Great Risks Had to be Taken Patrick J. Howell,2019-02-19 The renovation of the Jesuits after the Second Vatican Council has been a sign of hope and a cause for consternation Especially during the turbulence right after the Council the Jesuits were in the eye of the storm In this historical memoir Patrick Howell gives personal insight into how the Council impacted the Society of Jesus and precipitated a radical rethinking of the mission of the Jesuits today The Council mandated a return of religious orders to the vision of their founders The Jesuits fortunately had a strong charismatic founder in St Ignatius of Loyola with a rich religious and intellectual tradition By rediscovering their spiritual heritage and restructuring their mission around the signs of the times and the needs of the world the Jesuits were able to move adroitly into the twenty first century as a continuing dynamic force for the Church and for the world Fr Howell brings a unique personal perspective to the nature and style of the Church prior to the Council and an insider's view throughout his fifty seven years as a Jesuit in which he has met many of the personages witnessed all the changes and been a direct participant in many of them

Jesuits and Matriarchs

Nadine Amsler,2018-09-18 In early modern China Jesuit missionaries associated with the male elite of Confucian literati in

order to proselytize more freely but they had limited contact with women whose ritual spaces were less accessible. Historians of Catholic evangelism have similarly directed their attention to the devotional practices of men neglecting the interior spaces in Chinese households where women worshipped and undertook the transmission of Catholicism to family members and friends. Nadine Amsler's investigation brings the domestic and devotional practices of women into sharp focus, uncovering a rich body of evidence that demonstrates how Chinese households functioned as sites of evangelization, religious conflict, and indigenization of Christianity. The resulting exploration of gendered realms in seventeenth-century China reveals networks of religious sociability and ritual communities among women as well as women's remarkable acts of private piety. Amsler's exhaustive archival research and attention to material culture reveals new insights about women's agency and domestic activities illuminating areas of Chinese and Catholic history that have remained obscure if not entirely invisible for far too long. The open access publication of this book was made possible by grants from the Swiss National Science Foundation and the James P. Geiss and Margaret Y. Hsu Foundation.

The History of Architectural Education in the Middle East and North Africa Farhan Karim, Mohammad Gharipour, 2024-12-31. The History of Architectural Education in the Middle East and North Africa explores the varied socio-political landscapes within which different architectural programs and schools were established across Middle Eastern and North African countries. It addresses a significant gap in our understanding of the diverse strategies and paths through which architectural pedagogy underwent institutionalization and standardization during nineteenth and twentieth centuries. This process of modernization was greatly influenced by rapidly evolving socio-economic conditions and the interests of the real estate market. Concurrently, architectural educators and institutions responded to public demands for more inclusive urban environments, shaping the social ambitions and expectations of emerging modern cities. Karim and Gharipour present an interconnected and parallel history of these institutions through a series of case studies. They argue that architectural pedagogy and its stakeholders didn't solely shape the technical discourse of the building industry. Instead, their activism and advocacy collectively ignited epistemological debates concerning the perception of modern urban society and its direction.

Handbook of Religious Culture in Nineteenth-Century Europe Anthony Steinhoff, Jeffrey Zalar, 2024-12-30. This handbook offers a guide to research on religious culture during Europe's long nineteenth century (1800-1914). Grounded in the latest theoretical approaches and in line with trends that have produced a religious turn in the study of modern Europe, the volume assesses the state of the field while making provocative recommendations for its enlargement. Unique and ambitious in its thematic breadth, it addresses the histories of all five of Europe's main religious traditions: Eastern Orthodox Christianity, Judaism, Islam, Protestantism, and Roman Catholicism, and brings these histories into comparative analysis. This analysis extends to a wide range of subjects from popular belief and practice, education and modern knowledge formation, and the arts to the intersections between religion and urbanization, civil society and politics, and missions and imperialism. It also evaluates recent developments in

work on religion vis vis both gender and nationalism while calling attention to newer research that proposes secularism as a form of belief in its own right Presenting the scholarship of eighteen leaders in their respective fields the volume explains why religion as a topic of research has moved from the periphery to the center of modern European historiography

American Catholic Schools in the Twentieth Century Ann Marie Ryan, 2022-02-21 This book examines how Catholic educators grappled with public educational policies and reforms like standardization and accreditation educational measurement and testing and federal funding for schools during the early to mid twentieth century These issues elicited an array of reactions including resistance cooperation and co optation American Catholics had established one of the largest private educational organizations in the United States by the twentieth century It rivaled only that of the public school system At mid century Catholic schools enrolled some 12 percent of the American school age population and their enrollments grew in number through the 1960s The Catholic Church s lobbying arm the National Catholic Welfare Conference NCWC used its well earned stature to push for federal funds for students attending their schools The NCWC succeeded in securing funds with the Elementary and Secondary Education Act of 1965 for students needing special education services and students living in poverty attending Catholic schools This signified a major shift in American education policy Despite this radical change Catholic schools lost significant enrollment over the next several decades to public private and newly minted public charter schools Catholic schools faced an increasingly competitive landscape in an ever expanding school choice environment that they helped create
