Population and Society Dr. Gajanafar Alam,2021-09-15 Population explosion leads to social problems like unemployment poverty low economic development etc The social development which is determined by better health care facilities education and high literacy rate and improvement in the standard of living of people are adversely affected due to high population The benefits of government schemes do not reach the masses A vast share of GDP is required to keep the level of per capita income constant The weaker sections of the population do not get the share of the development For equitable social development the government should aim not only at controlling the unregulated human growth of numerical strength but also at checking the unregulated movement of the population and increasing the concentration of people in the urbanized areas and providing adequate living space and other facilities These goals have to be jointly linked with the formulation and implementation of policies aimed at population regulation and planning for harnessing both natural and human resources Thus only population growth per se may not be perceived as a problem but its relation with the availability of resources may be viewed with great concern This book will help to some extent to be a well informed person on the Indian demographic situation to the readers in general This will be a source of knowledge and a resource book in the discipline of population studies for academicians University teachers and researchers administrators programme personnel executives field functionaries and other general readers who are involved in solving the gigantic and number one national population problem in different capacities in India **Diversity and Society** Joseph F. Healey,Andi Stepnick,2019-07-23 The author is a proud sponsor of the 2020 SAGE Keith Roberts Teaching Innovations Award enabling graduate students and early career faculty to attend the annual ASA pre conference teaching and learning workshop The text offers a comprehensive study of historical evolution of race ethnicity and gender in the U S and makes effective use of contemporary including open access sources of information about these issues My students find the reflective questions and related activities to be instructive and engaging Cheryl Renee Gooch Arts and Humanities Department Cumberland County College Adapted from the bestselling Race Ethnicity Gender and Class by Joseph F Healey and Andi Stepnick Diversity and Society provides a brief overview of inter group relations in the U S In ten succinct chapters Healey and Stepnick explain concepts and theories about dominant minority relations examine historical and contemporary immigration to the U S and narrate the experiences of the largest

racial and ethnic minorities The Sixth Edition of this bestseller explores a variety of experiences within groups paying particular attention to the intersection of gender with race and ethnicity While the focus is on minority groups in the U S the text also includes comparative cross national coverage of group relations in other societies Updated with the most current trends and patterns in inter group relations this text presents empirical data in an accessible format to show students how minorities are inseparable from the larger American experience Spoils of War in the Arab East Aziz Al-Azmeh, Harout Akdedian, Haian Dukhan, 2024-01-11 Post conflict scenarios are often proposed for Arab countries that have witnessed significant changes and civil wars Yet the plans for reconciliation transitional justice and the return of the displaced often overlook the real conditions that make these recommendations impossible This book provides a critical analysis of current post conflict frameworks for Syria and Iraq Drawing on empirical research the book shows that reconciliation and reconstruction scenarios need to be considered alongside the realities on the ground It argues that Iraq and Syria exist in a condition of conflict transformation rather than of conflict termination because the extreme changes that accompanied these countries into war continue long after the conflicts end Furthermore the chapters highlight why experts should not seek solutions in culturalist terms and ancestral enmities or rely on the wartime status quo Rather they should look to the specific military political economic and socio cultural conditions that require different solutions A critical analysis of existing post conflict frameworks their applicability and their potential outcomes in Iraq and Syria the book is a vital contribution to post conflict studies It highlights the need for new approaches to reconstruction and peacebuilding in Arab countries and points to how they should be found *United Arab Emirates Society in the Twenty-first Century* Prof. Jamal Sanad Al-Suwaidi, 2018-01-01 In light of the radical transformations and changes that the world witnesses on all levels research in the field of social issues is gaining increased prominence particularly amid different sources of danger that threaten social security in countries primarily due changes in the nature of warfare and conflicts the spread of extremism and terrorism and the emergence of religious sectarian doctrinal and racial tensions Moreover the unprecedented technological transformations in light of the fourth industrial revolution 4IR with its social effects can compromise the stability and security of societies Therefore in this book I focus on studying UAE society in an ever changing world from a comprehensive perspective that encompasses political security economic social cultural and technological aspects From an early stage in my academic career I have given special attention in my books research papers and studies to issues of national security at the forefront of which is social security This stems from my belief that social security is one of the most important and critical aspects of national security in its comprehensive sense Furthermore social security is also closely associated with all other political economic cultural and stability aspects of national security This book includes seven chapters along with an introduction and a conclusion Chapter One deals with the experience of the Union of the UAE and how it has affected UAE society Chapter Two deals with UAE society in a changing regional and international environment Chapter Three examines

the UAE's economic vision to prepare for the post oil era which is based primarily on knowledge and innovation Chapter Four addresses education and its importance in building national human capacities and resources Chapter Five discusses national identity its significance and sources of threat Chapter Six examines balanced political development and the guarantee it gives to enable political stability in the UAE The last chapter Chapter Seven discusses UAE society and global technological changes in terms of challenges and opportunities The book ends with a conclusion in which I call for more attention to studies pertaining to UAE society in the coming years because the current changes in the local regional and global environments have several implications for this society Therefore it is important to study these implications and anticipate their future trajectories
