Densley, 2020-06-11 Drawing on extensive life history interviews with serious violent offenders this book offers a unique socio historical analysis of gang membership and gang evolution in Glasgow Scotland's largest city The book chronicles the lives of young men in and around Glasgow from early childhood to present day and examines the lived experience of family friendship community and crime It demonstrates how street reputations are won and lost and how gang membership is not a single event but an experiential process of offending victimisation consensus and conflict The book follows the young men's descent into knife crime and street violence and the impact of imprisonment on their life chances Detailed narratives capture how they individually and collectively transitioned from street violence to profit driven organised crime before eventually disengaging from gangs and desisting from offending The book concludes with an in depth discussion of the evolution of gangs and organised crime in the 21st century and in the inner workings of Scotland's marketplace for illegal goods and services with implications for police practitioners and policymakers A page turner from start to finish Scotland's Gang Members is a truly unique contribution to knowledge about gangs and crime written to high academic standards but readable and accessible to all **Scotland's Muslims** Peter Hopkins, 2018-05-31 Re frames the computer animated film as a new genre of contemporary cinema **Diaspora Networks and the International Migration of Skills** Yevgeny Kuznetsov, 2006-01-01 Network diasporas are but the latest bridge connecting developing economy insiders with their risk mitigating knowledge and connections to outsiders in command of technical know how and investment capital This book examines the interaction of expatriate talent with institutions in expatriates countries of origin in an attempt to make the potential of diasporas and their knowledge a reality The question of how to trigger and sustain such a virtuous cycle is a central concern of this book The focus is on the how to details of how to design effective diaspora

networks and transform brain drain into brain gain **CeDEM14** Parycek, Peter,Edelmann, Noella,2014 **Scottish Home Rule** Ben Thomson,2020-11-11 A proponent of Scottish Home Rule offers a clear and concise introduction to the merits of the policy and the history of the movement Every debate about the Scottish constitution should include the topic of Scottish Home Rule and if there is to be another referendum in Scotland then Home Rule should be one of the options on the ballot paper Yet for all its importance Home Rule is not widely understood The proposal is seen by many Unionists as the slippery slope to Independence Meanwhile Independence supporters regard it as a Unionist proposal to retain sovereignty over Scotland It is however a strong proposal in its own right with a separate history from Independence and a more likely steppingstone to Federalism This book lays out the merits of Scottish Home Rule as the best solution for Scotland It covers the history of support for the Home Rule option since 1860s a clear outline of how it works and a discussion about how it could both improve Scotland and act as a framework for constitutional reform across the UK **The Postgenomic Condition** Jenny Reardon,2017-12-29 Now that we have sequenced the human genome what does it mean In The Postgenomic Condition Jenny Reardon critically examines the decade after the Human Genome Project and the fundamental questions about meaning value and justice this landmark achievement left in its wake Drawing on more than a decade of research in molecular biology labs commercial startups governmental agencies and civic spaces Reardon demonstrates how the extensive efforts to transform genomics from high tech informatics practiced by a few to meaningful knowledge beneficial to all exposed the limits of long cherished liberal modes of knowing and governing life Those in the American South challenged the value of being included in genomics when no hospital served their community Ethicists and lawyers charged with overseeing Scottish DNA and data questioned how to develop a system of ownership for these resources when their capacity to create things of value new personalized treatments remained largely unrealized Molecular biologists who pioneered genomics asked whether their practices of thinking could survive the deluge of data produced by the growing power of sequencing machines While the media is filled with grand visions of precision medicine The Postgenomic Condition shares these actual challenges of the scientists entrepreneurs policy makers bioethicists lawyers and patient advocates who sought to leverage liberal democratic practices to render genomic data a new source of meaning and value for interpreting and caring for life It brings into rich empirical focus the resulting hard on the ground questions about how to know and live on a depleted but data rich interconnected yet fractured planet where technoscience garners significant resources but deeper questions of knowledge and justice urgently demand attention *Transforming the Countryside* Paul Brassley,Jeremy Burchardt,Karen Sayer,2016-11-25 It is now almost impossible to conceive of life in western Europe either in the towns or the countryside without a reliable mains electricity supply By 1938 two thirds of rural dwellings had been connected to a centrally generated supply but the majority of farms in Britain were not linked to the mains until sometime between 1950 and 1970 Given the significance of electricity for modern life the difficulties of supplying it to isolated

communities and the parallels with current discussions over the provision of high speed broadband connections it is surprising that until now there has been little academic discussion of this vast and protracted undertaking This book fills that gap It is divided into three parts The first on the progress of electrification explores the timing and extent of electrification in rural England Wales and Scotland the second examines the effects of electrification on rural life and the rural landscape and the third makes comparisons over space and time looking at electrification in Canada and Sweden and comparing electrification with the current problems of rural broadband
