This new edition includes a new chapter that addresses Lear's continued fascination with wildlife and the natural world after giving up his career as a scientific illustrator and his fascination with domestic pets from his own beloved cat which he cartooned repeatedly to the portraits of dogs owned by his family and friends alongside thirteen never before published illustrations including fully finished watercolors, rough preliminary sketches and whimsical cartoons.

**Edward Lear and the Play of Poetry** James Williams, Matthew Bevis, 2016. Of all the Victorian poets, Edward Lear has a good claim to the widest audience, admired and championed by critics and poets from John Ruskin to John Ashbery; he has also been read, heard and loved by generations of children. As a central figure in the literature of nonsense, Lear has also shaped the evolution of modern literature and his work continues to influence and inspire writers and readers today. This collection of essays, the first ever devoted solely to Lear, builds on a recent resurgence of critical interest and asks how it is that the play of Lear's poetry continues to delight and to challenge our sense of what poetry can be. These seventeen chapters, written by established and emerging critics of poetry, seek to explore and appreciate the playfulness embodied in the poems and to provide contexts in which it can be better understood and enjoyed. They consider how Lear's poems play off various inheritances: the literary fool, Romantic lyric, his religious upbringing, explore particular forms in which his playful genius took flight: his letters, his queer writings about love and trace lines of Learical influence and inheritance by showing how other poets and thinkers across the nineteenth and twentieth centuries played off Lear in their turn. Stein, Eliot, Auden, Smith, Ashbery and others.

*Animals, Museum Culture and Children's Literature in Nineteenth-Century Britain* Laurence Talairach, 2021-05-27. *Animals, Museum Culture and Children's Literature in Nineteenth-Century Britain*. Curious Beasts explores the relationship between the zoological and palaeontological specimens brought back from around the world in the long nineteenth century, be they alive, stuffed or fossilised, and the development of children's literature at this time. Children's literature emerged as dizzying numbers of new species flooded into Britain with scientific expeditions from giraffes and hippopotami to kangaroos, wombats, platypuses or sloths. As the book argues, late Georgian, Victorian and Edwardian children's writers took part in the urge for mass education and presented the world and its curious creatures to children, often borrowing from their museum culture and its objects to map out that world. This original exploration illuminates how children's literature dealt with the new ordering of the world, offering a unique viewpoint on the construction of science in the long nineteenth century.
