Hopwood, 2015-06-30 Intended to support the national initiative to strengthen learning in areas of science technology engineering and mathematics this book helps librarians who work with youth in school and public libraries to build better collections and more effectively use these collections through readers advisory and programming A versatile and multi faceted guide Best STEM Resources for NextGen Scientists The Essential Selection and User s Guide serves as a readers advisory and collection development resource for youth services and school librarians seeking to bring STEM related titles into their collections and introduce teachers and young readers to them This book not only guides readers to hundreds of the best STEM related titles fiction and non fiction printed materials as well as apps DVDs websites and games it also includes related activities or programming ideas to help promote the use of the collection to patrons or students in storytime afterschool programs or passive library programs After a detailed discussion of the importance of STEM and the opportunities librarians have for involvement the book lists and describes best STEM resources for young learners Resources are organized according to the reading audiences for which they are intended from toddlers through teens and the book includes annotated lists of both fiction and nonfiction STEM titles as well as graphic novels digital products and online resources In addition the author offers a selection of professional readings for librarians and media specialists who wish to further expand their knowledge *Minding Animals* Marc Bekoff, 2002-05-02 Thinking bees ice skating buffaloes dreaming rats happy foxes ecstatic elephants despondent dolphins in *Minding Animals* Marc Bekoff takes us on an exhilarating tour of the emotional and mental world of animals where we meet creatures who do amazing things and whose lives are filled with mysteries Following in the footsteps of Konrad Lorenz and Niko Tinbergen Bekoff has spent the last 30 years studying

animals of every stripe from coyotes in Wyoming to penguins in Antarctica. He draws on this vast experience as well as on the observations of other naturalists to offer readers fascinating stories of animal behavior including grooming and gossip, self-medication, feeding patterns, dreaming, dominance and mating behavior. Many of these stories are truly incredible: chimpanzees medicating themselves with herbal remedies, elephants clearly mourning a dead group member, but this is not simply a catalog of amazing animal tales. For Bekoff also sheds light on many of the more serious issues surrounding animals. He offers a thought-provoking look at animal cognition, intelligence, and consciousness, and he presents vivid examples of animal passions, highlighting the deep emotional lives of our animal kin. All this serves as background for his thoughtful conclusions about humility and animal protection and animal well-being, where he urges a new paradigm of respect, grace, compassion, and love for all animals. Marc Bekoff has gone deep into the minds, hearts, spirits, and souls of animals, giving him profound insight into their lives and no small insight into ours. *Minding Animals* is an important contribution to our understanding of animal consciousness, a major work that will be a must-read for anyone who loves nature. *Boost Your STEAM Program with Great Literature and Activities* Liz Knowles, Martha Smith, 2018-06-01 You've created a STEAM program in your library, but how do you work literacy into the curriculum? With this collection of resource recommendations, direction for program development, and activities, you'll have students reading proficiently in no time. Many schools and libraries are implementing STEAM programs in the school library makerspace to promote problem-solving by allowing students to create their own solutions to a problem through trial and error. In order to enhance literacy development in the STEAM program, however, they need resources for integrating literature into the curriculum. In this collection of resources for doing just that, veteran education professionals and practiced coauthors Liz Knowles and Martha Smith bring readers over eight hundred recommended and annotated books and web resources selected based on research on successfully integrating STEAM and literacy programs and organized by the five STEAM areas. Titles are complemented by discussion questions and problem-solving activities that will aid educators in both adding and using the best literature to their STEAM programs for encouraging learning. In addition to promoting literacy, these resources will help to develop creativity, lateral thinking skills, and confidence in students. **Developing Fluent Readers** Melanie R. Kuhn, Lorell Levy, 2015-01-12 Viewing fluency as a bridge between foundational skills and open-ended learning, this book guides teachers through effective instruction and assessment of fluent reading skills in the primary grades. Fluency's relationship to phonological awareness, phonics, and print concepts is explained, and practical methods are shared for integrating fluency instruction in a literacy curriculum grounded in the Common Core State Standards. CCSS Classroom examples, weekly lesson plans, and extensive lists of recommended texts add to the book's utility for teachers. **Carnegie**, 2007 [Index de Périodiques Canadiens](#), 2002 [Oh, Ick!](#) Joy Masoff, 2016-11-01 From the bestselling author of *Oh Yuck* and *Oh Yikes*, with over 1.25 million copies in print, here is an A-Z compendium of hands-on grossness. The role of hypoxia for the development of diabetic nephropathy Stephanie Franzén, 2016-03-09

