Education United States. Congress. House. Committee on Government Operations, 1965 Religion Vs. Science Elaine Howard Ecklund, Christopher P. Scheitle, 2018 At the end of a five year journey to find out what religious Americans think about science Ecklund and Scheitle emerge with the real story of the relationship between science and religion in American culture Based on the most comprehensive survey ever done representing a range of religious traditions and faith positions Religion vs Science is a story that is more nuanced and complex than the media and pundits would lead us to believe The way religious Americans approach science is shaped by two fundamental questions What does science mean for the existence and activity of God What does science mean for the sacredness of humanity How these questions play out as individual believers think about science both challenges stereotypes and highlights the real tensions between religion and science Ecklund and Scheitle interrogate the widespread myths that religious people dislike science and scientists and deny scientific theories Religion vs Science is a definitive statement on a timely popular subject Rather than a highly conceptual approach to historical debates philosophies or personal opinions Ecklund and Scheitle give readers a facts on the ground empirical look at what religious Americans really understand and think about science The American Academic Profession Stephen Steinberg, 2017-11-30 This book covers well the issues and problems of the U S academic profession in the second half of the twentieth century Contemporary Science The tale of the American academic profession that large company of men and women unprecedented in its size and diversity needs to be written A large historical literature on America s colleges and universities exists but much of it is unashamedly hagiographic On the other hand more critical works see American universities as being in dire need of massive reform This charge is not sustained by the contributors to The American Academic Profession who hope to shatter the code of silence that passes for discretion by focusing on the forces that have conspired to create the American academic profession Graubard includes contributions from important scholars around the world How the Academic Profession is Changing by Arthur Levine Small Worlds Different Worlds The Uniqueness and Troubles of American Academic Professions by Burton R Clark The Elusive Academic Profession Complexity and Change by Francis Oakley Uncertainties in the Changing Academic Profession by Walter E Massey Stewards of Opportunity America s Public Community Colleges by Patrick M Callan Public Universities as Academic Workplaces by Patricia J Gumpert Survival of the Fittest Postgraduate Education and the Professoriate at the Fin de Sicle by R M Douglas Reflections on the Culture Wars by Eugene Goodheart A Blow Is Like an Instrument by Charles Bernstein The Science Wars and the Future of the American Academic Profession by Jay A Labinger The Scientist as Academic by Cheryl B Leggon The Place of Knowledge in the American Academic Profession by Sheldon Rothblatt Border Crossings Organizational Boundaries and Challenges to the American Professoriate by Theodore R Mitchell The Development of Information Technology in American Higher Education by Martin Trow and An International Academic Crisis The American Professoriate in Comparative Perspective by Philip G Altbach The American Academic Profession is not sanguine about what is currently happening in higher education or what it

imagines the future portends It simply asks the question Can a society truly understand its universities and colleges when it has moved too quickly from uncritical admiration to uniformed and ungenerous complaint This volume intends to dispel some long persistent myths in favor of objective truth It is a must for anyone interested in academic problems for those who work in higher education and for everyone interested in American ideas traditions and social and intellectual history Stephen R Graubard is editor of the American Academy of Arts and Sciences and its journal Daedalus and professor of history emeritus at Brown University

Science, Technology, and Society Sal P. Restivo, 2005 Emphasizing an interdisciplinary and international coverage of the functions and effects of science and technology in society and culture Science Technology and Society B contains over 130 A to Z signed articles written by major scholars and experts from academic and scientific institutions and institutes worldwide Each article is accompanied by a selected bibliography Other features include extensive cross referencing throughout a directory of contributors and an extensive topical index
