Seas Of Venus:

Seas of Venus, Second Edition David Drake, 2013-01-09 Now with new content by David Drake THE MOST COLORFUL MYTH FROM SCIENCE FICTION S GOLDEN AGE IS REBORN IN SEAS OF VENUS Earth is a dead cinder beyond the dense clouds On a terraformed Venus the land is ruled by savage plants and the even more savage beasts that prey on them while monsters out of nightmare swim though the globe girdling seas Mankind huddles in domed underwater Keeps living a purposeless static existence dedicated to pleasure but destined for oblivion later if not sooner Only the Free Companions the mercenaries who fight proxy wars for the Keeps live on the surface of Venus Their warships course the seas battling one another in struggles to decide victory or defeat for one day life or death for a few individuals The Free companions live till they die with the searing thrill of danger and their deeds bring excitement and color to the bored residents of the Keeps but Mankind is doomed unless something changes Few are willing to risk their lives for that change battling both the terrifying environment and the ruthless oligarchs for whom the status quo means a lifetime of luxury But there are a handful of courageous visionaries in the Keeps and in the Free Companies where death is a way of life At the publisher s request this title is sold without DRM Digital Rights Management Only a few of us have enough willpower when a new Dick Francis or the latest volume of a David Drake series comes out in hardcover to wait for the paperback David Friedman Hidden Order The Economics of Everyday Life the best in military science fiction Recommended Booklist the master of the mercenary science fiction novel He has developed a following just short of cult proportions Rave Reviews Drake is one of the most gifted users of historical and military raw materials at work today Chicago Sun Times **Seas of Venus** , 2004-03-01 *Alien Seas* Michael Carroll, Rosaly Lopes, 2013-07-19 Oceans were long thought to exist in all corners of the Solar System from carbonated seas percolating beneath the clouds of Venus to features on the Moon s surface given names such as the Bay of Rainbows and the Ocean of Storms With the advent of modern telescopes and spacecraft exploration these ancient concepts of planetary seas have for the most part evaporated But they have been replaced by the reality of something even more exotic For example although it is still uncertain whether Mars ever had actual oceans it now seems that a web of waterways did indeed at one time spread across its surface The water in many places in our Solar System is a poisoned brew mixed with ammonia or methane Even that found on Jupiter s watery satellite Europa is believed similar to battery acid Beyond the Galilean satellites may lie even more alien oceans Saturn s planet sized moon Titan seems to be subject to methane or ethane rainfall This creates methane pools that in turn become vast lakes and perhaps seasonal oceans Titan has other seas in a sense as large shifting areas of sand covering vast plains have been discovered Mars also has these sand seas and Venus may as well along with oceans of frozen lava Do super chilled concoctions of ammonia liquid nitrogen and water percolate beneath the surfaces of Enceladus and Triton For now we can only guess at the possibilities Alien Seas serves up part history part current research and part theory as it offers a rich buffet of seas on other worlds It is organized by location and by the

material of which various oceans consist with guest authors penning specific chapters Each chapter features new original art depicting alien seas as well as the latest ground based and spacecraft images Original diagrams presents details of planetary oceans and related processes **The Supplement to the Cyclopaedia of India and of Eastern and Southern Asia, Etc** Edward Balfour, 1858 **A Catalogue of the Living Marine Bivalve Molluscs of China** F.R. The Ancient Sea Hamish Williams,Ross Clare,2022-11-17 In the ancient Mediterranean world the sea was an essential domain for trade cultural exchange communication exploration and colonisation In tandem with the lived reality of this maritime space a parallel experience of the sea emerged in narrative representations from ancient Greece and Rome of the sea as a cultural imaginary This imaginary seems often to oscillate between two extremes the utopian and the catastrophic such representations can be found in narratives from ancient history philosophy society and literature as well as in their post classical receptions Utopia can be found in some imaginary island paradise far away and across the distant sea the sea can

hold an unknown mysterious divine wealth below its surface and the sea itself as a powerful watery body can hold a liberating potential The utopian quality of the sea and seafaring can become a powerful metaphor for articulating political notions of the ideal state or for expressing an individual's sense of hope and subjectivity Yet the catastrophic sea balances any perfective imaginings the sea threatens coastal inhabitants with floods tsunamis and earthquakes and sailors with storms and the accompanying monsters From symbolic perspectives the catastrophic sea represents violence instability the savage and even cosmological chaos The twelve papers in this volume explore the themes of utopia and catastrophe in the liminal environment of the sea through the lens of history philosophy literature and classical reception Contributors Manuel lvarez Mart Aguilar Vilius Bartninkas Aaron L Beek Ross Clare Gabriele Cornelli Isaia Crosson Ryan Denson Rhiannon Easterbrook Emilia Mataix Ferr ndiz Georgia L Irby Simona Martorana Guy Middleton Hamish Williams **Half-hours at the Sea-side, Or, Recreations with Marine Objects** John Ellor Taylor,1872 Half-hours at the Sea-side John Ellor Taylor,1872
