Science War And Peace:

The Science of War and Peace Robin Clarke, 1971 **War and peace** graf Leo Tolstoy, 1899 **Science, War and Peace** Jean Jacques Salomon, 1990 **War, Peace and the Military** Franz Kernic, 2023-03-17 This book is a comprehensive analysis of the various social science approaches to explaining and interpreting war peace and the military Its central aim is to trace and reconstruct those basic assumptions constructed and thought processes undertaken by modern social sciences in their research and conceptualization of military violence and the use of force In addition to such reconstruction the aim is also to enquire into the preconditions of such thought This study therefore eschews the development of an explicit strategy in the sense of a research strategy but instead is much more concerned with thinking about its subject matter by means of re thinking and reflecting upon different theoretical approaches and problems The investigation includes a critical reexamination of the tradition of military sociological research from the beginning of modern sociology to late twentieth century theoretical approaches regarding the security focused and or war driven aspects of modern society **New Frontiers in Conflict Management, Peace Economics and Peace Science** Madhumita Chatterji, Partha Gangopadhyay, 2021-02-15 This volume will improve our collective understanding of how to fight humanity s persistent and tragic problems with conflicts climate shocks and disasters The authors of this volume will offer deep insights from their research into the nature of evolving challenges to both global and local sustainability **Peace Science** Partha Gangopadhyay, Manas Chatterji, 2009-08-22 The process of globalisation has its own dynamics and several serious flaws that have resulted in significant economic political and social imbalances in the global political economy This book examines the implications of these imbalances for achieving lasting global peace **Frontiers of Peace Economics and Peace Science** Manas Chatterji, Chen Bo, Rameshwar Mishra, 2011-06-17 A considerable amount of work has been conducted in the field of peace studies conflict management peace science in economics sociology anthropology and management This title presents research with an emphasis on theoretical and mathematical constructs in the area of peace economics peace science

consciousness caring and creativity It brings together findings largely overlooked from the natural and social sciences debunking the popular idea that we are hard wired for selfishness war rape and greed Its groundbreaking new approach reveals connections between disturbing trends like climate change denial and regressions to strongman rule Moving past right vs left religious vs secular Eastern vs Western and other familiar categories that do not include our formative parent child and gender relations it looks at where societies fall on the partnership domination scale On one end is the domination system that ranks man over man man over woman race over race and man over nature On the other end is the more peaceful egalitarian gender balanced and sustainable partnership system Nurturing Our Humanity explores how behaviors values and socio economic institutions develop differently in these two environments documents how this impacts nothing less than how our brains develop examines cultures from this new perspective including societies that for millennia oriented toward partnership and proposes actions supporting the contemporary movement in this more life sustaining and enhancing direction It shows how through today s ever more fearful frenzied and greed driven technologies of destruction and exploitation the domination system may lead us to an evolutionary dead end A more equitable and sustainable way of life is biologically possible and culturally attainable we can change our course War, Peace and International Relations Colin S.
