time to the United States accompanied by the author and other German scientists Shortly before the end of the war Wegener visited Germany's underground V 2 production plant to retrieve archival material on aerodynamics that had been stored in caves for safekeeping He describes the appalling history of the concentration camps where SS guards watched over inmates who toiled underground in inhuman conditions and often did not survive A photoessay enhances this remarkable memoir **Quarterly Review of Military Literature** ,1963
