Scottish Birds:

Scottish Birds Robin Hull, 2001 A book exploring the wealth of tradition history and lore about birds in Scotland A companion to Mercat's bestselling Scots Herbal this book explores the wealth of tradition history and lore about birds in Scotland Encyclopaedic in its detail it describes each species using references from folktales and ballads Statistical Accounts and eye witness reports All the commonly occurring birds in Scotland are listed and described Anyone with the slightest interest in wildlife or Scottish folk culture will find endless fascination in these pages Illustrated throughout Birds in Scotland Valerie M. Thom, 2010-11-30 The most important work on the birds of Scotland ever published British Birds This comprehensive study and review of the birds in Scotland follows on from where the celebrated two volumes of The Birds of Scotland 1953 by Dr Baxter and Miss Rintoul left off It does more than that however since not only has there been a profound increase in ornithological coverage and data as reflected in the species accounts there have also been great changes in habitat and environment since the days of Baxter there are also brief summaries of earlier data based on the researches of Baxter Rintoul In all 497 species are dealt with The texts of major species accounts are complemented by 173 distribution maps and many tables of relevant data and there are 129 species drawings by a team of artists under the editorship of Donald Watson who also contributes chapter head pieces and other drawings A section of photographs illustrates the varied habitats typical of Scotland today There are further appendices and an extensive bibliography The book will be of great interest to all birdwatchers in Scotland but of special value too to the many thousands of birdwatching visitors from elsewhere in these islands and from countries abroad The Scottish Ornithologists Club for whom the book is published and all whose records and researches made the author's work possible have reason to be proud of Valerie Thom's achievement

Birds in North-East Scotland Then and Now Adam Watson, Ian Francis, 2012 Field observations mainly in the 1940s and comparison with recent records Adam Watson as a schoolboy made field observations on birds in north east Scotland during the 1940s and early 1950s These are of special interest because hardly any local ornithologists lived there and his main set of observations is published here for the first time As well as accounts for all species seen there is detailed information on several species whose status has changed greatly since declines of breeding greenshanks and ring ouzels and rapid increases in the proportions of feral doves and carrion crows These and other observations form a useful baseline for comparison with what is now being seen and recorded by hundreds of ornithologists living in and visiting the area Ian Francis came to north east Scotland in the early 1990s and has taken part in many aspects of local ornithology He was first editor of a major book The Breeding Birds of North East Scotland published in 2011 which documents the current breeding distributions of birds and assesses changes over 40 years allowing a modern perspective on Adam Watson's observations from the mid 1900s The current book by Adam Watson and Ian Francis Birds in north east Scotland then and now also includes a previously unpublished account of long term research by Adam Watson Rik Smith and Mick Marquiss on summering snow buntings one

Birds In Counties: An Ornithological Bibliography Of The Counties Of England, Wales, Scotland And The Isle Of Man David K Ballance, 2000-05-05 This is an ornithological bibliography for the counties of England, Wales and Scotland and for the Isle of Man. It includes all known books, pamphlets and papers which contain substantial studies of the birds of local areas from a county down to a back garden or a gravel pit. Each county has an introduction on its boundaries and the history of its ornithology. There has been no comprehensive national publication of this kind since Mullens, Swann and Jourdain's *Geographical Bibliography* in 1920. The volume also provides a detailed record of the many county and local bird reports and of the ever increasing number of area surveys produced by statutory and voluntary bodies. The material is arranged by the pre 1974 counties and takes the record up to 1995. There are maps to show the many changes in county boundaries since 1800. The book will be a standard reference work for libraries and collectors and for anyone interested in the rich and diverse development of local ornithology in its homeland.

Birds in England Edward Max Nicholson, 1926

The Atlas of Wintering Birds in Britain and Ireland Peter Lack, 2010-11-30 This companion volume to *The Atlas of Breeding Birds of Britain and Ireland* is derived from surveys of birds present in Britain and Ireland during the three winters 1981-82, 1982-83 and 1983-84. The surveys were organised by the British Trust for Ornithology and the Irish Wildbird Conservancy as were the earlier breeding birds surveys. The Winter Atlas maps 200 species, 192 of which have full page two colour maps faced by a page of text. The texts written by over 100 specialists comment on the survey results, the species generally and the distribution and abundance as mapped. In addition there are introductory chapters on the maps, the weather in the three winters, bird patterns and movements and appendices describing the planning, organisation, field methods and processing of the survey data from record cards to computer output and maps. A team of 23 artists led by Robert Gillmor has provided the line drawings which head the species accounts.

Estuary Birds of Britain and Ireland A.J. Prater, 2010-11-30 Estuaries are rightly of great interest and concern to the birdwatcher. Most teem with thousands of waders, geese, ducks, gulls and other species that use them at times throughout the year; they are also among the last of the wild places left in Britain and Europe. The *Birds of Estuaries Enquiry* sponsored by the Nature Conservancy Council and organised by the BTO, RSPB and the Wildfowl Trust spanned six years and Tony Prater's report now provides a detailed insight into the birds which use and in many cases depend on this special habitat. Of great interest to birdwatchers, the book also will be

essential reading for professional conservationists and all involved in the planning and use of estuaries It assesses the importance of each estuary and the distribution and numbers of all species generally present and by setting this in an international framework demonstrates the remarkable importance of the estuaries around these islands Threats to the fabric of the landscape and its wildlife abound and estuaries are not exempt Barrage schemes industrial and agricultural reclamations and many other pressures exist and are the subject of chapters which survey the situation now and in the future The text is graced by John Busby s accomplished and evocative drawings and there are numerous maps and diagrams as well as photographs of typical estuaries Jacket illustration by John Busby **The Water Birds of North America** Baird,1884
