Scientometric Indicators: A 32-country Comparative Evaluation Of Publishing Performance And Citation Impact Tibor Braun,Andras Peter Schubert,W Glanzel,1985-07-01 After a brief account of the recent trends in science indicators research the authors propose a coherent system of scientometric indicators These indicators are based on the publication performance of each country in 8 science fields and reflect the versatility of the impact of the publication activity in the country in question The special aim of the indicator system is to characterize and compare the contribution of research intensive medium sized and small countries to the world s overall scientific research activity Indicator values for 32 such countries are reported and evaluated Relations to other economic social and science indicators are discussed This book is intended both as a data source and an analytic tool for specialists engaged in science policy science management science indicators research scientometrics and other areas of science as well as a tool for practising research scientists

Handbook of Quantitative Studies of Science and Technology A.F.J. van Raan,2013-10-22 Quantitative studies of science and technology represent the research field of utilization of mathematical statistical and data analytical methods and techniques for gathering handling interpreting and predicting a variety of features of the science and technology enterprise such as performance development and dynamics The field has both strongly developed applied research as well as basic research characteristics The principal purpose of this handbook is to present this wide range of topics in sufficient depth to give readers a reasonably systematic understanding of the domain of contemporary quantitative studies of science and technology a domain which incorporates theory methods and techniques and applications In addressing this domain the handbook aims at different groups of readers those conducting research in the field of science and technology including graduate students and those who are to use results of the work presented in this book Creating Value with Science and Technology Eliezer Geisler,2001-08-30 Do science and technology create value for society and the economy and how might one go about measuring it How do we evaluate its benefits Can we even be certain that there are benefits Geisler argues that there are benefits and that they outweigh in value the negative impacts that inevitably accompany them His revolutionary new book goes on to show that they can also be measured and evaluated and in one volume all of the existing knowledge on how to do it is compiled then Geisler s own methods are offered The result is a compelling argument that the value of science and technology in our lives has indeed been positive and that the economic well being of all individuals organizations and nations rests upon them Geisler starts off by describing his conceptual framework for the evaluation of science and technology and the impact and benefits that proceed from them He discusses the nature of evaluation in general terms and then in the specific context of science technology and innovation together He reviews the state of our present knowledge and assesses the nature of value creation itself Throughout Geisler remains fixed on his driving thesis Although there are

certainly some negative impacts from science and technology on the whole the results of its outputs are positive He shows how they have contributed to a range of activities and institutions particularly to the improvement of health and human welfare worldwide Finally after discussing the theories of evaluation he gets down to the practice providing readers with a way to assess science and technological innovations for themselves

Evaluating R&D Impacts: Methods and Practice Barry Bozeman, Julia Melkers, 2013-06-29 A critical issue in research and development R D management is the structure and use of evaluative efforts for R D programs The book introduces the different methods that may be used in R D evaluation and then illustrates these methods by describing actual evaluation in practice using those methods The book is divided into two sections The first section provides an introduction and details on several popular methodologies used in the evaluation of research and development activities The second half of the book focuses on evaluation in practice and is comprised of several chapters offering the perspectives of individuals in different types of organizations The book concludes with an annotated bibliography of selected R D evaluation literature focusing on post 1985 literature on research evaluation

Scholarly Content and Its Evolution by Scientometric Indicators: Emerging Research and Opportunities Wani, Zahid Ashraf, Zainab, Tazeem, 2018-08-03 The twenty first century brought unique developments in science and technology Research surged as individuals sought to uncover hidden knowledge leading to the introduction of research evaluation to ensure precise and fair research output and dissemination Scholarly Content and Its Evolution by Scientometric Indicators Emerging Research and Opportunities is a pivotal reference source that provides vital research on the application of research evaluation specifically through the lens of scientometrics While highlighting topics such as bibliometrics and the h index this publication explores a full range of research indicators available for the evaluation and assessment of scientific literature This book is ideally designed for scholars professors academicians researchers and graduate level students seeking current research on metric science

