Architectural Record ,1956 **The American Swedish Monthly** ,1959 ... Meant to be Bent Carl Nyren
(Architecte, Suède),1990 **Bibliographie D'histoire de L'art** ,1993 **Nuevas Iglesias de Europa** George Everard
Kidder Smith,1964 The New Churches of Europe is primarily concerned with that one room in each religious complex which constitutes the rationale of its being the room for worship Ancillary adjuncts provided for educational and social activities offices quarters for priest or minister etc generally are omitted as being peripheral to the far more trying task of the design of the nave Moreover the book does not explore in detail except where pertinent building techniques or construction nor does it go into costs either on an overall or cubic basis Such factors though admittedly important vary so much from country to country and can be so misleading that it was thought wiser given limited space to concentrate on the message of the forest and only nod to the trees The author s original intent was to include at least twenty more churches and to call on parts of many others in substantially illustrated analytical sections of the introduction However the severe economics of today s publishing prohibited this Deep apologies are sincerely extended to those kind architects who generously sent requested material yet whose churches at the last minute and for reasons that had little to do with quality could not be included
Artes Gunnar Harding,Patricia Strachan,Bengt Jangfeldt,1998-06 The 1998 edition of the international annual ARTES features highest quality international writing on the arts by renowned writers such as Margaret Atwood and Michael Holroyd and includes the 1997 Nobel Lecture in Literature by Dario Fo together with a superb audio CD of Swedish composers throughout the centuries **The Complete Guide to Architecture in Stockholm** Olof Hultin,2004 Over 400 buildings from Stockholm s earliest history to the present day are presented with new color photographs drawings and analytical texts With its detailed maps the book is an invaluable guide to have at hand when exploring the fantastic architectural treasures to be found in Stockholm and its surroundings The Architectural Review ,1958 A Guide to Swedish Architecture ,2001
Here for the first time Swedish architecture is presented in all its diversity Five authors guide us around 280 of Sweden s most noteworthy buildings and describe their architecture Castles and cathedrals are presented side by side with traditional timber buildings and modern residential developments in an eye opening journey from south to north Drawings and color photos make the book as useful before as after a visit All the authors are architects and experts in their field
