## **Scope And Specificity Linguistik Aktuell V 16:**

**Scope and Specificity** Feng-hsi Liu, 1997-12-11 Scope and Specificity is an investigation of quantifier scope interaction in natural language with special reference to English and Chinese In particular it is concerned with semantic properties of NPs Quantifier scope plays an important role in current theories of syntax and semantics However most studies of quantifier scope are only concerned with the behavior of a small number of quantifiers e g every some all As a result the generalizations made on the basis of these quantifiers often do not hold when a wider range of quantifiers is considered In this study a wide variety of NP types are examined with respect to how they interact with other NPs The key concept explored is that of semantic scope dependency independence NPs are considered according to two properties whether they can induce scope dependency and whether they can be scope dependent By observing how in basic sentences NPs behave with respect to the two properties the author presents a picture of quantifier scope much different from what has been assumed in the literature

**Clitics in Phonology, Morphology and Syntax** Birgit Gerlach, Janet Grijzenhout, 2001-02-01 This book contains fourteen articles that reflect current ideas on the phonology morphology and syntax of clitics It covers the forms and functions of clitics in various typologically diverse languages and presents data from e g European Portuguese Macedonian and Yoruba It extensively deals with the prosodic structure of clitics their morphological status clitic placement and clitic doubling The form and behavior of clitics with respect to tonal phenomena and in verse are discussed in two articles Akinlabi Liberman Reindl Franks Other articles address the prosodic representation of clitics in Irish Green the differences in the acquisition of clitics and strong pronouns in Catalan Escobar Gavarro the similarities between clitics and affixes or words in Romance and Bantu languages Cocchi Crysman Monachesi Ortman Popescu the semantics of clitics in the Greek DP and in Spanish doubling Alexiadou Stavrou Uriagereka and complex problems concerning verbal clitics in Romanian and Balkan languages Legendre Spencer Tomic

**Pronouns □ Grammar and Representation** Horst J. Simon, Heike Wiese, 2002-09-27 The contributions of this thematic collection center around the typology of pronominal paradigms the generation of syntactic and semantic representations for constructions containing pronouns and the neurological underpinnings for linguistic distinctions that are relevant for the production and interpretation of these constructions They come from different theoretical approaches and methodological backgrounds and take into account data from a wide range of Indoeuropean and non Indoeuropean languages Bringing together a cross section of recent research on the grammar and representation of pronouns the volume offers a kaleidoscope of studies united by the common topic of pronouns as a domain of language that exemplarily shows the interaction of different components responsible for computational syntactic and semantic lexical and discourse pragmatic processes

*Studies in Comparative Germanic Syntax* C. Jan-Wouter Zwart, Werner Abraham, 2002-12-31 This volume presents a collection of articles reporting on new research carried out within the theoretical framework of generative grammar on the comparative syntax of the Germanic languages Divided in

four main sections the book focuses on issues of subordination and complementation with emphasis on German Dutch and Danish displacement phenomena discussed in relation with richness of morphology with special attention to English German Dutch and Norwegian as well as presenting more general discussion of the issue language variation and change studying historical English syntax and Frisian contact dialects and the syntax semantics interface viewed from a Germanic perspective addressing ellipsis reflexivity and the behavior of quantifiers Dimensions of Movement Artemis Alexiadou,2002-01-01

This volume presents a collection of papers of recent generative research into the properties of phrasal and feature movement which explore these key syntactic phenomena from different angles and across languages The papers advance or build on models of movement which capitalize either on generalized feature movement or on generalized remnant movement Both these approaches attempt to develop a restrictive theory of movement aiming at a simplification of the operations of the computational system Despite the fact that they are so different technically generalized feature movement and generalized remnant movement both push the theory of movement to the same direction in two important respects a Elimination of head movement b Elimination of covert movement The book is of primary interest to researchers and students in theoretical linguistics and syntactic theory **Asymmetry in Grammar** Anne-Marie Di Sciullo,2003

