**The Precautionary Principle in the 20th Century** Paul Harremoes, David Gee, Malcom MacGarvin, Andy Stirling, Jane Keys, Brian Wynne, Sofia Guedes Vaz, 2013-10-11 The precautionary principle is widely seen as fundamental to successful policies for sustainability It has been cited in international courts and trade disputes between the USA and the EU and invoked in a growing range of political debates Understanding what it can and cannot achieve is therefore crucial This volume looks back over the last century to examine the role the principle played or could have played in a range of major and avoidable public disasters From detailed investigation of how each disaster unfolded what the impacts were and what measures were adopted the authors draw lessons and establish criteria that could help to minimise the health and environmental risks of future technological economic and policy innovations This is an informative resource for all those from lawyers and policy makers to researchers and students needing to understand or apply the principle

*The Zoological Record*, 2003

**The Red Sea Ecosystem and Fisheries** Dawit Tesfamichael, Daniel Pauly, 2016-02-03 This book is the first comprehensive coverage of Red Sea fisheries to inform researchers and decision makers The Red Sea is a geologically young sea but also an area with the oldest record of human sea food exploitation

Examining the fisheries of the Red Sea has become extremely important to understand the ecosystem and the direct human impact of fishing on Red Sea ecosystems This volume gives extensive data on different fisheries sectors identified and described for each country bordering the Red Sea Furthermore its catch and specific composition is also described over the period 1950 to 2010 Combined with the ecosystem model this useful information can uniquely help managing fisheries and ecosystems of the Red Sea

**State of the World's Oceans** Michelle Allsopp, Stefan E. Pambuccian, Paul Johnston, David Santillo, 2008-12-16 The world's oceans cover 70% of the earth's surface and are home to a myriad of amazing and beautiful creatures However the biodiversity of the oceans is increasingly coming under serious threat from many human activities including overfishing use of destructive fishing methods pollution and commercial aquaculture In addition climate change is already having an impact on some marine ecosystems This book discusses some of the major threats facing marine ecosystems by considering a range of topics under chapters discussing biodiversity Chapter 1 fisheries Chapter 2 aquaculture Chapter 3 pollution Chapter 4 and the impacts of increasing greenhouse gas emissions Chapter 5 It goes on to explore solutions to the problems by discussing equitable and sustainable management of the oceans Chapter 6 and protecting marine ecosystems using marine reserves Chapter 7 Presently 76% of the oceans are fully or over exploited with respect to fishing and many species have been severely depleted It is abundantly clear that in general current fisheries management regimes are to blame for much of the widespread degradation of the oceans Many policy makers and scientists now agree that we must adopt a radical new approach to managing the seas one that is precautionary in nature and has protection of the whole marine ecosystem as its primary objective This ecosystem based approach is vital if we are to ensure the health of our oceans for future generations

*The Cambridge World History: Volume 3, Early Cities in Comparative Perspective, 4000 BCE-1200 CE* Norman Yoffee, 2015-03-19 From the fourth millennium BCE to the early second millennium CE the world became a world of cities This volume explores this critical transformation from the appearance of the earliest cities in Mesopotamia and Egypt to the rise of cities in Asia and the Mediterranean world Africa and the Americas Through case studies and comparative accounts of key cities across the world leading scholars chart the ways in which these cities grew as nodal points of pilgrimages and ceremonies exchange storage and redistribution and centres for defence and warfare They show how in these cities along with their associated and restructured countrysides new rituals and ceremonies connected leaders with citizens and the gods new identities as citizens were created and new forms of power and sovereignty emerged They also examine how this unprecedented concentration of people led to disease violence slavery and subjugations of unprecedented kinds and scales

*Seasonal to Decadal Prediction of Marine Ecosystems: Opportunities, Approaches, and Applications* Mark R. Payne, Alistair J. Hobday, Brian R. MacKenzie, Desiree Tommasi, 2019-06-28 Tremendous advances in oceanographic observing and modeling systems over the last decade have led to unprecedented developments in the nature of information available to marine science While improvements in observational technologies and networks have garnered much attention remarkable developments in forecasting the ocean have received much less focus Exploiting this new predictive skill to improve scientific understanding generate advice and aid in the management of marine resources is emerging as one of the new challenges of marine science Translating predictions of the physical environment into biological outcomes however is not straightforward Fisheries scientists for example have been trying to understand the links between physics and biology and generate predictions of variables such as recruitment for close to a century with limited success Nevertheless spatial distributions and the timing of key events which have received less focus are often tightly linked to the physical environment and may have management relevant applications The first such forecasts based on this skill are now starting to emerge This *Frontiers in Marine Science Research Topic* provides a snapshot of the state of the art in Marine Ecological Prediction It covers the opportunities for developing such forecasts technical approaches that could be employed and examples where the technology

is already being applied This body of work therefore marks an important milestone on the route to developing this new and exciting field of marine science      The World Ocean in Globalisation Davor Vidas, Peter Johan Schei, 2011-08-11 Have we already entered a new epoch the Anthropocene dominated by the impact of human activities What of the effects of increasing globalisation on the seas Thirty three experts on marine affairs and the law of the sea examine the emerging challenges for the World Ocean inquiring into developments prompted by globalisation in central issue areas of the law of the sea These are explored systematically in sections on the key challenges and developments in the interface of science economic uses and law Part I climate change and the oceans Part II sustainability of fisheries Part III challenges and responses related to global maritime transport Part IV and the regulatory responses to global challenges in seas surrounding Europe Part V
