Scorched Earth The Militarys Assault:

Scorched Earth William Thomas,1995-01-01 **Ecocide** Franz Brosch,2002-09-20 We live in an age of ecocide Changes of enormous ecological significance are occurring on our planet the ozone layer is beginning to disintegrate Since 1970 the world s forests have almost halved A quarter of the world s fish have been depleted 70% of biologists believe the world is now in the midst of the fastest mass extinction of species in the planet s 4 5 billion year history Biodiversity loss is rated as a more serious environmental problem than the depletion of the ozone layer global warming or pollution and contamination How have we come to this and what can be done to conserve our environment for the future Ecocide examines the facts behind the figures to offer a disturbing account of the ecological impact that the human species has on the planet It shows how we are wilfully destroying our world Highlighting important countermovements who are working for ecological democracy this unique book is essential for anyone who cares about conserving our environment for the future **The Law of Armed Conflict and the Use of Force** Frauke Lachenmann,Rüdiger Wolfrum,2017 This volume collects articles on the law of armed conflict and the use of force from the Max Planck Encyclopedia of Public International Law to facilitate easy access to content from the leading reference work in international law **Fascism Old and New** Carl Boggs,2018-06-12 Deep historical trends suggest the United States could be moving toward a distinctly novel form of fascism embracing elements of the historical phenomenon as it appeared in such countries as Italy Germany Japan and Spain while departing in significant ways A twenty first century fascism would hardly be revolutionary or totalitarian as it would involve no dramatic break with the past following a logic of continuity and building on firmaments of entrenched power going back to World War II This new type of fascist regime would be driven by a tightening confluence of sectoral interests in American society corporate state military and cultural interests favoring oligarchy authoritarianism the warfare system and surveillance order within an expanding globalized matrix of power The dominant historical forces emphasized by such theorists as C Wright Mills The Power Elite and Sheldon Wolin Democracy Inc an important foundation of this book have grown stronger and more pervasive across the decades An integrated power structure has been fueled by new advances in technology a money saturated political system and neoliberal globalism bolstered by the spread of right wing populism that among other things has catapulted Donald Trump into the U S presidency In this book Carl Boggs explores new political and ideological terrain in systematically considering the prospects for a gradual development of fascism in contemporary American society and by extension elsewhere across the advanced industrial world He persuasively argues that modern fascistic trends arguably most visible in the U S demonstrate a closer affinity with Mussolini s Italy corporate state than with the more extreme Nazi German model of tyranny and genocide A very timely scholarly enterprise this book will be of interest to students of contemporary radical politics fascism more broadly US political history ideologies and party politics *The Planetary Emergency* Kent D. Shifferd,2021-02-02 Earth and its inhabitants face an unprecedented crisis the human caused destruction

of the planet's life support systems Deteriorating climate bringing super storms mass forest fires melting glaciers droughts extreme heat and rising seas a decline in food production soil loss water pollution and declining fisheries all threaten the future of life on earth with a looming extinction event not seen for 60 million years Beginning in the 17th century we developed a civilization based on radical materialism exploitation of natural resources and the myth of endless economic growth For all its technological wonders this hypercivilization has proven unsustainable This book explores ways we can create an ecocivilization compatible with the laws and limits of nature a new way of living already developing with new technologies new forms of social organization and a new story about ourselves and the Earth **Enforcing Ecocide**

Alexander Dunlap, Andrea Brock, 2022-06-30 Policing and ecological crises and all the inequalities discrimination and violence they entail are pressing contemporary problems Ecological degradation biodiversity loss and climate change threaten local communities and ecosystems and cumulatively the planet as a whole Police brutality wars paramilitarism private security operations and securitization more widely impact people especially people of colour and habitats This edited collection explores their relationship and investigates the numerous ways in which police security and military forces intersect with reinforce and facilitate ecological and climate catastrophe Employing a case study based approach the book examines the relationships and entanglements between policing and ecosystems revealing the intimate connection between political violence and ecological degradation *The Genocide-Ecocide Nexus* Damien Short, Martin Crook, 2022-02-09 In a world