**Asymmetry in Grammar** Syntax and Semantics brings to fore the centrality of asymmetry in DP VP and CP A finer grained articulation of the DP is proposed and further functional projections for restrictive relatives as well as a refined analyses of case identification and presumptive pronouns The papers on VP discuss further asymmetries among arguments and between arguments and adjuncts Double object constructions specificational copula sentences secondary predicates and the scope properties of adjuncts are discussed in this perspective The papers on CP propose a further articulation of the phrasal projection justifications for Remnant IP movement and an analysis of variation in clause structure asymmetries The papers in semantics support the hypothesis that interpretation is a function of configurational asymmetry The type token information difference is further argued to correspond to the partition between the upper and lower level of the phrase It is also proposed that Point of View Roles are not primitives of the pragmatic component but are head dependent categories Configurationality is further argued to be required to distinguish contrastive from non contrastive Topic Compositionality is proposed to explain cross linguistic variations in the selectional behavior of typologically different languages The papers in syntax include contributions from Antonia Androutsopoulou and Manuel Espinosa Echevarra a Dana Isac Edit Jakab Cedric Boeckx Julie Anne Legate Maria Cristina Cuervo Jacqueline Guéron Niina Zhang Thomas Ernst Manuela Ambar Jean Yves Pollock Anna Maria Di Sciullo Ilena Paul and Stanca Somesfalean The papers on semantics include contributions of Greg Carlson Peggy Speas and Carol Tenny Chungmin Lee and James Pustejovsky **The Verb in Turkish** Eser Erguvanl? Taylan,2002-02-21 This book is a collection of articles on the properties of the verb in Turkish as the core element of clause structure by linguists from different parts of the world Articles present the most recent analyses on the Turkish language carried out in various theoretical orientations

within the functional formal range The topics researched in the contributions center around properties of verbal inflection as the morphological means to express temporal aspectual and modal notions and the implications of these morphological configurations to syntactic theory     **Arguments and Case** Eric J. Reuland, 2000 The ideas presented by the contributions in this volume originated in a workshop on Burzio's generalization Burzio's Generalization BG states that a verb which does not assign an external theta role to its subject does not assign structural accusative Case to an object and conversely It connects cross linguistic similarities between e.g. passives raising verbs and unaccusatives However it does so by linking very different properties of a predicate This raises fundamental questions about its theoretical status The contributions in this volume explore BG's theoretical basis A consensus emerges that BG is in fact an epiphenomenon due to the interaction of different principles of grammar Moreover the contributions show a striking convergence as to how BG is ultimately derived The results obtained make a significant contribution to the further development of theories of Case and thematic relations

*Issues in Formal German(ic) Typology* Werner Abraham, C. Jan-Wouter Zwart, 2002 This book takes up a variety of general syntactic topics which either yield different solutions in German in particular or which lead to different conclusions for theory formation One of the main topics is the fact that languages that allow for extensive scrambling between the two verbal poles V2 and Vlast need to integrate discourse functions like thema and rhema into the grammatical description This is attempted in terms of Minimalism thus extending the functional domain Special attention is given to the asymmetrical scrambling behavior of indefinites vs. definites and their semantic interpretation Related topics are Transitive expletive sentences types of existential sentences with either BE or HAVE the that trace phenomenon and its semantics negative polarity items ellipsis and gapping passivization double negation all of which have extensive effects both on distributional behavior and semantic disambiguation reaching far beyond effects observable in English with its rigid unscrambable word order     Empty Categories in Sentence Processing Sam Featherston, 2001 Annotation Featherston Eberhard Karls U. Tübingen presents the results of three experiments on the role of empty categories phonetically null place holders for locally absent constituents in sentence processing The experiments used probe recognition sentence matching and event related potentials as well as self-paced reading Coverage includes a discussion of the predictions of both Principles and Parameters Theory and Head Driven Phrase Structure Grammar Annotation c Book News Inc Portland OR booknews.com