Springer Handbook of Science and Technology Indicators Wolfgang Glänzel, Henk F. Moed, Ulrich Schmoch, Mike Thelwall, 2019-10-30 This handbook presents the state of the art of quantitative methods and models to understand and assess the science and technology system Focusing on various aspects of the development and application of indicators derived from data on scholarly publications patents and electronic communications the individual chapters written by leading experts discuss theoretical and methodological issues illustrate applications highlight their policy context and relevance and point to future research directions A substantial portion of the book is dedicated to detailed descriptions and analyses of data sources presenting both traditional and advanced approaches It addresses the main bibliographic metrics and indexes such as the journal impact factor and the h index as well as altmetric and webometric indicators and science mapping techniques on different levels of aggregation and in the context of their value for the assessment of research performance as well as their impact on research policy and society It also presents and critically discusses various national research evaluation systems Complementing the sections reflecting on the science

system the technology section includes multiple chapters that explain different aspects of patent statistics patent classification and database search methods to retrieve patent related information In addition it examines the relevance of trademarks and standards as additional technological indicators The Springer Handbook of Science and Technology Indicators is an invaluable resource for practitioners scientists and policy makers wanting a systematic and thorough analysis of the potential and limitations of the various approaches to assess research and research performance **Pharmacology**

Luca Gallelli,2012-03-14 The history of pharmacology travels together to history of scientific method and the latest frontiers of pharmacology open a new world in the search of drugs New technologies and continuing progress in the field of pharmacology has also changed radically the way of designing a new drug In fact modern drug discovery is based on deep knowledge of the disease and of both cellular and molecular mechanisms involved in its development The purpose of this book was to give a new idea from the beginning of the pharmacology starting from pharmacodynamic and reaching the new field of pharmacogenetic and ethnopharmacology *Models of Science Dynamics* Andrea Scharnhorst,Katy Börner,Peter van den Besselaar,2012-01-23 Models of Science Dynamics aims to capture the structure and evolution of science the emerging arena in which scholars science and the communication of science become themselves the basic objects of research In order to capture the essence of phenomena as diverse as the structure of co authorship networks or the evolution of citation diffusion patterns such models can be represented by conceptual models based on historical and ethnographic observations mathematical descriptions of measurable phenomena or computational algorithms Despite its evident importance the mathematical modeling of science still lacks a unifying framework and a comprehensive study of the topic This volume fills this gap reviewing and describing major threads in the mathematical modeling of science dynamics for a wider academic and professional audience The model classes presented cover stochastic and statistical models system dynamics approaches agent based simulations population dynamics models and complex network models The book comprises an introduction and a foundational chapter that defines and operationalizes terminology used in the study of science as well as a review chapter that discusses the history of mathematical approaches to modeling science from an algorithmic historiography perspective It concludes with a survey of remaining challenges for future science models and their relevance for science and science policy Horizons of Phenomenology Jeff Yoshimi,Philip Walsh,Patrick Londen,2023-04-11 This is an open access book which explores phenomenology as both an exceptionally diverse movement in philosophy as well as an active research method that crosses disciplinary boundaries The volume brings together lively overviews of major areas and schools of phenomenology as well as the most recent applications across a range of fields The first part reviews the state of the art in various areas of contemporary phenomenology including several distinct schools of Husserl and Heidegger scholarship as well as approaches derived from Merleau Ponty de Beauvoir Fanon and others An innovative quantitative analysis of citation networks provides rich visualizations of the field as a whole The second part showcases phenomenology

as a living discipline that can advance research in other areas While some areas of interaction between phenomenology and other disciplines are by now well established e g cognitive science this volume sheds light on newer areas of application The goal is to move beyond discussions of philosophical method and highlight scholars who are actually doing phenomenology in a variety of areas including Embodiment and questions of gender race and identity The arts visual art literature architecture and Archaeology and anthropology This volume offers a concise introduction to cutting edge phenomenological research and is suitable for both students and specialists

Cardozo Richard A. Posner, 2019-08-05 What makes a great judge How are reputations forged Why do some reputations endure while others crumble And how can we know whether a reputation is fairly deserved In this ambitious book Richard Posner confronts these questions in the case of Benjamin Cardozo The result is both a revealing portrait of one of the most influential legal minds of our century and a model for a new kind of study a balanced objective critical assessment of a judicial career The present compact and unflaggingly interesting volume is a full bodied scholarly biography It is illuminating in itself and will serve as a significant contribution Paul A Freund New York Times Book Review