Diabetic nephropathy is one of the most common causes of end stage renal disease and develops in approximately one third of all diabetes patients Disease progression is characterized by deteriorating glomerular filtration rate and escalating urinary albumin protein excretion both are used as clinical markers for disease progression Recently it has been proposed that intrarenal hypoxia is a unifying mechanism for chronic kidney disease including diabetic nephropathy Several mechanistic pathways have been linked to the development of intrarenal hypoxia and diabetic nephropathy including increased angiotensin II signaling oxidative stress and hyperglycemia per se Furthermore pathological endothelin signaling has recently emerged as a possible contributing factor for chronic kidney disease and diabetic nephropathy The overall aims of this thesis were therefore to determine the temporal relationship between development of intrarenal hypoxia and kidney disease as well as elucidate the potential link between endothelin signaling intrarenal hypoxia and kidney disease in experimental insulinopenic diabetes It is well established that different mouse strains have different susceptibility for kidney and cardiovascular disease The first step was therefore to compare four commonly used mouse strains with regards to development of kidney disease after onset of insulinopenic diabetes From the results of this study we concluded that the NMRI mouse strain has a disease progression closest to the human disease and this strain was chosen in the subsequent studies in mice The next step was to adapt and optimize a suitable method for repetitive measurements of intrarenal oxygen tension during the course of disease development Electron paramagnetic resonance EPR oximetry had previously been used in tumor biology and was now adapted and optimized for measurements of kidney oxygenation in our diabetic mouse model EPR oximetry in normoglycemic control mice recorded cortical oxygen tension values similar to previous reports using

invasive techniques Surprisingly intrarenal hypoxia developed already within the first 72h after induction of hyperglycemia and persisted throughout the two week study period Importantly this was well before albuminuria developed The final part of this thesis was to investigate the role of endothelin signaling for the intrarenal hypoxia in a diabetic rat model Endothelin 1 signals via two distinctly different receptor mediated pathways In normal physiology endothelin 1 binding to endothelin receptor type A ETA induces vasoconstriction which can be blocked by the specific ETA antagonist BQ123 whereas endothelin 1 binding to endothelin receptor type B ETB induces nitric oxide dependent vasodilation ETB receptors can be selectively activated by Sarafotoxin 6c The results from blocking ETA and activating ETB receptors demonstrated that endothelin 1 signaling via ETA receptors contributes to intrarenal hypoxia in the rat diabetic kidney and that ETB stimulation significantly reduces the diabetes induced intrarenal hypoxia The beneficial effects on kidney oxygen availability in diabetes by ETA blockade or ETB stimulation were mainly linked to hemodynamic improvements rather than direct effects on kidney oxygen consumption or oxidative stress status In conclusion by applying EPR oximetry in a mouse model of insulinopenic diabetes mimicking the human disease we demonstrated intrarenal hypoxia already within the first couple of days after the onset of hyperglycemia which is well before detectable signs of kidney disease development Furthermore blockade of ETA or activation of ETB receptors significantly reduced intrarenal hypoxia in the diabetic kidney These results demonstrate involvement of ETA receptor signaling in diabetes induced intrarenal hypoxia and ETA blockade or ETB activation might provide new therapeutical targets to reduce kidney hypoxia and disease progression in diabetes
