Science Voyage:

The art of science John Kean, 2013-06-03 The Art of Science presents the best of Museum Victoria's remarkable collection of natural history artworks currently on a national touring exhibition of the same name. Based on the museum's collection of rare books, field sketches, art works, and taxonomic studies, the book features some of the most exquisite rare and important illustrations of flora and fauna ever created. In addition to the artworks which tell a story of exploration, discovery, painstaking research, and documentation, the book also traces the lives, curiosities, and observations of the artists and explorers whom throughout history often worked against the odds to gather and record. The Art of Science is a unique collection of exquisite images that will enrich our understanding of the history of art and science, the natural world, and the miracle of human perception.

Popular Lectures on Science and Art Dionysius Lardner, 1846 *The Universal Library Or, Compleat Summary of Science* Henry Curzon, 1712 **Science** John Michels, 1903 **Travel Narratives, the New Science, and**

Literary Discourse, 1569-1750 Judy A. Hayden, 2016-03-03 The focus of this volume is the intersection and the cross fertilization between the travel narrative, literary discourse, and the New Philosophy in the early modern to early eighteenth century historical periods. Contributors examine how in an historical era which realized an emphasis on nation and during a time when exploration was laying the foundation for empire, science and the literary discourse of the travel narrative become intrinsically linked. Together, the essays in this collection point out the way in which travel narratives reflect the anxiety from changes brought about through the discoveries of the new knowledge and the way this knowledge in turn provided a new and more complex understanding of the expanding world in which the writers lived. The worlds in this text are many for no world is monomial from the antipodes to the New World, from the heavens to the seas, and from fictional worlds to the world which contains and/or constructs one's nation and empire. All of these essays demonstrate the manner in which the New Philosophy dramatically changed literary discourse. *Report ... Of The British Association For The Advancement Of Science*, 1841

Victorian Science and Literature, Part II vol 7 Gowan Dawson, Bernard Lightman, Claire Brock, Marwa Elshakry, Sujit Sivasundaram, Ralph O'Connor, Roger Luckhurst, Justin Sausman, 2024-08-07 This eight volume reset edition in two parts collects rare primary sources on Victorian science, literature, and culture. The sources cover both scientific writing that has an aesthetic component, what might be called the literature of science, and more overtly literary texts that deal with scientific matters.

Science in the Romantic Era

David Knight, 2016-03-31 First published in 1998 The Romantic Era was a time when society religion and other beliefs and science were all in flux The idea that the universe was a great clock and that men were little clocks all built by a divine watchmaker was giving way to a more dynamic and pantheistic way of thinking A new language was invented for chemistry replacing metaphor with algebra and scientific illustration came to play the role of a visual language deeply involved with theory A scientific community came gradually into being as the 19th century wore on The papers which compose this book have appeared in a wide range of books and journals together with the new introduction they illuminate science and its context in the Romantic Era and follow its effects in the 19th century
