Peking Man:

The Search for Peking Man Christopher George Janus, William Brashler, 1975 An account of the search for the onehalf million year old fossil remains of Peking Man which were discovered in China in 1926 and lost in 1941 when the Japanese invaded China

Peking Man Harry Lionel Shapiro, 1975 The discovery disappearance and mystery of a priceless scientific treasure Jacket subtitle **The Story of Peking Man** Penny Van Oosterzee, 2001-10-01 At the end of the nineteenth century in China amateur fossil hunters knew that a ready supply of fossils could be found in backstreet Chinese apothecaries They were sold as dragon bones to be ground down and made into powerful medicines When the sources of these fossils were tracked down they revealed sites rich with the remains of horses rhinoceroses elephants and the ancestors of mankind Set against a background of squabbling Chinese warlords and the Japanese occupation

The People's Peking Man Sigrid Schmalzer, 2024-05-31 In the 1920s an international team of scientists and miners unearthed the richest evidence of human evolution the world had ever seen Peking Man After the communist revolution of 1949 Peking Man became a prominent figure in the movement to bring science to the people In a new state with twin goals of crushing superstition and establishing a socialist society the story of human evolution was the first lesson in Marxist philosophy offered to the masses At the same time even Mao's populist commitment to mass participation in science failed to account for the power of popular culture represented most strikingly in legends about the Bigfoot like Wild Man to reshape ideas about human nature The People's Peking Man is a skilled social history of twentieth century Chinese paleoanthropology and a compelling cultural and at times comparative history of assumptions and debates about what it means to be human By focusing on issues that push against the boundaries of science and politics The People's Peking Man offers an innovative approach to modern Chinese history and the history of science

Turning Points I' 2007 Ed. , **The Story of Peking Man** Lanpo Jia, Weiwen Huang, 1990 Once a forlorn village fifty kilometers south of Beijing Zhoukoudian formerly Choukoutien is today a virtual shrine to archaeology a bustling community with its own highway extension a major exhibit hall which attracts hundreds of thousands of tourists annually and one of the world's most famous fossil sites Still active today this site in seven decades has contributed immeasurably to our knowledge of prehistoric life It boasts one of the richest fossil deposits found anywhere ranging from the Early Pliocene to the Late Pleistocene a span of three million years It has provided some of the earliest evidence of fire usage ever uncovered And most important it is the home of Peking Man whose discovery ranks as one of the great events in modern archaeology Now in *The Story of Peking Man* one of China's foremost archaeologists Jia Lanpo offers a profusely illustrated history of Zhoukoudian tracing its earliest discoveries and greatest moments recounting the tragic events of World War II Japanese soldiers murdered three archaeologists and the Peking Man fossils vanished under mysterious circumstances and evaluating its overall importance Lanpo spent over half a century at Zhoukoudian and he provides many fascinating first hand accounts of scientists at work including such figures as Davidson Black Pierre Teilhard de Chardin Yang Zhongjian Pei

Wenzhong and of course Lanpo himself He describes how the abundance of dragon bones fossils sold in herbal medicine shops in Zhoukoudian first attracted Johan Gunnar Andersson who began excavations there in 1918 the first major discovery a human skullcap found by Pei Wenzhong while digging by candlelight in a tiny cave and Jia Lanpo's own discovery of a beautifully preserved skullcap in 1936 He vividly conveys the great excitement of an important find as well as the pressure to make major discoveries as funding runs low And he reviews many of the theories and controversies surrounding Peking Man Were they cannibals Did they use bones as tools Did humanity originate in Asia or Africa Based on numerous unpublished sources including field reports personal letters and photographs and Lanpo's own remembrances *The Story of Peking Man* provides an inside look at a major archaeological site one that will fascinate anyone interested in the origins of humanity

