Seapower A Guide For The Twenty First Century:

Seapower Geoffrey Till, 2004 At the beginning of the 21st century much has remained the same in naval terms but much has changed Geoffrey Till's study is an exploration of how change will impact upon the world's navies Seapower Geoffrey Till, 2018-06-19 This is the fourth revised and updated edition of Geoffrey Till's *Seapower A Guide for the Twenty first Century* The rise of the Chinese and other Asian navies worsening quarrels over maritime jurisdiction and the United States maritime pivot towards the Asia Pacific region reminds us that the sea has always been central to human development as a source of resources and as a means of transportation information exchange and strategic dominion It has provided the basis for mankind's prosperity and security and this is even more true in the early twenty first century with the emergence of an increasingly globalised world trading system Navies have always provided a way of policing and sometimes exploiting the system In contemporary conditions navies and other forms of maritime power are having to adapt in order to exert the maximum power ashore in the company of others and to expand the range of their interests activities and responsibilities While these new tasks are developing fast traditional ones still predominate Deterrence remains the first duty of today's navies backed up by the need to fight and win if necessary How navies and their states balance these two imperatives will tell us a great deal about our future in this increasingly maritime century This book investigates the consequences of all this for the developing nature composition and functions of all the world's significant navies and provides a guide for anyone interested in the changing and crucial role of seapower in the twenty first century *Seapower* is essential reading for all students of naval power maritime security and naval history and highly recommended for students of strategic studies international security and international relations Twenty-First Century Seapower Peter Dutton, Robert Ross, Øystein Tunsjø, 2013-05-02 This book offers an assessment of the naval policies of emerging naval powers and the implications for maritime security relations and the global maritime order Since the end of the Cold War China Japan India and Russia have begun to challenge the status quo with the acquisition of advanced naval capabilities The emergence of rising naval powers is a cause for concern as the potential for great power instability is exacerbated by the multiple maritime territorial disputes among new and established naval powers This work explores the underlying sources of maritime ambition through an analysis of various historical cases of naval expansionism It analyses both the sources and dynamics of international naval competition and looks at the ways in which maritime stability and the widespread benefits of international commerce and maritime resource extraction can be sustained through the twenty first century This book will be of much interest to students of naval power Asian security and politics strategic studies security studies and IR in general *Asian Maritime Power in the 21st Century* Vijay Sakhuja, 2011 Maritime power has been a key defining parameter of economic vitality and geostrategic power of nations This book explores how the first decade of the 21st century has witnessed the rise of China and India as confident economic powers pivoting on high growth rates exponential expansion of science technology and industrial

growth **Indian Naval Strategy in the Twenty-first Century** James R. Holmes, Andrew C. Winner, Toshi Yoshihara, 2009-04-02 This is the first academic study of India's emerging maritime strategy and offers a systematic analysis of the interplay between Western military thought and Indian maritime traditions. By a quirk of historical fate, Europe embarked on its Age of Discovery just as the main Asian powers were renouncing the sea, ushering in centuries of Western dominance. In the 21st century, however, Asian states are once again resuming a naval focus, with both China and India dedicating some of their new-found wealth to building powerful navies and coast guards and drawing up maritime strategies to govern the use of these forces. The United States, like the British Empire before it, is attempting to manage these rising sea powers while preserving its maritime primacy. This book probes how India looks at the sea, what kind of strategy and seagoing forces New Delhi may craft in the coming years, and how Indian leaders may use these forces. It examines the material dimension, but its major premise is that navies represent a physical expression of a society's history, philosophical traditions, and culture. This book then ventures a comprehensive appraisal of Indian maritime strategy. This book will be of interest to students of sea power, strategic studies, Indian politics, and Asian Studies in general. James R. Holmes is an Associate Professor of Strategy at the U.S. Naval War College and a former U.S. Navy surface warfare officer. Toshi Yoshihara is an Associate Professor in the Strategy and Policy Department at the Naval War College. Andrew C. Winner is Professor in the Strategic Research Department at the U.S. Naval War College. **China, the United States, and 21st-Century Sea Power** Andrew S. Erickson, Lyle J. Goldstein, Nan Li, 2010-12-01 China's reaction to the United States' new maritime strategy will significantly impact its success, according to three Naval War College professors. Based on the premise that preventing wars is as important as winning wars, this new U.S. strategy, they explain, embodies a historic reassessment of the international system and how the United States can best pursue its interests in cooperation with other nations. The authors contend that, despite recent turbulence in U.S.-China military relations, substantial shared interests could enable extensive U.S.-China maritime security cooperation as they attempt to reach an understanding of competitive coexistence. But for professionals to structure cooperation, they warn, Washington and Beijing must create sufficient political and institutional space. **China as a Twenty-First Century Naval Power** Michael A. McDevitt, 2020-10-15 Xi Jinping has made his ambitions for the People's Liberation Army (PLA) perfectly clear: there is no mystery what he wants. First, that China should become a great maritime power, and secondly, that the PLA become a world-class armed force by 2050. He wants this latter objective to be largely completed by 2035. **China as a Twenty-First Century Naval Power** focuses on China's navy and how it is being transformed to satisfy the world-class goal. Beginning with an exploration of why China is seeking to become such a major maritime power, author Michael McDevitt first explores the strategic rationale behind Xi's two objectives. China's reliance on foreign trade and overseas interests, such as China's Belt and Road strategy. In turn, this has created concerns within the senior levels of China's military about the vulnerability of its overseas interests, and maritime life lines is a major theme. McDevitt dubs this

