Fascism in Britain and the Extreme Right Vision Patrick G. Zander, 2025-09-02 This book is a new assessment of the ideology and political program of Britain's fascist and extreme right wing community during the interwar period 1919 1940 It examines this group's belief system as it clustered around three major preoccupations Modernization Empire and War In doing so the book identifies many inconsistencies contradictions and moral failings which contributed to the failure of the far right tendency in the interwar years The numerous beliefs and policies examined all point to a movement that was determined to return Britain to the levels of global power and international leadership it had once

enjoyed but by means of policies of disengagement and isolation As such it provides insight into the resurgence of the extreme right today

Art, Science, and the Politics of Knowledge Hannah Star Rogers, 2022-05-17 How the tools of STS can be used to understand art and science and the practices of these knowledge making communities In Art Science and the Politics of Knowledge Hannah Star Rogers suggests that art and science are not as different from each other as we might assume She shows how the tools of science and technology studies STS can be applied to artistic practice offering new ways of thinking about people and objects that have largely fallen outside the scope of STS research Arguing that the categories of art and science are labels with specific powers to order social worlds and that art and science are best understood as networks that produce knowledge Rogers shows through a series of cases the similarities and overlapping practices of these knowledge communities The cases which range from nineteenth century artisans to contemporary bioartists illustrate how art can provide the basis for a new subdiscipline called art science and technology studies ASTS offering hybrid tools for investigating art science collaborations Rogers s subjects include the work of father and son glassblowers the Blaschkas whose glass models produced in the nineteenth century for use in biological classification are now displayed as works of art the physics photographs of documentary photographer Berenice Abbott and a bioart lab that produces work functioning as both artwork and scientific output Finally Rogers an STS scholar and contemporary art science curator draws on her own work to consider the concept of curation as a form of critical analysis
