Scotland The Making Of The Kingdom The Edinburgh History Of Scotland V 1:

Viking Empires Angelo Forte, Richard D. Oram, Frederik Pedersen, 2005-05-05 Viking Empires first published in 2005 is a definitive global history of the Viking World **Scottish Society, 1500-1800** Robert Allen Houston, Ian D. Whyte, 2005-04-18 The volume covers many of the most significant themes in pre industrial Scottish society **Subverting Scotland's Past** Colin Kidd, 2003-12-18 This book examines how the intellectual developments of the Scottish Enlightenment undermined Scotland's sense of nationalism Alexander II Richard D. Oram, 2012-10-02 By equal measure state builder and political unifier and ruthless opportunist and bloody handed aggressor Alexander II has been praised or vilified by past historians but has rarely been viewed in the round This book explores the king's successes and failures offering a fresh assessment of his contribution to the making of Scotland as a nation It lifts the focus from an introspective national history to look at the man and his kingdom in wider British and European history examining his international relationships and offering the first detailed analysis of the efforts to work out a lasting diplomatic solution to Anglo Scottish conflict over his inherited claims to the northern counties of England More than just a political narrative the book also seeks to illuminate aspects of the king's character and his relationships with those around him especially his mother his first wife Joan Plantagenet and the great magnates clerics and officials who served in his household and administration The book illustrates the processes by which the mosaic of petty principalities and rival power bases that covered the map of late 12th century Scotland had become by the mid 13th century a unified state hybrid in culture's and multilingual but acknowledging a common identity as Scots Why Scottish History Matters Rosalind Mitchison, 1997 Extensively revised for this edition these essays combine to build a picture of Scottish history from the time of the Picts and the Britons through the Wars of Independence the Reformation and the time of the Covenanters to the Union of the Parliaments in 1707 and the impact of industrialization on Victorian Scotland *The Kingdom of the Isles* R. Andrew McDonald, 2008-08-01 This study explores the history of the western seaboard of Scotland the Hebrides Argyll and the Isle of Man in a formative but often neglected era the central middle ages from the mighty Somerled to his descendant John MacDonald the first Lord of the Isles c 1336 Drawing on a variety of sources this very readable narrative deals with three major and closely interrelated themes first the existence of the Isles and coastal mainland as a kingdom from c 1100 to 1266 second the rulers of the region Somerled and his descendants the MacDougalls MacDonalds and MacRuairis and third the often complex relations among the Isles Scotland Norway and England A fully rounded history emerges which transcends national viewpoints While political history predominates the changing nature of society in the isles is emphasised throughout and separate chapters address the church and monasticism as well as the monuments the castles monasteries churches and chapels that form an enduring legacy The Oxford Companion to Scottish History Michael Lynch, 2007 Searchable online reference covers more than 20 centuries of history and interpret history broadly covering areas such as archaeology climate culture languages immigration

migration and emigration Multi authored entries analyze key themes such as national identity women and society living standards and religious belief across the centuries in an authoritative yet approachable way The A Z entries are complemented by maps genealogies a glossary a chronology and an extensive guide to further reading From title screen

The New Cambridge Medieval History: Volume 6, C.1300-c.1415 Rosamond McKitterick,1995 The sixth volume of The New Cambridge Medieval History covers the fourteenth century a period dominated by plague other natural disasters and war which brought to an end three centuries of economic growth and cultural expansion in Christian Europe but one which also saw important developments in government religious and intellectual life and new cultural and artistic patterns Part I sets the scene by discussion of general themes in the theory and practice of government religion social and economic history and culture Part II deals with the individual histories of the states of western Europe Part III with that of the Church at the time of the Avignon papacy and the Great Schism and Part IV with eastern and northern Europe Byzantium and the early Ottomans giving particular attention to the social and economic relations with westerners and those of other civilisations in the Mediterranean
