**The Military-Entertainment Complex** Tim Lenoir,Luke Caldwell,2018-02-19 With the rise of drones and computer controlled weapons the line between war and video games continues to blur In this book the authors trace how the realities of war are deeply inflected by their representation in popular entertainment War games and other media in turn feature an increasing number of weapons tactics and threat scenarios from the War on Terror While past analyses have emphasized top down circulation of pro military ideologies through government public relations efforts and a cooperative media industry The Military Entertainment Complex argues for a nonlinear relationship defined largely by market and institutional pressures Tim Lenoir and Luke Caldwell explore the history of the early days of the video game industry when personnel and expertise flowed from military contractors to game companies to a middle period when the military drew on the booming game industry to train troops to a present in which media corporations and the military influence one another cyclically to predict the future of warfare In addition to obvious military entertainment titles like America's Army Lenoir and Caldwell investigate the rise of best selling franchise games such as Call of Duty Battlefield Medal of Honor and Ghost Recon The narratives and aesthetics of these video games permeate other media including films and television programs This commodification and marketing of the future of combat has shaped the public's imagination of war in the post 9 11 era and naturalized the U S Pentagon's vision of a new way of war
