Social Support Networks James K. Whittaker, James Garbarino. This book offers for the first time a clear conception of what social support networks are, why they are important, how they are identified and sustained, where they fit in an overall framework of human services and their limits and potential in selected fields of practice. Individual chapters explore child, adolescent and family services, daycare and early childhood development, divorced and stepfamilies, schools, delinquency prevention and treatment, mental health service to the elderly, development disabilities, healthcare and health promotion and drug treatment. The use of social support networks extended family, friends, neighbors and other informal helpers is an idea whose time has come in the human services field. At a time when spiraling costs and popular sentiment weigh against any major expansion of services, it is apparent that a service
