The Search for Anti-Inflammatory Drugs Vincent J. Merluzzi, Julian Adams, 2012-12-06 Perspectives on Anti Inflammatory Drugs Inflammation is a very complicated process of interrelated events and cascades that does not allow for an easily defined focused attack for drug discovery It is evident from years of research and development that certain classes of compounds e g NSAIDs steroids and so on have had a measure of success in alleviating pain and even dampening cellular/hormonal mechanisms involved in the process Clear mechanism related therapies e g for arthritis and targeted drugs e g for transplantation have not been available in the past and in reality research in inflammation has relied on more phenomenological approaches for resolving symptoms or on blatant cytoreductive approaches in cases like organ transplantation In the last decade approaches that have revealed novel cellular pathways in which intervention is possible for lymphocyte regulation for example cyclosporine and FK506 and small molecular weight mediators e g leukotriene inhibitors are now either standard therapy or will be in a short time These latter approaches have been the result of research from the 1970s up to the present *The Search for Anti-inflammatory Drugs* Vincent J. Merluzzi, 1995 This book will be a valuable asset for a medical or university library as well as for researchers and clinicians It will make an enticing reading for non specialists interested in the history behind modern pharmacology and can be used as a textbook in graduate courses

Leap Howard Yu, 2018-06-12 Every business faces the existential threat of competitors producing cheaper copies Even patent filings market dominance and financial resources can't shield them from copycats So what can we do and what can we learn from companies that have endured and even prospered for centuries despite copycat competition In today's competitive environment where latecomers can replicate almost any product or service for less and where intuition and market intelligence have been overtaken by machine algorithms companies can no longer just be very good at what they do The need to leap to new knowledge disciplines The best leap repeatedly And it's the combination of two skills mastery of the old and new that empowers them with the best competitive advantage To discover how some companies not only survive but thrive for centuries strategy expert Howard Yu identifies key trends from business history skillfully extracting timeless lessons and applying them to today He illustrates how managers can look to leverage technological shifts increasingly ubiquitous connectivity smart machines and managerial creativity in order to leap forward Ultimately Leap is a playbook for the future that shows how pioneering players can thrive by rethinking their business their relationships with customers and the very reasons they exist **The Matter of the Heart** Thomas Morris, 2018-01-16 More than a litany of medical advances it's the story of the gritty bloody and deadly experiences that underlie scientific progress Washington Post An eye opening and heroic story of pioneering heart surgeons structured around eleven operations For thousands of years the human heart remained the deepest of mysteries both home to the soul and an organ too complex to touch let alone operate on Then in the late nineteenth century medics began going where no one had dared go before The following decades saw the mysteries of

the heart exposed thanks to pioneering surgeons brave patients and even sacrificial dogs In eleven landmark operations Thomas Morris tells us stories of triumph reckless bravery swaggering arrogance jealousy and rivalry and incredible ingenuity the trail blazing blue baby procedure that transformed wheezing infants into pink healthy children the first human heart transplant which made headline news around the globe And yet the heart still feels sacred just before the operation to fit one of the first artificial hearts the patient's wife asked the surgeon if he would still be able to love her The Matter of the Heart gives us a view over the surgeon's shoulder showing us the heart's inner workings and failings It describes both a human story and a history of risk taking that has ultimately saved millions of lives A thoroughly engaging history The Wall Street Journal Morris's expert guided tour of cardiac surgery and its quirky brilliant innovators covers a dazzling and dizzying array of procedures and hints at tantalizing prospects for future surprises Publishers Weekly starred review A well developed narrative with no end of heroes Kirkus Reviews Gripping John Crace The Guardian

Drug Discovery in Japan Sadao Nagaoka, 2019-10-24 This book analyzes the drug discovery process in Japan based on detailed case studies of 12 groups of 15 innovative drugs It covers the first statin in the world up to the recent major breakthrough in cancer therapy the recent immune checkpoint inhibitor the scientific discovery for which a 2018 Nobel Prize in Physiology or Medicine was awarded to Prof Tasuku Honjo Kyoto University The book shows the pervasive high uncertainty in drug discovery frequent occurrences of unexpected difficulties discontinuations serendipities and good luck significantly because drug discovery starts when the underlying science is incomplete Thus there exist dynamic interactions between scientific progress and drug discovery High uncertainty also makes the value of an entrepreneurial scientist high Such scientists fill the knowledge gaps by absorbing external scientific progress and by relentless pursuit of possibilities through their own research often including unauthorized research to overcome crises Further high uncertainty and its resolution significantly characterize the evolution of competition in the drug industry The patent system promotes innovation under high uncertainty not only by enhancing appropriability of R D investment but also by facilitating the combination of knowledge and capabilities among different firms through disclosure Understanding such a process significantly benefits the creation of innovation management and policy practices
