The Nature of Scotland Magnus Magnusson, Graham White, 1997 This is an illustrated study of the interdependence of the landscape the wildlife and the people of Scotland It begins with Scotland's violent birth and retells tales of the early hunters who followed the retreating ice and the first farmers who cleared the land and began farming The authors go on to discuss the implicit conflicts in the use of land today and the state of the environment and the other forces which have transformed the landscape and wildlife today

Nature and Culture in the Northern Forest Pavel Cenkl, 2010-03-15 Nearly 30 million acres of the Northern Forest stretch across New York Vermont New Hampshire and Maine Within this broad area live roughly a million residents whose lives are intimately associated with the forest ecosystem and whose individual stories are closely linked to the region's cultural and environmental history The fourteen engaging essays in *Nature and Culture in the Northern Forest* effectively explore the

relationships among place work and community in this complex landscape Together they serve as a stimulating introduction to the interdisciplinary study of this unique region Each of the four sections views through a different lens the interconnections between place and people The essayists in *Encounters* have their hiking boots on as they focus on personal encounters with flora and fauna of the region The energizing accounts in *Teaching and Learning* question our assumptions about education and scholarship by proposing invigorating collaborations between teachers and students in ways determined by the land itself not by the abstractions of pedagogy With the freshness of Thoreau's irreverence the authors in *Rethinking Place* look at key figures in the forest's literary and cultural development to help us think about the affiliations between place and citizenship In *Nature as Commodity* three essayists consider the ways that writers from the nineteenth and early twentieth centuries thought about nature as a product and thus how their conclusions bear on the contemporary retailing of place The writers in *Nature and Culture in the Northern Forest* reveal the rich affinities between a specific place and the literature thought and other cultural expressions it has nurtured Their insightful and stimulating connections exemplify adventurous bioregional thinking that encompasses both natural and cultural realities while staying rooted in the particular landscape of some of the Northeast's wildest forests and oldest settlements

An Inquiry Into the Nature and Causes of the Wealth of Nations Adam Smith, John Ramsay McCulloch, 1859

Decolonizing Nature William Adams, Martin Mulligan, 2012-04-27 British imperialism was almost unparalleled in its historical and geographical reach leaving a legacy of entrenched social transformation in nations and cultures in every part of the globe Colonial annexation and government were based on an all encompassing system that integrated and controlled political economic social and ethnic relations and required a similar annexation and control of natural resources and nature itself Colonial ideologies were expressed not only in the progressive exploitation of nature but also in the emerging discourses of conservation At the start of the 21st century the conservation of nature is of undiminished importance in post colonial societies yet the legacy of colonial thinking endures What should conservation look like today and what indeed whose ideas should it be based upon *Decolonizing Nature* explores the influence of the colonial legacy on contemporary conservation and on ideas about the relationships between people politics and nature in countries and cultures that were once part of the British Empire It locates the historical development of the theory and practice of conservation at both the periphery and the centre firmly within the context of this legacy and considers its significance today It highlights the present and future challenges to conservationists of contemporary global neo colonialism The contributors to this volume include both academics and conservation practitioners They provide wide ranging and insightful perspectives on the need for and practical ways to achieve new forms of informed ethical engagement between people and nature
