Gidmark, 2000-11-30 The sea and Great Lakes have inspired American authors from colonial times to the present to produce enduring literary works. This reference is a comprehensive survey of American sea literature. The scope of the encyclopedia ranges from the earliest printed matter produced in the colonies to contemporary experiments in published prose, poetry and drama. The book also acknowledges how literature gives rise to adaptations and resonances in music and film and includes coverage of nonliterary topics that have nonetheless shaped American literature of the sea and Great Lakes. The alphabetical arrangement of the reference facilitates access to facts about major literary works, characters, authors, themes, vessels, places and ideas that are central to American sea literature. Each of the several hundred entries is written by an expert contributor and many provide bibliographical information. While the encyclopedia includes entries for white male canonical writers such as Herman Melville and Jack London, it also gives considerable attention to women at sea and to ethnically diverse authors, works and themes. The volume concludes with a chronology and a list of works for further reading. *The Pacific Region* Jan Goggans, Aaron DiFranco, 2004-12-30 Robert Penn Warren once wrote "West is where we all plan to go some day" and indeed images of the westernmost United States provide a mythic horizon to American cultural landscape. While the five states California, Oregon, Washington, Alaska and Hawai'i which touch Pacific waters do share commonalities within the history of westward expansion, the peoples who settled the region and the indigenous peoples they encountered have created spheres of culture that defy simple categorization. This wide-ranging reference volume explores the marvelously eclectic cultures that define the Pacific region. From the music and fashion of the Pacific northwest to the film industry and surfing subcultures of southern California, from the vast expanses of the Alaskan wilderness to the schisms between native and tourist culture in

Hawaii this unprecedented reference provides a detailed and fascinating look at American regionalism along the Pacific Rim. The Greenwood Encyclopedia of American Regional Cultures is the first rigorous reference collection on the many ways in which American identity has been defined by its regions and its people. Each of its eight regional volumes presents thoroughly researched narrative chapters on Architecture Art Ecology Ethnicity Fashion Film Folklore Food Language Literature Music Religion and Sports Recreation. Each book also includes a volume specific introduction as well as a series foreword by noted regional scholar and former National Endowment for the Humanities Chairman William Ferris who served as consulting editor for this encyclopedia.

On Sacred Ground Nicholas O'Connell, 2011-10-01 *On Sacred Ground* explores the literature of the Northwest the area that extends from the Pacific Ocean to the Rocky Mountains and from the forty ninth parallel to the Siskiyou Mountains. The Northwest exhibits astonishing geographical diversity and yet the entire bioregion shares a similarity of climate flora and fauna. For Nicholas O'Connell the effects of nature on everyday Northwest life carry over to the region's literature. Although Northwest writers address a number of subjects the relationship between people and place proves the dominant one and that has been true since the first tribes settled the region and began telling stories about it thousands of years ago. Indeed it is the common thread linking Chief Seattle to Theodore Roethke, Narciissa Whitman to Ursula K. Le Guin, Joaquin Miller to Ivan Doig, Marilynne Robinson to Jack London, Betty MacDonald to Gary Snyder. Tracing the history of Pacific Northwest literary works from Native American myths to the accounts of explorers and settlers the effusions of the romantics the sharply etched stories of the realists the mystic visions of Northwest poets and the contemporary explosion of Northwest poetry and prose O'Connell shows how the most important contribution of Northwest writers to American literature is their articulation of a more spiritual human relationship with landscape. Pacific Northwest writers and storytellers see the Northwest not just as a source of material wealth but as a spiritual homeland a place to lead a rich and fulfilling life within the whole context of creation. And just as the relationship between people and place serves as the unifying feature of Northwest literature so also does literature itself possess a perhaps unique ability to transform a landscape into a sacred place.

The Span of Mainstream and Science Fiction Peter Brigg, 2015-09-16 From the 1960s when the advent of what many call the postmodern style made establishing genres more difficult to the present day writers have been incorporating science not only

the commonly thought of science and technology but also the soft sciences such as psychology and sociology into what was previously considered mainstream fiction This book examines works by Thomas Pynchon Doris Lessing and others who incorporate science in fiction and exemplify the movement of mainstream fiction writers toward a new genre termed span It also examines works by some science fiction writers who are edging closer to the border of science fiction and slowly over into span This book maps the boundaries of the new span genre of fiction and thus helps define texts that fall outside the realms of mainstream and science fiction Diagrams are included and a bibliography and index