China's sea lane anxiety and traces how this has required the PLA Navy to evolve from a near seas focused navy to one that has global reach a blue water navy He details how quickly this transformation has taken place thanks to a patient step by step approach and abundant funding The more than 10 years of anti piracy patrols in the far reaches of the Indian Ocean has acted as a learning curve accelerator to blue water status McDevitt then explores the PLA Navy's role in the South China Sea and the Indian Ocean He provides a detailed assessment of what the PLAN will be expected to do if Beijing chooses to attack Taiwan potentially triggering combat with America's first responders in East Asia especially the U S Seventh Fleet and U S Fifth Air Force He conducts a close exploration of how the PLA Navy fits into China's campaign plan aimed at keeping reinforcing U S forces at arm's length what the Pentagon calls anti access and area denial A2 AD if war has broken out over Taiwan or because of attacks on U S allies and friends that live in the shadow of China McDevitt does not know how Xi defines world class but the evidence from the past 15 years of building a blue water force has already made the PLA Navy the second largest globally capable navy in the world This book concludes with a forecast of what Xi's vision of a world class navy might look like in the next fifteen years when the 2035 deadline is reached

Upadhyaya, 2019-09-05 The first book by a former Indian naval intelligence officer on Sino India relations India's Maritime Strategy provides a unique insight into the Indian Navy tracing its post independence growth and discussing its transformation and future in the 21st century In the context of the rise of China's maritime power in the Indian Ocean this book provides a nuanced view of the extent and scope of India's maritime reach and the effect of this on Sino Indian competition Challenging the view that by developing a favourable environment alone India could seek to maintain its balance of power with China it is argued that despite durable bilateral security ties with most regional states India's maritime aspirations to be the primary net security provider for the region are unsustainable in the long term This book presents a comprehensive coverage of India's bilateral maritime security engagements with all the Indian Ocean regional states as well as the US France UK and Russia As such it will be useful to students and scholars of Indian and South Asian politics international relations and maritime security **Europe, Small Navies and Maritime Security** Robert McCabe, Deborah

Sanders, Ian Speller, 2019-09-16 This book seeks to identify and address gaps in our understanding of maritime security and

the role of small navies in Europe The majority of Europe s navies are small yet they are often called upon to address a complex array of traditional and non traditional threats This volume examines the role of small navies within the European security architecture by discussing areas of commonality and difference between navies and arguing that it is not possible to fully understand either maritime strategy or European security without taking into account the actions of small navies It contains a number of case studies that provide an opportunity to explore how different European states view the current security environment and how naval policy has undergone significant changes within the lifetime of the existing naval assets In addition the book examines how maritime security and naval development in Europe might evolve given that economic forecasts will likely limit the potential procurement of larger naval assets in the future which means that European states will increasingly have to do more with less in the maritime domain This book will be of much interest to students of maritime strategy naval power strategic studies European politics and international relations in general Operational Warfare at Sea Milan Vego, 2017-07-06 This book provides a comprehensive analysis of both the theory and practice of operational warfare at sea and this 2nd edition has been thoroughly revised with two completely new chapters
