Sea Dumping in Australia Geoff Plunkett, 2003 A compilation of reports previously published separately A Cultural History of the Sea in the Global Age Franziska Torma, 2023-02-09 In 1972 an image became an icon Blue Marble a photograph of the Earth as seen from outer space The picture features prominently the globe's water covered surface The ocean connects nature and culture in the modern world Within the time span of 100 years the sea changed its cultural meaning from a dangerous place to an endangered environment This volume traces diverse processes of oceanic transformation in the Anthropocene it follows scientists seafarers diplomats and filmmakers from ship decks to the arenas of political decision making on land The essays lead from underwater dumping grounds to islands in the south pacific Tiny organisms like plankton and charismatic megafauna like whales accompanied the human voyages The presence of the animals challenges common notions of human culture The global age has to take non human agents into account to fully understand the cultural history of the seas Oceans, Seas, Shorelines and Warfare Richard Harding, Ross Anderson, Mick de Ruyter, 2024-09-23 For as long as humanity has ventured on the seas naval warfare has been an integral part of their activities and the focal point for many histories and ideas of heritage This book presents a rarely explored aspect the long term impact of those battles on shorelines seas and oceans Dramatic and altering the physical scars of battles remain with us today in the form of cultural landscapes and archaeological sites while the geopolitical consequences of warfare have been world changing The migrations of peoples across the seas accompanied by violence have done more to shape the demographic and cultural map of the modern world than almost anything else Both seaborne opportunities and threats have influenced the way of life of coastal communities Today technology has seen these threats extend far into the deepest ocean and reach across continents This book shows how despite being virtually invisible to an increasing percentage of the world's population the ocean is more significant now than it has ever been Ranging from the world of antiquity to the present day with a global perspective the volume is intended to appeal to those interested in history archaeology social sciences and the environment

Chemical Warfare Agent Sea Dumping Off Australia Geoff Plunkett, 2003 Although the disposal of material in the sea is no very restricted historically the disposal of unwanted waste in the ocean has been a very common practice in many parts of the world Due to its immense size the ocean was thought to have an unlimited absorptive capacity with any dumped waste having only a very localised effect Moreover the material would be well away from any human activity It is important to know where any hazardous material may lie both to prevent human contact and to assess the possible ecological consequences **The Armed Forces: Instrument of Peace, Strength, Development and Prosperity** Joseph Babatunde Fagoyinbo, 2013-05-28 Across the ages technological developments have been accelerated by the military This results from the fact that able bodied vibrant youths are generally involved and are also exposed to high tech training prevailing at their times for assignments defence and security that are essential but not desired They form the Armed Forces

for the nations Such brilliant military officers like Caesar and Napoleon made their marks and in contemporary times the Armed Forces of United States France Britain Australia etc are making remarkable contributions to technological developments Such infrastructure as the Internet the GPS and the cell phones are products that have significant military contributions This book scans across the major regions of the world highlights the efforts of representative countries in the regions and observes that nations that have harnessed the efforts of their Armed Forces have progressively developed It is also observed that developments in America and Europe though not entirely dependent on their Armed Forces have been greatly affected by their efforts In Asia such countries as the People s Republic of China Brazil India Pakistan and Singapore utilise the human and material resources within the Armed Forces for national growth and cohesion Development effort is least in the African Region except South Africa and Egypt notwithstanding the high potentials as exhibited by Nigeria s Armed Forces Although attempts to industrialise through the Armed Forces may be able to create economic development for developing nations such factors as historical background economic resources political climate government policies and infrastructure are equally important Economic development programme of an aspiring country should i promote education and access to knowledge ii aspire to economic self sufficiency in economic power iii allow and promote private sector and foreign participation in defence production research and development iv commit itself to the establishment and support of defence industries v indigenise defence programmes establish a balance between military and economic development and vi mobilise the nation s economy through technology partnership with the private sector and foreign investors A Review of the Law in Relation to the Final Disposal of a Dead Body Queensland. Combat Divers Michael G. Welham,2023-01-19 The full visual history of the special forces combat diver from World War II to the present day Combat divers are an elite within an elite Every special forces combat diver is required to pass selection

twice first into the elite military unit and then a combat diving qualification The combat dive units themselves are tiny and the operations highly classified The role of a military diver is inevitably a lonely and a dangerous one whether clearing mines or striking from the sea against enemy held targets Fully illustrated with rare and unusual images *Combat Divers* reveals their little known yet fascinating operations from Dutch Special Forces combat divers covertly operating against Somali pirates to the actions of Soviet Spetsnaz divers in Swedish territorial waters during the Cold War It also examines how the most famous units such as the US Navy SEALs and the Royal Navy's SBS are currently operating and adapting to threats in a multitude of theatres *Combat Divers* gives an insight into specialist kit and vehicles presently used and equipment that is being developed and trialed throughout the world Covering a variety of kit from dry deck shelters to mini submarines and swimmer delivery vehicles former Royal Marines Commando Michael G Welham draws on his own extensive diving experience to reveal exactly how this equipment is used by special forces dive teams As their kit and equipment constantly evolve so does the nature of their work and even the team element *Combat Divers* also details the first female combat divers and includes their own first hand accounts about their groundbreaking roles within their respective units to create a fascinating history of these elite special forces operatives

War Junk Alex Souchen, 2020-04-15 During the Second World War Canadian factories produced mountains of munitions and supplies including some 800 ships 16 000 aircraft 800 000 vehicles and over 4 6 billion rounds of ammunition and artillery shells Although they were crucial to winning the war these assets turned into peacetime liabilities when hostilities ended in 1945 Drawing on comprehensive archival research Alex Souchen provides a definitive account of the disposal crisis triggered by Allied victory and shows how policymakers implemented a disposal strategy that facilitated postwar reconstruction Canadians responded to the unprecedented divestment of public property by reusing and recycling military surpluses to improve their postwar lives *War Junk* recounts the complex political economic social and environmental legacies of munitions disposal in Canada by revealing how the tools of war became integral to the making of postwar Canada

Colonialism and the Jews in German History Stefan Vogt, 2022-06-16 *Colonialism and the Jews in German History* brings together new and path breaking studies on the historical relationship between colonialism and the Jews in Germany The book considers the mutual influences on the situation of the Jews in Germany including attitudes towards Jews and anti-Semitism but also Jewish self conceptions and the ideology and politics of German colonialism The contributors discuss the ways in

which colonial ideology and practice have affected the position of the Jews in Germany and the relationship between anti-Semitism and colonial racism. In doing so, the volume introduces German colonialism as a relevant context for German Jewish history and it expands the perspective on German colonial history significantly by considering Jews both as distinct objects and also as agents within the field of German colonialism. The volume includes studies on the pre-colonial era, the phase of active German colonialism since the 1880s and the time after Germany lost its colonies in the First World War. All these studies testify to the fact that German Jewish history takes on additional significance if seen as part of a global history of collective relationships.