'Struggle for Freedom' 2008 Ed. Cecilio D. Duka, 2008

Ts'ao Yu, The Reluctant Disciple of Chekhov and O'Neil Joseph Siu-ming Lau, 1970-01-01 Historians of modern Chinese literature have generally used the year 1907 to mark the inception of Western style drama in China For in that year a small group of Chinese students in Japan inspired by the Japanese experiments with Western drama decided to follow suit and form the Spring Willow Society an amateurish dramatic club for experimental purposes Their first play staged in Tokyo in February of the same year is an adaptation from Dumas *La dame aux camélias* The play had an all male cast and used a strange mixture of old and new techniques But to the Chinese audience brought up in the native operatic tradition what must have seemed strange would not have been so much the mixture of technique old and new as the complete unfamiliarity of the plot and the method of its presentation for neither the story nor the acting was anything akin to what they used to think of as drama

sediba and Lucy NoveList *Dragon Bone Hill* Noel T. Boaz, Russell L. Ciochon, 2004-02-16 Peking Man a cave man once thought a great hunter who had first tamed fire actually was a composite of the gnawed remains of some fifty women children and men unfortunate enough to have been the prey of the giant cave hyena Researching the famous fossil site of Dragon Bone Hill in China scientists Noel T Boaz and Russell L Ciochon retell the story of the cave s unique species of early human Homo erectus Boaz and Ciochon take readers on a gripping scientific odyssey New evidence shows that Homo erectus was an opportunist who rode a tide of environmental change out Africa and into Eurasia puddle jumping from one gene pool to the next Armed with a shaky hold on fire and some sharp rocks Homo erectus incredibly survived for over 1 5 million years much longer than our own species Homo sapiens has been on Earth Tell tale marks on fossil bones show that the lives of these early humans were brutal ruled by hunger and who could strike the hardest blow yet there are fleeting glimpses of human compassion as well The small brain of Homo erectus and its strangely unchanging culture indicate that the species could not talk Part of that primitive culture included ritualized aggression to which the extremely thick skulls of Homo erectus bear mute witness Both a vivid recreation of the unimagined way of life of a prehistoric species so similar yet so unlike us and a fascinating exposition of how modern multidisciplinary research can test hypotheses in human evolution *Dragon Bone Hill* is science writing at its best

Discourses of Race and Rising China Yinghong Cheng, 2019-02-06 This book is a critical study of the development of a racialised nationalism in China exploring its unique characteristics and internal tensions and connecting it to other forms of global racism The growth of this discourse is contextualised within the party state s political agenda to seek legitimacy in various groups efforts to carve their demands in a divided national community and has directly affected identity politics across the global diasporic Chinese community While there remains considerable debate in both academic literature and popular discussion about how the concept of race is relevant to Chinese expressions of identity Cheng makes a forceful case for the appropriateness of biological and familial narratives of descent for understanding Chinese nationalism today Grounded in a strong conceptual framework and substantiated with rich materials *Discourses of Race and Rising China* will be an important contribution to international studies of racism and will appeal to academics and students of contemporary China historians of modern China and those who work in the fields of critical race ethnicity and cultural studies

U.S. Navy Medicine , 1983 **China: An Interpretive History** , *China: An Interpretive History* Joseph Levenson, Franz Schurmann, 2023-11-15 *China: An Interpretive History* offers a compelling exploration of the origins of Chinese civilization delving into the fascinating intersection of historical fact and cultural narrative Beginning with the discovery of Peking Man this book examines the deep geological and evolutionary roots that predate Chinese history and raises profound questions about the nature of historical continuity By tracing the line from prehistoric human remains to the emergence of a distinctly Chinese cultural identity it illustrates how history as a retrospective framework imposes meaning on ancient artifacts and events bridging the abstract with the culturally specific

The book's thought provoking narrative does not merely recount events but interrogates the very concept of history itself distinguishing biological evolution from cultural heritage. It invites readers to consider how Peking Man, an evolutionary figure, becomes a historical one only through the lens of later cultural achievements and societal developments. This dynamic interplay between geography, anthropology, and the shaping of historical consciousness makes this work an essential resource for understanding how civilizations root themselves in the past while projecting their unique identities into the present.
