Global China: Internal And External Reaches Bryan Pak Nung Wong, Joseph Yu-shek Cheng, 2015-03-26 After two decades since the disintegration of Soviet Union in 1991 the largest and

the most populist socialist state the People's Republic of China does not only manage to stay intact but has also emerged as the second largest economy in the world. Moreover its political, diplomatic, military and cultural reaches have been extended to various parts of the world. There have been many factual and fictional discussions and debates in the public domains on China's apparent rise either as a threat or an opportunity. This book will take on these discussions and debates to provide theory informed empirical studies regarding a few research questions. We consider that the idea and concept of Global China is perhaps the most viable analytical instrument to capture such increasingly complex phenomena in association with the rise of China.

The Political Impact of African Military Leaders Sabella Ogbobode Abidde, Felix Kumah-Abiwu, 2023-06-28 This edited volume examines the cases of four African military leaders who had enormous impact on the continent and beyond. These military officers and later heads of state Jerry Rawlings of Ghana, Moammar Gaddafi of Libya, Thomas Sankara of Burkina Faso and Gamal Abdel Nasser of Egypt were provocative and polarizing figures beloved domestically but mostly viewed with suspicion and hostility by foreign governments. This volume studies these leaders as a group engaging in a critical but systematic examination of their personalities, leadership styles, official performance legacies and their continuing impact on the future and political destiny of the continent. Providing a survey of controversial but important African political figures, this volume will be of use to scholars and students in the social sciences, especially those interested in African history, African studies, military science, Black studies, political science, leadership studies and the politics of developing nations.

Knowledge Matters Diana Rhoten, Craig Calhoun, 2011-02-22 Universities Are Changing Around The World In China and Africa there is massive expansion while many of America s greatest public universities are experiencing major budget cuts In Latin America universities have been affected by dictatorships and privatization but are now growing in ways central to economic development In Europe universities built as state institutions are being told to raise more money from private sources and are being reorganized so they will compete better in global rankings In this context clarity about the public mission of universities is vital yet it is lacking both outside and inside academia When universities educate students is this simply a private benefit because it advances their careers Or is it a public good because informed citizens are integral to democracy and essential for national economic development How important is equal opportunity What are the effects of hierarchy Who pays now and who will pay tomorrow Should the results of academic research be private property for sale or openly available for public use Who sets the university research agendas What kinds of scholarship flourish and what kinds

suffer Should producing competitive research take priority over educating competent students Do international rankings distort these and other university priorities or provide needed objective assessments What are the university's roles and responsibilities in terms of knowledge creation and dissemination today And tomorrow In this collection scholars report from Asia Africa Europe Latin America and North America They confront the realities and challenges of higher education as it is torn between multiple public and private agendas This comparative perspective illuminates both the continuing importance of the university's public mission and the pressing need to clarify it Diana Rhoten is the founder and director of the Knowledge Institutions Program and the Digital Media and Learning Project at the Social Science Research Council She has published in a range of academic journals and advises cultural scientific and educational institutions on issues of organizational design creative collaboration and adaptive change Craig Calhoun is president of the Social Science Research Council and University Professor of the Social Sciences at New York University He has served in a variety of academic leadership positions including as a dean and has conducted research in many international settings His most recent book is an edited collection Robert K Merton *Sociology of Science and Sociology as Science* Columbia University Press 2005