gripped by an ever worsening ecological crisis there are present and increasing genocidal pressures on many culturally distinct social groups such as indigenous peoples This is where the genocide ecocide nexus presents itself The destruction of ecosystems ecocide can be a method of genocide if for example environmental destruction results in conditions of life that fundamentally threaten a social group's cultural and or physical existence Given the looming threat of runaway climate change the attendant rapid extinction of species destruction of habitats ecological collapse and the self evident dependency of the human race on our biosphere ecocide both natural and manmade will become a primary driver of genocide Through nine chapters of cutting edge research this book examines specific case studies in geographical settings such as Iraq Sudan Nigeria and Brazil to highlight and analyse the crucial connections and vectors of the genocide ecocide nexus This book will be of great value to scholars students and researchers interested in the ecological crisis Environmental Justice the political economy of genocide and ecocide as well as environmental human rights The chapters in this book were originally published as a special issue of The Journal of Genocide Research **The Violent Technologies of Extraction** Alexander

Dunlap, Jostein Jakobsen, 2019-10-15 Offering a thought provoking theoretical conversation around ecological crisis and natural resource extraction this book suggests that we are on a trajectory geared towards total extractivism guided by the mythological Worldeater The authors discuss why and how we have come to live in this catastrophic predicament rooting the present in an original perspective that animates the forces of global techno capitalist development They argue that the

Worldeater helps us make sense of the insatiable forces that transform convert and consume the world The book combines this unique approach with detailed academic review of critical agrarian studies and political ecology the militarization of nature and the conventional and green extraction nexus It seeks radical reflection on the role people play in the construction and perpetuation of these crises and concludes with some suggestions on how to tackle them *Triangle of One Hundred Years Wars* JJ Klaas,2023-10-15 The book *Triangle of One Hundred Years Wars* provides an incredibly gripping and riveting South African historiography chronologically articulated through an endogenous lens by a native South African It chronicles a record reflective of the fundamental historical events within the southern part of Africa The narrative delineates the adroitness of the visionary leadership of amaXhosa given the successes and failures on the protracted wars etched in the Eastern Cape region Dr Jongi Joseph Klaas has a Bachelor of Pedagogics from the University of Fort Hare South Africa a Masters Degree from the from the University of Oklahoma in the United States of America and Master of Philosophy and Doctor of Philosophy in Sociology from the University of Cambridge United Kingdom In 2015 he published *Memoirs of Relentless Pursuit* Currently he is working on the battlefields of the African wars of resistance When I wrote *House of Phalo* more than 40 years ago I could never have expected that we would have to wait so long for an African perspective Professor Jeff Peires The book itself is a victory it is a reward to those heroes who fought wars of resistance Ms Vathiswa Nhanha Librarian at Cory Library Rhodes University Jongi Klaas redefines the telling of history his stories have a soul they live in you Professor Ncedile Saule *Unmooring the Komagata Maru* Rita Dhamoon,Davina Bhandar,Renisa Mawani,Satwinder Kaur Bains,2019-08-15 In 1914 the SS Komagata Maru crossed oceans and jurisdictions to arrive at the west coast of Canada Canadian officials calling on legislative acts designed to limit the immigration of Indians detained the ship for two months in Vancouver Harbour Most of the 376 passengers were then forcibly returned to India *Unmooring the Komagata Maru* challenges conventional Canadian historical accounts by drawing from multiple disciplines and fields to consider the international and colonial dimensions of the voyage By situating the history of South Asians in Canada in a global imperial context this volume emphasizes the ways in which the Komagata Maru incident is related to issues of colonialism more generally The contributors offer a critical reading of Canadian multiculturalism through past events and their commemoration Ultimately they caution against narratives that present the ship s journey as a dark moment in the history of a redeemed nation *Unmooring the Komagata Maru* demonstrates that a hundred years later the voyage of the Komagata Maru has yet to reach its conclusion
